

Contents

1	Introduction	1
1.1	Theories Regarding the Evolution of the Head	1
1.2	The Classification of Cranial Nerves	2
1.3	Inconsistencies and Contradictions in the Classification of Cranial Nerves	3
2	Materials and Methods	5
3	The Hypoglossal Nucleus: The Appearance of the Muscular Tongue	7
3.1	Frog	7
3.2	Lizard	9
3.3	Rat	10
3.4	Conclusion	11
4	The Control of Patterned Eye Movements: The Oculomotor, Trochlear, and Abducens Nuclei	12
4.1	The Positions of the Eye Moving Nuclei and the Organization of Muscle Innervation	12
4.2	Neuronal Morphology in the Eye Moving Nuclei	13
4.2.1	Frog	13
4.2.2	Lizard	15
4.2.3	Rat	15
4.3	Conclusion	17
5	The Protection of the Eye: The Accessory Abducens Nucleus	19
5.1	The Position of the Accessory Abducens Nucleus	19

V

5.2	The Neuronal Morphology in the Accessory Abducens Nucleus.....	19
5.3	The Function of the Accessorius Abducens- Retractor Bulbi System	21
5.4	Conclusion	22
6	Control of Jaw Movements and Facial Expression: The Trigeminal and Facial Nuclei	24
6.1	The Primary Mandibular Joint and Its Muscles ..	24
6.2	The Secondary Mandibular Joint and Its Muscles.....	25
6.3	The Control of Movements at the Primary Mandibular Joint: The Amphibian and Sauropsidian Trigeminal and Facial Nuclei	26
6.3.1	Frog	26
6.3.2	Lizard	28
6.3.3	Bird	31
6.4	The Control of Movement at the Secondary Mandibular Joint: The Mammalian Trigeminal Nucleus	33
6.5	The Control of Facial Expression: The Mammalian Facial Nucleus	35
6.6	Conclusion	36
7	The Muscles of the Middle Ear	39
7.1	The Central Innervation of the Tensor Tympani	39
7.2	The Central Innervation of the Stapedius	40
7.3	Conclusion	42
8	Deglutition and Phonation: The Ambiguous Nucleus.....	43
8.1	The Innervated Periphery	43
8.2	The Structure and Cytoarchitecture of the Ambiguous Nucleus	44
8.2.1	Frog	44
8.2.2	Lizard	45
8.2.3	Rat	47
8.2.3.1	The Position and Structure of the Ambiguous Nucleus	49

8.2.3.2	Somatotopic Organization of the Ambiguous Nucleus	50
8.3	Conclusion	51
8.3.1	Species Differences	51
8.3.2	Cytoarchitecture of the Ambiguous Nucleus	53
8.3.3	The Relation to the Accessory Nerve Nucleus ...	54
9	The Control of Head Movements: The Accessory Nerve Nucleus	56
9.1	The Periphery	56
9.2	The Accessory Nerve	57
9.3	The Topography and Cytoarchitecture of the Accessory Nerve Nucleus	58
9.3.1	Frog	58
9.3.2	Lizard	59
9.3.3	Rat	59
9.3.4	Conclusion	60
10	Neurons of the Cranial Parasympathetic Outflow	62
10.1	The Edinger-Westphal Nucleus and Ciliary Ganglion System	62
10.1.1	The Periphery	62
10.1.2	The Central Nucleus	63
10.2	The Medullary Parasympathetic Outflow	65
10.2.1	The Peripheral Targets	65
10.2.2	The Distribution of the Preganglionic Neurons ..	65
10.2.2.1	Rat	66
10.2.2.2	Lizard	68
10.2.2.3	Frog	70
10.2.3	The Organization of the Medullary Preganglionic Neurons	70
10.3	Conclusion	71
11	General Conclusions	73
11.1	The Arrangement of Cranial Nerve Motor Nuclei	73
11.2	Comments on the Morphological Classification ..	76
11.3	Trends in the Evolution of Cranial Nerve Nuclei	77

11.4	Corollary Considerations	78
11.5	Summary	79
	References	82
	Subject Index	91
