## *Chapter 1*

### Oxygen Carriers as Molecular Models of Allosteric Behavior

*M. Brouwer (With 4 Figures)*

1	Introduction and Outline . . . . .	1
2	Properties of Respiratory Proteins . . . . .	4
3	Features and Properties of Allosteric Proteins . . . . .	4
4	Derivation of Oxygen-Saturation Functions: The Generating Function . . . . .	5
5	Oxygen Binding by Human Hemoglobin . . . . .	11
6	Oxygen Binding by High Molecular Weight Invertebrate Hemoglobins . . . . .	14
7	Oxygen Binding by Arthropod Hemocyanins . . . . .	15
8	Oxygen Binding by Molluscan Hemocyanins . . . . .	19
9	Concluding Remarks . . . . .	19
	References . . . . .	20

## *Chapter 2*

### Plant Hemoglobins

*W.H. Fuchsman*

1	Introduction . . . . .	23
2	Distribution and Physiological Function of Plant Hemoglobins . . . . .	25
3	Structures and Reactions of Plant Hemoglobins . . . . .	36
4	Biosynthesis and Degradation of Plant Hemoglobins . . . . .	46
	References . . . . .	49

*Chapter 3***Functions of Cytoplasmic Hemoglobins and Myohemerythrin***J.B. Wittenberg*

1	Structure .....	60
2	Function of Cytoplasmic Hemoglobin and Myohemerythrin at High Concentration: Hemoglobin-Facilitated Oxygen Diffusion .....	65
3	Functions of Cytoplasmic Hemoglobin at Low Concentration: Myoglobin-Mediated Oxidative Phosphorylation .....	66
4	Hemoglobin as a Terminal Oxidase .....	67
5	Hemoglobin-Associated Iron .....	68
6	Oxygen Storage in Large Domains: The Insect Tracheal Organ .....	69
7	Oxygen Storage in Very Small Domains .....	71
8	Nerve Hemoglobins .....	72
9	Nematode and Trematode Hemoglobins .....	74
10	Hemoglobin-Mediated Sulfide Utilization .....	77
11	Summary .....	79
12	Conclusion .....	79
	References .....	79

*Chapter 4***Structures of Red Blood Cell Hemoglobins***W.E. Royer, Jr. (With 7 Figures)*

1	Introduction .....	87
2	Invertebrate Hemoglobins .....	90
3	Vertebrate Hemoglobins .....	101
4	Conclusions .....	109
	References .....	110

*Chapter 5***Respiratory Function of the Red Blood Cell Hemoglobins  
of Six Animal Phyla***Ch.P. Mangum (With 2 Figures)*

1	Introduction .....	118
2	RBC Distribution, Hematology, and Morphology .....	118
3	Respiratory Design .....	123
4	O <sub>2</sub> Binding of RBCs and Purified Hb Components .....	128

5	Respiratory Functions of RBC Hbs .....	139
6	Evolution of the RBC .....	143
	References .....	145

## Chapter 6

### Molecular Structure/Function Relationships of Hemerythrins

*D.M. Kurtz, Jr. (With 6 Figures)*

1	Introduction .....	151
2	Structure of the Protein .....	152
3	Structure of the Diiron Site and O <sub>2</sub> -Binding Properties ....	155
4	Allosteric Effectors and Cooperativity in O <sub>2</sub> Binding .....	159
5	Comparisons to O <sub>2</sub> Binding in Myoglobin/Hemoglobin and Hemocyanin .....	162
6	Redox Chemistry of the Diiron Site .....	163
7	An Unexamined Problem: Protein Folding and Iron Site Assembly .....	167
8	Relationships to Nonheme Diiron Sites in Other Proteins ..	168
	References .....	168

## Chapter 7

### Physiological Function of the Hemerythrins

*Ch.P. Mangum (With 4 Figures)*

1	Introduction .....	173
2	Respiratory Design of Hemerythrin-Containing Animals ..	175
3	In Vitro Respiratory Properties .....	178
4	In Vivo Respiratory Properties .....	186
5	Physiological Significance of the Temperature Dependence of the Hemerythrins .....	189
6	Conclusions .....	190
	References .....	190

## Chapter 8

### Molecular Structure of the Extracellular Heme Proteins

*N.B. Terwilliger (With 2 Figures)*

1	Introduction .....	193
2	Annelid Extracellular Hemoglobins .....	195
3	Annelid Extracellular Chlorocruorins .....	202
4	Pogonophore and Vestimentiferan Extracellular Hemoglobins .....	204

5	Nematode Extracellular Hemoglobins .....	207
6	Arthropod Extracellular Hemoglobins .....	208
7	Molluscan Extracellular Hemoglobins .....	213
8	Biosynthesis of Invertebrate Hemoglobins .....	217
9	Conclusions .....	220
	References .....	221

### *Chapter 9*

#### Properties and Functions of Extracellular Heme Pigments

*A. Toulmond*

1	Introduction .....	231
2	Distribution and Localization .....	232
3	Oxygen-Binding Properties .....	236
4	Functions of Extracellular Heme Pigments .....	241
5	Transport, Transfer, and Storage Functions .....	242
6	Other Functions .....	247
7	Summary and Conclusion .....	251
	References .....	251

### *Chapter 10*

#### Molluscan Hemocyanins: Structure and Function

*K.E. van Holde, K.I. Miller, and W.H. Lang (With 13 Figures)*

1	Introduction:	
	The Nature and Distribution of Molluscan Hemocyanins ..	258
2	Structure of the Native Molluscan Hemocyanin Molecule ..	261
3	Subunits of Molluscan Hemocyanins .....	266
4	Primary Structure and Evolution	
	of Molluscan Hemocyanins .....	273
5	The Active Site and Oxygen Binding .....	283
	References .....	293

### *Chapter 11*

#### Respiratory Function of the Molluscan Hemocyanins

*Ch.P. Mangum (With 6 Figures)*

1	Distribution and Phylogeny	
	of the Molluscan Hemocyanins .....	301
2	Molecular Size and Structure .....	303
3	Oxygen-Carrying Capacity of Molluscan Bloods .....	305

4	Oxygen Equilibrium Properties of Molluscan Hemocyanins .....	307
5	Physiological Functioning of the Molluscan Hcs .....	315
6	Summary and Conclusions .....	320
	References .....	321

### *Chapter 12*

#### Molecular Structure of the Arthropod Hemocyanins

*J. Markl and H. Decker (With 16 Figures)*

1	Introduction .....	325
2	The Quaternary Structure .....	327
3	On the Relationship Between Structure and Function .....	333
4	Heterogeneity of the Subunits .....	334
5	Molecular Structure of the Subunit and the Hexamer .....	339
6	Biosynthesis .....	346
7	Evolution .....	349
	References .....	363

### *Chapter 13*

#### Respiratory Function of Arthropod Hemocyanins

*J.P. Truchot (With 2 Figures)*

1	Introduction .....	377
2	Hemolymph Oxygen-Binding Properties .....	378
3	Oxygen Transport: The Functioning of Hemocyanin in Vivo .....	390
4	Modulation of Hemocyanin O <sub>2</sub> -Carrying Function .....	396
	References .....	404

### *Chapter 14*

#### Structure-Function Relationships of the Ectothermic Vertebrate Hemoglobins

*R.L. Ingermann*

1	Introduction .....	411
2	Hemoglobins of the Agnatha .....	412
3	Hemoglobin Heterogeneity .....	413
4	Root Effect Hemoglobins .....	416
5	Changes in Hemoglobins During Ontogeny .....	418
6	Methemoglobin .....	424

7 Summary .....	425
References .....	425

### *Chapter 15*

#### Respiratory Functions of Avian and Mammalian Hemoglobins

*G.K. Snyder (With 6 Figures)*

1 Introduction .....	433
2 Oxygen Capacity of Blood .....	434
3 The Affinity of Hemoglobin for Oxygen – Whole Blood ...	436
4 Cooperativity of Oxygen Binding .....	440
5 The Bohr Effect in Whole Blood .....	440
6 Molecular Basis for Differences in Respiratory Properties of Hb .....	443
7 Modulation of the Respiratory Functions of Hb .....	448
References .....	450

<i>Subject Index</i> .....	455
----------------------------	-----

**Chapter 1**

**Oxygen Carriers  
as Molecular Models of Allosteric Behavior**

*M. Brouwer*

**Contents**

1	Introduction and Outline .....	1
2	Properties of Respiratory Proteins .....	4
3	Features and Properties of Allosteric Proteins .....	4
4	Derivation of Oxygen-Saturation Functions: The Generating Function .....	5
5	Oxygen Binding by Human Hemoglobin .....	11
5.1	Adair's Stepwise Oxygenation Scheme .....	11
5.2	Two-State Model for Allosteric Transitions .....	12
5.3	Combination of Two-State Model and Induced-Fit Model .....	12
6	Oxygen Binding by High Molecular Weight Invertebrate Hemoglobins .....	14
7	Oxygen Binding by Arthropod Hemocyanins .....	15
7.1	Hemocyanins with six Binding Sites .....	15
7.2	Hemocyanins with 12 Binding Sites .....	16
7.3	Hemocyanins with 24 and 48 Binding Sites .....	16
8	Oxygen Binding by Molluscan Hemocyanins .....	19
8.1	Hemocyanin with 70 Binding Sites .....	19
8.2	Hemocyanin with 160 Binding Sites .....	19
9	Concluding Remarks .....	19
	References .....	20

## Chapter 2

# Plant Hemoglobins

*W.H. Fuchsmann*

## Contents

1	Introduction .....	23
2	Distribution and Physiological Function of Plant Hemoglobins .....	25
2.1	Distribution in the Plant Kingdom .....	25
2.2	Correlations with N <sub>2</sub> Fixation .....	26
2.3	Heterogeneities .....	27
2.4	Locations and Concentrations .....	29
2.5	Regulation of Free O <sub>2</sub> Concentration .....	30
2.6	Control over Activities .....	33
2.7	Other Possible Functions .....	34
3	Structures and Reactions of Plant Hemoglobins .....	36
3.1	Amino Acid Sequences .....	36
3.2	Prosthetic Group and Three-Dimensional Structures .....	38
3.3	Structures and Reaction Chemistry at the Heme Site .....	40
3.3.1	Deoxyhemoglobins .....	40
3.3.2	Reactions of Deoxyhemoglobins with Ligands .....	40
3.3.3	Oxidation-Reduction Reactions .....	42
3.3.4	Aquated Methemoglobins .....	44
3.3.5	Reaction of Methemoglobins with Ligands .....	45
4	Biosynthesis and Degradation of Plant Hemoglobins .....	46
4.1	Sources of Protein and Heme .....	46
4.2	Organization of Genes .....	47
4.3	Control over Gene Expression .....	47
4.4	Degradation .....	48
	References .....	49

## Chapter 3

# Functions of Cytoplasmic Hemoglobins and Myohemerythrin

*J.B. Wittenberg*

## Contents

1	Structure .....	60
1.1	Subunit Assemblies .....	60
1.2	Three-Dimensional Structure .....	60
1.3	Oxygen Binding and Structure .....	62
2	Function of Cytoplasmic Hemoglobin and Myohemerythrin at High Concentration: Hemoglobin-Facilitated Oxygen Diffusion .....	65
3	Functions of Cytoplasmic Hemoglobin at Low Concentration: Myoglobin-Mediated Oxidative Phosphorylation .....	66
4	Hemoglobin as a Terminal Oxidase .....	67
5	Hemoglobin-Associated Iron .....	68
6	Oxygen Storage in Large Domains: The Insect Tracheal Organ .....	69
6.1	<i>Gastrophilus</i> .....	69
6.2	Backswimmers .....	69
7	Oxygen Storage in Very Small Domains .....	71
7.1	Retention of Ligand by Protein .....	71
7.2	Micrometazoans .....	71
8	Nerve Hemoglobins .....	72
8.1	Oxygen Storage in Glial Cells .....	72
8.2	Oxygen Utilization by Nerves with Glial Hemoglobin .....	74
8.3	Particle-Bound Hemoglobin .....	74
9	Nematode and Trematode Hemoglobins .....	74
9.1	Parasitic Nematodes .....	74
9.2	Free-Living Nematodes .....	76
9.3	Parasitic Trematodes .....	76
9.4	The Chromotrope .....	76
10	Hemoglobin-Mediated Sulfide Utilization .....	77
11	Summary .....	79
12	Conclusion .....	79
	References .....	79

## Chapter 4

# Structures of Red Blood Cell Hemoglobins

*W.E. Royer, Jr.*

## Contents

1	Introduction .....	87
2	Invertebrate Hemoglobins .....	90
2.1	Phoronids .....	90
2.2	Annelids .....	90
2.3	Echiurids .....	91
2.4	Mollusks .....	92
2.5	Echinoderms .....	100
3	Vertebrate Hemoglobins .....	101
3.1	Jawless Vertebrates .....	101
3.2	Higher Vertebrates .....	102
3.2.1	Mammalian Hemoglobins .....	102
3.2.2	Fish Hemoglobins .....	106
3.2.3	Amphibian Hemoglobins .....	107
3.2.4	Reptile Hemoglobins .....	108
3.2.5	Bird Hemoglobins .....	109
4	Conclusions .....	109
References	.....	110

**Chapter 5**

**Respiratory Function  
of the Red Blood Cell Hemoglobins  
of Six Animal Phyla**

*Ch.P. Mangum*

**Contents**

1	Introduction .....	118
2	RBC Distribution, Hematology, and Morphology .....	118
2.1	Phoronid RBCs .....	118
2.2	Annelid RBCs .....	118
2.3	Nemertine RBCs .....	121
2.4	Echiuroid RBCs .....	121
2.5	Molluscan RBCs .....	121
2.6	Echinoderm RBCs .....	123
3	Respiratory Design .....	123
3.1	Phoronids .....	123
3.2	Annelids .....	124
3.3	Nemertines .....	125
3.4	Echiuroids .....	125
3.5	Mollusks .....	126
3.5.1	Solenogasters .....	126
3.5.2	Bivalves .....	126
3.6	Echinoderms .....	127
3.6.1	Ophiuroids .....	127
3.6.2	Holothurians .....	127
4	O <sub>2</sub> Binding of RBCs and Purified Hb Components .....	128
4.1	Phoronids .....	128
4.2	Annelids .....	133
4.3	Echiuroids .....	135
4.4	Mollusks .....	137
4.5	Echinoderms .....	138
4.5.1	Ophiuroids .....	138
4.5.2	Holothurians .....	139
5	Respiratory Functions of RBC Hbs .....	139
5.1	Phoronids .....	139
5.2	Annelids .....	139
5.3	Nemertines .....	141
5.4	Echiuroids .....	141
5.5	Mollusks .....	142
5.6	Echinoderms .....	143
6	Evolution of the RBC .....	143
	References .....	145

## Chapter 6

# Molecular Structure/Function Relationships of Hemerythrins

*D.M. Kurtz, Jr.*

## Contents

1	Introduction .....	151
2	Structure of the Protein .....	152
2.1	Quaternary .....	152
2.2	Tertiary .....	153
2.3	Secondary .....	153
2.4	Primary .....	154
3	Structure of the Diiron Site and O <sub>2</sub> -Binding Properties .....	155
3.1	Structure .....	155
3.2	Mechanism of O <sub>2</sub> Binding .....	156
3.3	Kinetics and Equilibria of O <sub>2</sub> Binding .....	158
4	Allosteric Effectors and Cooperativity in O <sub>2</sub> Binding .....	159
4.1	Heterotropic Allosteric Effectors .....	159
4.2	Homotropic Cooperativity in O <sub>2</sub> Binding .....	160
5	Comparisons to O <sub>2</sub> Binding in Myoglobin/Hemoglobin and Hemocyanin .....	162
6	Redox Chemistry of the Diiron Site .....	163
6.1	Overview .....	163
6.2	Autoxidation .....	164
6.3	A Methemerythrin Reduction System from Hemerythrocytes .....	165
7	An Unexamined Problem: Protein Folding and Iron Site Assembly .....	167
8	Relationships to Nonheme Diiron Sites in Other Proteins .....	168
	References .....	168

## Chapter 7

# Physiological Function of the Hemerythrins

*Ch.P. Mangum*

## Contents

1	Introduction	173
2	Respiratory Design of Hemerythrin-Containing Animals	175
2.1	Sipunculans	175
2.2	Brachiopods	177
2.3	Priapulids	177
2.4	Annelids	177
3	In Vitro Respiratory Properties	178
3.1	O <sub>2</sub> -Binding Capacity	178
3.2	Hematology	178
3.3	Hemerythrin Oxygen Equilibria	178
3.3.1	Sipunculan Hemerythrins	178
3.3.2	Brachiopod Hemerythrins	182
3.3.3	Priapulid Hemerythrins	183
3.3.4	Annelid Hemerythrins	183
3.4	PBC O <sub>2</sub> Equilibria	183
3.4.1	Sipunculan PBCs	183
3.4.2	Priapulid PBCs	186
3.4.3	Brachiopod PBCs	186
3.4.4	Annelid PBCs	186
4	In Vivo Respiratory Properties	186
4.1	Respiratory Importance	186
4.2	Hr O <sub>2</sub> Transport in Sipunculans	187
4.3	Hr O <sub>2</sub> Transport in Priapulids	188
4.4	Hr O <sub>2</sub> Storage	188
5	Physiological Significance of the Temperature Dependence of the Hemerythrins	189
6	Conclusions	190
	References	190

## **Chapter 8**

# **Molecular Structure of the Extracellular Heme Proteins**

*N.B. Terwilliger*

## **Contents**

1	Introduction .....	193
2	Annelid Extracellular Hemoglobins .....	195
3	Annelid Extracellular Chlorocruorins .....	202
4	Pogonophore and Vestimentiferan Extracellular Hemoglobins .....	204
5	Nematode Extracellular Hemoglobins .....	207
6	Arthropod Extracellular Hemoglobins .....	208
7	Molluscan Extracellular Hemoglobins .....	213
8	Biosynthesis of Invertebrate Hemoglobins .....	217
9	Conclusions .....	220
	References .....	221

## Chapter 9

# Properties and Functions of Extracellular Heme Pigments

*A. Toulmond*

## Contents

1	Introduction .....	231
2	Distribution and Localization .....	232
3	Oxygen-Binding Properties .....	236
3.1	Concentration of Active Sites .....	236
3.2	Cooperativity .....	237
3.3	Intrinsic O <sub>2</sub> Affinity and Its Modulation by Allosteric Effectors .....	238
3.4	Temperature Effect on the Intrinsic O <sub>2</sub> Affinity .....	240
4	Functions of Extracellular Heme Pigments .....	241
5	Transport, Transfer, and Storage Functions .....	242
5.1	Oxygen .....	242
5.1.1	The Problem .....	242
5.1.2	An Example, the Lugworm Extracellular Hb .....	242
5.1.3	Oxygen Transfer Systems .....	244
5.1.4	Multiple Extracellular Heme Pigments .....	244
5.2	Carbon Dioxide .....	245
5.3	Sulfide .....	246
6	Other Functions .....	247
6.1	Acid Base Balance .....	248
6.2	Sulfide Detoxification .....	249
6.3	Colloid Osmotic Pressure .....	249
7	Summary and Conclusion .....	251
	References .....	251

## Chapter 10

# Molluscan Hemocyanins: Structure and Function

*K.E. van Holde,<sup>1</sup> K.I. Miller,<sup>1</sup> and W.H. Lang<sup>1,2</sup>*

## Contents

1	Introduction:	
	The Nature and Distribution of Molluscan Hemocyanins .....	258
1.1	Scope of this Review .....	258
1.2	Distribution of Molluscan Hemocyanins .....	258
1.3	Localization and Synthesis of Hemocyanin in Mollusks .....	259
2	Structure the Native Molluscan Hemocyanin Molecule .....	261
2.1	Molecular Morphological Types	
	and Their Phlogenetic Distributions .....	261
2.2	Polymerization of the 60S Structure .....	261
3	Subunits of Molluscan Hemocyanins .....	266
3.1	Masses of the Subunits, Stoichiometry of the Native Proteins .....	266
3.2	Organization of the Subunit Polypeptide Chain .....	268
3.3	Ordering of Domains .....	268
3.4	Dissociation and Reassociation of Molluscan Hemocyanins .....	270
3.4.1	Equilibrium Considerations .....	270
3.4.2	Kinetic Studies of the Association-Dissociation Reaction .....	272
3.4.3	Assembly of Subunits into Whole Molecules .....	272
4	Primary Structure and Evolution of Molluscan Hemocyanins .....	273
4.1	Primary Structure .....	273
4.1.1	Available Sequences .....	273
4.1.2	Sequence Heterogeneity .....	274
4.1.3	Sequence Homology Between Individual Domains .....	275
4.1.4	Carbohydrate Content .....	277
4.2	The Evolution of Molluscan Hemocyanin .....	278
4.2.1	Active Site .....	278
5	The Active Site and Oxygen Binding .....	283
5.1	The Environment of the Active Site in Molluscan Hemocyanins .....	283
5.2	Ligand Binding at the Active Site .....	284
5.2.1	Deoxyhemocyanin .....	284
5.2.2	Binding of Oxygen .....	285
5.2.3	Binding of Carbon Monoxide .....	286

**Chapter 11**  
**Respiratory Function**  
**of the Molluscan Hemocyanins**

*Ch. P. Mangum*

**Contents**

1	Distribution and Phylogeny of the Molluscan Hemocyanins .....	301
2	Molecular Size and Structure .....	303
3	Oxygen-Carrying Capacity of Molluscan Bloods .....	305
4	Oxygen Equilibrium Properties of Molluscan Hemocyanins .....	307
4.1	Polyplacophoran Hcs .....	310
4.2	Gastropod Hcs .....	311
4.3	Bivalve Hcs .....	313
4.4	Cephalopod Hcs .....	314
5	Physiological Functioning of the Molluscan Hcs .....	315
5.1	Polyplacophorans .....	315
5.2	Gastropods .....	316
5.3	Cephalopods .....	318
6	Summary and Conclusions .....	320
	References .....	321

## Chapter 12

# Molecular Structure of the Arthropod Hemocyanins

*J. Markl*<sup>1</sup> and *H. Decker*<sup>2</sup>

## Contents

1	Introduction .....	325
2	The Quaternary Structure .....	327
2.1	Architecture of Oligohexamers .....	327
2.2	Stability of the Oligomers .....	331
3	On the Relationship Between Structure and Function .....	333
4	Heterogeneity of the Subunits .....	334
4.1	The Phenomenon .....	334
4.2	Distinct Subunit Types in the Oligomeric Architecture .....	337
4.3	Possible Role of Subunit Diversity in Oxygen Binding .....	338
5	Molecular Structure of the Subunit and the Hexamer .....	339
5.1	The Primary Structure .....	339
5.2	The Ternary Structure .....	339
5.3	The Copper Center .....	343
5.4	Structure of the Basic Hexamer .....	344
6	Biosynthesis .....	346
7	Evolution .....	349
7.1	Homology of All Arthropod Hemocyanins .....	349
7.2	Subunit Diversity in Chelicerate Hemocyanins .....	350
7.3	Subunit Diversity in Crustacean Hemocyanins .....	352
7.4	The Relationship Between Arthropod and Molluscan Hemocyanin .....	353
7.5	The Relationship to Tyrosinase .....	354
7.6	Arthropod Hemocyanin and Insect Storage Proteins .....	356
7.7	Gene Structure of Hemocyanin, Arylphorin, and Tyrosinase .....	358
7.8	The Origin of Respiratory Proteins .....	360
7.9	Why Hemocyanin and Not Hemoglobin? .....	361
	References .....	363

## Chapter 13

# Respiratory Function of Arthropod Hemocyanins

*J.P. Truchot*

## Contents

1	Introduction .....	377
2	Hemolymph Oxygen-Binding Properties .....	378
2.1	Oxygen Capacity .....	379
2.2	Oxygen Equilibrium Curves and Cooperativity .....	382
2.3	Bohr Effect: pH and $P_{CO_2}$ .....	385
2.4	The Effect of Inorganic Ions .....	386
2.5	The Effect of Organic Cofactors .....	387
2.6	Subunit Diversity and $O_2$ -Binding Properties .....	390
3	Oxygen Transport: The Functioning of Hemocyanin in Vivo .....	390
3.1	A Short Historical Account .....	390
3.2	The Variability of Blood Oxygen Levels .....	391
3.3	In Vivo Functioning of Hc Under Different Conditions: The Role of the Venous Oxygen Reserve .....	394
4	Modulation of Hemocyanin $O_2$ -Carrying Function .....	396
4.1	Ambient Hypoxia .....	397
4.2	Exercise .....	399
4.3	Temperature Changes .....	400
4.4	Salinity Changes .....	402
	References .....	404

**Chapter 14**

**Structure-Function Relationships  
of the Ectothermic Vertebrate Hemoglobins**

*R.L. Ingermann*

**Contents**

1	Introduction .....	411
2	Hemoglobins of the Agnatha .....	412
3	Hemoglobin Heterogeneity .....	413
4	Root Effect Hemoglobins .....	416
5	Changes in Hemoglobins During Ontogeny .....	418
5.1	Embryonic Hemoglobins of Oviparous Ectotherms .....	419
5.2	Fetal Hemoglobins of Viviparous Ectotherms .....	420
5.3	Larval Hemoglobins .....	421
6	Methemoglobin .....	424
7	Summary .....	425
	References .....	425

**Chapter 15**

**Respiratory Functions  
of Avian and Mammalian Hemoglobins**

*G.K. Snyder*

**Contents**

1	Introduction .....	433
2	Oxygen Capacity of Blood .....	434
2.1	Changes in Blood O <sub>2</sub> Capacity .....	434
2.2	Red Blood Cells and O <sub>2</sub> Capacity .....	435
3	The Affinity of Hemoglobin for Oxygen – Whole Blood .....	436
3.1	Increased Hb-O <sub>2</sub> Affinity – Adults .....	436
3.2	Increased Hb-O <sub>2</sub> Affinity – Fetal .....	438
3.3	Decreased Hb-O <sub>2</sub> Affinity – Fetal and Adult .....	439
4	Cooperativity of Oxygen Binding .....	440
5	The Bohr Effect in Whole Blood .....	440
5.1	Bohr Effect and O <sub>2</sub> Affinity – Fetal .....	441
5.2	The Two Bohr Effects .....	442
6	Molecular Basis for Differences in Respiratory Properties of Hb .....	443
6.1	Evolution of Hb in Birds and Mammals. ....	443
6.2	Molecular Basis for Differences in O <sub>2</sub> Affinity .....	445
6.3	Molecular Basis of the Bohr Effect .....	446
7	Modulation of the Respiratory Functions of Hb .....	448
	References .....	450
