

Contents

Introduction	
H.J. DEEG	1
 I. Pretransplant Considerations	
1. Treatment Planning and Timing of Transplantation	
H.J. DEEG and H.-G. KLINGEMANN	7
2. Donor Selection	
H.J. DEEG	31
3. Preparation for Marrow Transplantation	
G.L. PHILLIPS	43
4. Cost and Availability of Marrow Transplantation	
H.J. DEEG	61
 II. Transplant Procedure	
1. Conditioning Regimens	
G.L. PHILLIPS	67
2. Collection, Processing and Infusion of Marrow	
H.-G. KLINGEMANN	89
 III. Acute Transplant Related Problems	
1. Side Effects of Conditioning Regimens	
G.L. PHILLIPS	105
2. Acute Graft-Versus-Host Disease (GVHD)	
H.J. DEEG	121
3. Marrow Graft Failure	
H.J. DEEG	141
4. Management of Infections	
G.L. PHILLIPS	155

5. Interstitial Pneumonitis	
H.J. DEEG	175
6. Hepatic Dysfunction	
H.-G. KLINGEMANN	187
7. Kidneys and Urinary Tract	
H.-G. KLINGEMANN	205
8. Central Nervous System	
H.-G. KLINGEMANN	213

IV. Delayed Transplant Related Problems

1. Follow-Up after Discharge from the Transplant Center	
H.J. DEEG	229
2. Chronic Graft-Versus-Host Disease	
H.-G. KLINGEMANN	237
3. Pulmonary Problems	
H.-G. KLINGEMANN	257
4. Neuroendocrine Function, Growth, and Development	
H.J. DEEG	263
5. Ophthalmologic Problems	
H.J. DEEG	269
6. Secondary Malignancies	
H.J. DEEG	273
7. Other Delayed Complications	
H.J. DEEG	279
8. Rehabilitation	
H.J. DEEG	283

Outlook
