

Contents

Transaction Logic: An (Early) Exposé <i>A.J. Bonner and M. Kifer</i>	1
Aggregate Operations in the Information Source Tracking Method <i>F. Sadri</i>	24
An Incremental Concept Formation Approach for Learning from Databases <i>R. Missaoui and R. Godin</i>	39
The Tecton Proof System <i>D. Kapur, D.R. Musser and X. Nie</i>	54
Modeling Time in Information Systems <i>V.S. Alagar</i>	80
A Unified Framework for Database Specification: Functional Approach <i>G. Ramanathan</i>	96
Using VDM Within an Object-Oriented Framework <i>L.S. Marshall and L. Simon</i>	111
Software Engineering Environments – What Do We Want? <i>P. Goyal</i>	122
Efficient Deduction and Induction: Key to the Success of Data-Intensive Knowledge-Base Systems <i>J. Han</i>	139
On Querying Temporal Deductive Databases <i>L.V.S. Lakshmanan and D.A. Nonen</i>	158
Intuitionistic Interpretation of Deductive Databases with Incomplete Information <i>F. Dong and L.V.S. Lakshmanan</i>	175
