

Table of Contents

R.J. TERRY: Introduction	1
M.E. ROSE: The <i>Eimeria</i> . With 1 Figure	7
A. CHAYEN and B. AVRON: <i>Entamoeba Histolytica</i> , Antigens and Amoebiasis. With 1 Figure	19
J. ALEXANDER and D.G. RUSSEL: Parasite Antigens, Their Role in Protection, Diagnosis and Escape: The Leishmaniasis. With 6 Figures	43
C.I. NEWBOLD: Parasite Antigens in Protection, Diagnosis and Escape: <i>Plasmodium</i> . With 1 Figure	69
H.P.A. HUGHES: Toxoplasmosis: The Need for Improved Diagnostic Techniques and Accurate Risk Assessment. With 3 Figures	105
M.J. TURNER: Antigens of African Trypanosomes. With 2 Figures	141
L.J.S. HARRISON and R.M.E. PARKHOUSE: Antigens of Taeniid Cestodes in Protection, Diagnosis and Escape	159
N.M. ALMOND and R.M.E. PARKHOUSE: Nematode Antigens. With 2 Figures	173
A.J.G. SIMPSON and S.R. SMITHERS: Schistosomes: Surface, Egg and Circulating Antigens. With 1 Figure	205
D.L. HUGHES: Trematodes, Excluding Schistosomes with Special Emphasis on <i>Fasciola</i>	241

Indexed in Current Contents

The *Eimeria*

M.E. ROSE

1	Introduction	7
2	Life Cycle	8
3	Antigens Likely To Be Involved in Protection	8
3.1	Species Differences in Immunogenicity	9
3.2	Species and Strain Specificity of Immunity	10
3.3	Immunogenicity of Different Developmental Stages	11
3.4	Immunochemical and Molecular Investigations	13
4	Diagnosis	13
5	Escape	14
5.1	Immunosuppression	14
5.2	Antigenic Variation	14
6	Concluding Remarks	15

***Entamoeba Histolytica*, Antigens and Amoebiasis**

A. CHAYEN and B. AVRON

1	Introduction	19
1.1	Problems in the Study of Amoebiasis	20
1.2	<i>Entamoebae</i>	20
1.3	Cultivation of the Parasite	22
1.3.1	Experimental <i>In Vivo</i> Models	22
1.3.2	Cultivation <i>In Vitro</i>	22
2	Pathology	23
2.1	Intestinal Amoebiasis	23
2.2	Extraintestinal Amoebiasis	24
3	Virulence	24
3.1	Interaction with Bacteria	25
3.2	Enzymatic Activities	25
3.3	Amoebal Toxins	26
3.4	<i>Entamoeba histolytica</i> Zymodemes	26
4	Clinical Diagnosis	27
4.1	Morphological Identification	27
4.2	Detection of Anti-Amoeba Antibodies	27
4.3	Detection of Amoebic Antigens	28
4.4	Mistaken Diagnosis	28
4.5	Antigens	29
5	Protection and Escape	30
5.1	The Role of Complement	30
5.2	Cellular Response	31
5.2.1	T Cells	31
5.2.2	Polymorphonucleocytes and Macrophages	32
5.2.3	Immunosuppression	33
5.3	Escape from the Immune Response	33
6	Conclusion	34
	References	35

Parasite Antigens, Their Role in Protection, Diagnosis and Escape: The Leishmaniases

J. ALEXANDER¹ and D.G. RUSSELL²

1	Introduction	43
2	Biology of the Parasite	45
2.1	Sandfly Stages	45
2.2	Entry into the Vertebrate Host	46
2.3	Entry into the Macrophage	46
2.4	Intracellular Stages	47
2.5	Host Responses and Infection-Limiting Factors	49
2.6	Antigen Presentation	50
3	Biochemical Characterisation of Parasite Antigens	51
4	Applications of Monoclonal Antibody Research	54
4.1	Diagnosis	54
4.2	Stage-Specific Antigens	55
4.3	Antigen Presentation	55
4.4	Protective Antibodies	56
5	Functional Characterisation of Parasite Surface Antigens	56
6	Protective Immunity and Vaccination	60
7	Summary	62

Parasite Antigens in Protection, Diagnosis and Escape:

Plasmodium

C. I. NEWBOLD

1	Introduction	70
1.1	Scope of This Chapter	70
1.2	The Parasite	70
1.2.1	Life Cycle	70
1.2.2	Species	72
1.2.3	Patterns of Malaria Infection in Endemic Areas	72
1.2.4	Variation and Diversity in the Parasite Population	74
1.2.5	The Parasite in the Laboratory	74
1.3	General Techniques Used for the Identification of Important Malarial Antigens	75
1.3.1	Criteria for Immunologically Important Antigens	75
1.3.2	Surface Exposure	76
1.3.3	Molecular Biological Techniques	77
2	Parasite Antigens	77
2.1	Sporozoites	77
2.1.1	Sporozoite Antigens	77
2.1.2	Natural Immunity to Sporozoite Infection	80
2.1.3	Induction of Antisporozoite Immunity in the Laboratory	81
2.1.4	Relevance of CS Proteins to Induction of Immunity	81
2.2	Asexual Intraerythrocytic Cycle	84
2.2.1	High Molecular Weight Schizont-Specific Polypeptides	85
2.2.2	Merozoite Surface Antigens	86
2.2.3	Merozoite Organelle-Associated Antigens	86
2.2.4	Other Antigens Identified Using Monoclonal Antibodies	87
2.2.5	Late-Stage Antigens Identified by Differential Immunoprecipitation with Defined Sera	87
2.2.6	Parasite Antigens Involved in Red Cell Recognition	88
2.2.7	Results from Surface Labelling Experiments	88
2.2.8	Antigenic Variation and Diversity	89
2.2.9	Erythrocyte Surface Antigens on Parasitised Cells	92
2.2.10	Conclusions	93
2.3	Gametocytes	95
2.3.1	Conclusions	96
3	Overall Conclusions	96
	References	97

Toxoplasmosis: The Need for Improved Diagnostic Techniques and Accurate Risk Assessment

H.P.A. HUGHES

1	Introduction	105
2	Diagnosis of Toxoplasmosis	108
2.1	Existing Serodiagnosis Procedures	108
2.1.1	Dye Test	108
2.1.2	Indirect Fluorescent Antibody Test	108
2.1.3	Agglutination Tests	109
2.1.4	Enzyme-Linked Immunosorbent Assay	109
2.1.5	Serological Spectrum of Human Toxoplasmosis	109
3	Intracellular Antigens of <i>Toxoplasma</i> and Their Putative Role in Diagnosis	110
4	Membrane Components of <i>Toxoplasma Gondii</i>	113
4.1	Immunochemical Analysis of <i>Toxoplasma</i> Membrane Antigens	114
4.2	Monoclonal Antibodies Directed Against <i>Toxoplasma</i> Membrane Antigens	115
4.3	Membrane Antigens of Possible Diagnostic Significance	117
5	Detection and Significance of Circulating Antigen	120
5.1	Circulating Antigens of Intracellular Origin	121
5.2	Penetration-Enhancing Factor	121
5.3	Antigens Secreted by <i>Toxoplasma</i>	123
5.4	Detection of Circulating Antigens Using Monoclonal Antibodies	123
5.5	The Kinetics of Circulating Antigen Production	123
6	The Roles of Antibody- and Cell-Mediated Immunity in Resistance to <i>Toxoplasma</i>	125
7	Parasite Evasion of Host Immunity	127
7.1	Parasite Secretions and Immune Escape	128
7.2	The Role of Tissue Cysts in Immune Evasion	129
7.3	Antigen Capping of <i>Toxoplasma</i> Tachyzoites	130
8	Vaccination Against Toxoplasmosis	130
9	Conclusion	133

Antigens of African Trypanosomes

M.J. TURNER

1	Introduction	141
2	Escape: Antigenic Variation	142
3	Diagnosis: Predominant Antigens and Cross-reactive Determinants	144
4	Immunity	148
5	Cure: VSGs as Targets for Directed Chemotherapy	151
6	Conclusions	153
	References	154

Antigens of Taeniid Cestodes in Protection, Diagnosis and Escape

L.J.S. HARRISON¹ and R.M.E. PARKHOUSE²

1	Introduction	159
2	Protective Antigens	161
3	Diagnostic Antigens	163
4	Escape	166
5	Conclusions	168
	References	168

Nematode Antigens

N.M. ALMOND and R.M.E. PARKHOUSE

1	Introduction	173
2	Methods of Characterising Parasite Antigens	174
3	Allergens of Nematodes	174
4	The Dynamic Structure of the Surface of Nematodes	176
5	Nematode Antigens in Protection and Evasion	180
6	Host Responses and the Control of Parasitosis	187
7	Nematode Antigens for Diagnosis	190
8	Concluding Remarks	195
	References	197

Schistosomes: Surface, Egg and Circulating Antigens

A.J.G. SIMPSON and S.R. SMITHERS

1	Introduction	205
2	Schistosome Surface Antigens	206
2.1	The Biochemical Nature of the Schistosome Surface	207
2.2	The Detection of Polypeptide Antigens on the Surface of Schistosomula Using Surface-Labeling Techniques and Immunoprecipitation	208
2.3	The Detection of Surface Antigens and the Definition of Their Role in Immunity Using Monoclonal Antibodies	212
2.4	The Stage Specificity of Surface Antigen Expression and the Recognition of Surface Antigens During Human and Animal Infection	214
2.5	Host-like Antigens on the Schistosome Surface	220
2.6	Conclusions and Perspectives	222
3	Egg Antigens	223
3.1	Glycoprotein Antigens of <i>S. mansoni</i> Eggs	223
3.2	Glycoprotein Antigens of <i>S. japonicum</i> Eggs	225
3.3	Polysaccharide Egg Antigens	227
3.4	Non-soluble Egg Antigens	227
3.5	Egg Proteinase Antigens	228
3.6	Hepatotoxic Egg Antigen	228
3.7	Conclusions	229
4	Circulating Schistosome Antigens	229
4.1	Conclusions	232
	References	232

Trematodes, Excluding Schistosomes with Special Emphasis on *Fasciola*

D.L. HUGHES

1	Introduction	241
1.1	Life Cycle of <i>Fasciola hepatica</i>	242
1.2	Experimental Infections and the Production of Parasite Material	243
2	Antigens in Protection, Evasion and Diagnosis	244
2.1	Protection and Its Induction	244
2.2	Evasion Mechanisms	249
2.3	Immunodiagnosis	251
3	Other Trematodes	252
3.1	<i>Paragonimus</i>	253
3.2	<i>Clonorchis</i>	254
3.3	<i>Paramphistomum</i>	254
3.4	<i>Dicrocoelium</i>	255
	References	256
