Invited Talk:

I. Castellani (Valbonne): Causal and distributed semantics for concurrent processes	1
--	---

Session 1A: Computational Complexity

Chair: Klaus W. Wagner (Würzburg)

Editorial note:

The alternation hierarchy for sublogarithmic space: an exciting race to STACS'93	2
---	---

B. von Braunmühl (Bonn): Alternation for two-way machines with sublogarithmic space	5
--	---

M. Liśkiewicz, R. Reischuk (Darmstadt): Separating the lower levels of the sublogarithmic space hierarchy	16
--	----

J. Köbler (Ulm): Locating P/poly optimally in the extended low hierarchy	28
---	----

J.H. Lutz (Ames), E. Mayordomo (Barcelona): Measure, stochasticity, and the density of hard languages	38
--	----

Session 1B: Logic in Computer Science

Chair: Michael Rusinowitch (Nancy)

P. Devienne, P. Lebègue, J.-C. Routier (Lille): Halting problem of one binary Horn clause is undecidable	48
---	----

Z. Chaochen (Macau), M.R. Hansen (Oldenburg), P. Sestoft (Lyngby): Decidability and undecidability results for duration calculus	58
---	----

P. de Groote (Nancy): Defining λ -typed λ -calculi by axiomatizing the typing relation	69
---	----

T. Eiter, G. Gottlob (Vienna): The complexity of logic-based abduction	70
---	----

Session 2A: Efficient Algorithms

Chair: Peter Widmayer (Zürich)

T. Kloks (Utrecht), D. Kratsch (Jena): Treewidth of chordal bipartite graphs	80
---	----

U. Huckenbeck (Würzburg): On paths in networks with valves	90
S. Sunder, X. He (Buffalo): Scheduling interval ordered tasks in parallel	100
A. Pietracaprina, F.P. Preparata (Providence): An $O(\sqrt{n})$ -worst-case-time solution to the granularity problem	110
Session 2B: Parallel and Distributed Computation	
<i>Chair: Peter Starke (Berlin)</i>	
J. Desel, W. Reisig (Munich): The synthesis problem of Petri nets	120
E. Best (Hildesheim), R. Devillers (Brussels), J. Esparza (Hildesheim): General refinement and recursion operators for the Petri box calculus	130
M.P. Bonacina, J. Hsiang (Stony Brook): On fairness in distributed automated deduction	141
E.W. Mayr, R. Werchner (Frankfurt): Divide-and-conquer algorithms on the hypercube	153
Session 3A: Computational Complexity	
<i>Chair: Hans Bodlaender (Utrecht)</i>	
E. Allender (Princeton), J. Balcázar (Barcelona), N. Immerman (Amherst): A first-order isomorphism theorem	163
H. Buhrman (Amsterdam), A. Hoene (Berlin), L. Torenvliet (Amsterdam): Splittings, robustness and structure of complete sets	175
L.A. Hemachandra, S.K. Jha (Rochester): Defying upward and downward separation	185
A. Hoene, A. Nickelsen (Berlin): Counting, selecting, and sorting by query-bounded machines	196
Session 3B: Language Theory	
<i>Chair: Juhani Karhumäki (Turku)</i>	
M. Jantzen, H. Petersen (Hamburg): Cancellation in context-free languages: enrichment by reduction	206
J. Cassaigne (Paris): Counting overlap-free binary words	216
P. Narbel (Paris): The limit set of recognizable substitution systems	226
D. Krob (Rouen), P. Lalonde (Cambridge): Partially commutative Lyndon words	237

Friday, February 26, 1993

Invited Talk:

B. Monien, R. Feldmann, R. Klasing, R. Lüling (Paderborn): Parallel architectures: design and efficient use	247
--	-----

Session 4A: Computational Geometry

Chair: Emo Welzl (Berlin)

M. Formann (Berlin): Weighted closest pairs	270
S. Schuierer (Freiburg): Rectilinear path queries in a simple rectilinear polygon	282
A. Czumaj (Warsaw): Parallel algorithm for the matrix chain product and the optimal triangulation problems	294
A. Dessmark, A. Lingas (Lund), A. Maheshwari (Bombay): Multi-list ranking: complexity and applications	306
L. Kučera, K. Mehlhorn, B. Preis, E. Schwarzenacker (Saarbrücken): Exact algorithms for a geometric packing problem	317

Session 4B: Automata Theory

Chair: Alain Finkel (Cachan)

O. Maler (Rennes): A decomposition theorem for probabilistic transition systems	323
R. Montalbano (Palermo): Local automata and completion	333
K. Culik II (Columbia), S. Dube (Armidale): Efficient compression of wavelet coefficients for smooth and fractal-like data ..	343
O.II. Ibarra (Santa Barbara), T. Jiang (Hamilton), N. Tran (Santa Barbara), H. Wang (Huntsville): On the equivalence of two-way pushdown automata and counter machines over bounded languages	354
M. Cosnard, M. Garzon, P. Koiran (Lyon): Computability properties of low-dimensional dynamical systems	365

Session 5A: Computational Complexity*Chair: Maxime Crochemore (Paris)*

K.A. Abrahamson (Pullman), R.G. Downey (Wellington), M.R. Fellows (Victoria): Fixed-parameter intractability II	374
F.E. Fich, R. Impagliazzo, B. Kapron, V. King (Toronto), M. Kutylowski (Paderborn): Limits on the power of parallel random access machines with weak forms of write conflict resolution	386
S. Fenner (Portland), S. Homer (Boston), M. Ogiwara (Tokyo), A.L. Selman (Buffalo): On using oracles that compute values	398
R. Gengler (Bonn): Multicounter automata with sublogarithmic reversal bounds	408

Session 5B: Semantics and Logic of Programming Languages*Chair: Martin Wirsing (München)*

A.C. Uselton (Stony Brook): Structured operational semantics for concurrency and hierarchy	418
H. Hungar (Oldenburg): The complexity of verifying functional programs	428
P.J.A. Lentfert, S.D. Swierstra (Utrecht): Towards the formal design of self-stabilizing distributed algorithms	440
W. Penczek (Warsaw): Axiomatizations of temporal logics on trace systems	452

Session 6A: Computational Complexity*Chair: Dominique Gouyou-Beauchamps (Orsay)*

K. Lürwer-Brüggemeier, F. Meyer auf der Heide (Paderborn): Capabilities and complexity of computations with integer division	463
R. Niedermeier, P. Rossmanith (Munich): Extended locally definable acceptance types	473
S. Fenner (Portland), L. Fortnow, L. Li (Chicago): Gap-definability as a closure property	484

Session 6B: Automata Theory and Logic*Chair: Patrice Enjalbert (Caen)*

C. Choffrut, L. Guerra (Paris): On the logical definability of some rational trace languages	494
---	-----

R. Gilleron, S. Tison, M. Tommasi (Lille): Solving systems of set constraints using tree automata	505
D. Lugiez, J.L. Moysset (Nancy): Complement problems and tree automata in AC-like theories	515

Saturday, February 27, 1993

Invited Talk:

L. Babai (Budapest and Chicago): Transparent (holographic) proofs	525
--	-----

Session 7A: Circuit Complexity

Chair: Andrzej Salwicki (Pau)

Z.-L. Zhang, D.A. Mix Barrington (Amherst), J. Tarui (Warwick): Computing symmetric functions with AND/OR circuits and a single MAJORITY gate	535
A. Maciel, D. Thérien (Montreal): Threshold circuits for iterated multiplication: using AC^0 for free	545
M. Beaudry (Sherbrooke), P. McKenzie (Montreal), P. Péladeau (Paris): Circuits with monoidal gates	555
S. Istrail, D. Zivkovic (Middletown): A non-probabilistic switching lemma for the Sipser function	566
J. Gergov, C. Meinel (Trier): Frontiers of feasible and probabilistic feasible boolean manipulation with branching programs	576

Session 7B: ω -Automata

Chair: Aldo de Luca (Roma)

O. Maler (Rennes), L. Staiger (Siegen): On syntactic congruences for ω -languages	586
S. Varricchio (L'Aquila): A polynomial time algorithm for the equivalence of two morphisms on ω -regular languages	595
T. Wilke (Kiel): Locally threshold testable languages of infinite words	607
V. Diekert, A. Muscholl (Stuttgart): Deterministic asynchronous automata for infinite traces	617
L. Staiger (Siegen): Recursive automata on infinite words	629

Session 8A: Non-Classical Complexity*Chair: Jürgen Albert (Würzburg)***S. Sairam, J.S. Vitter, R. Tamassia (Providence):****A complexity theoretic approach to incremental computation 640****R. Reischuk, C. Schindelhauer (Darmstadt):****Precise average case complexity 650****P.B. Miltersen (Aarhus):****The bit probe complexity measure revisited 662****Session 8B: Learning Theory, Cryptography***Chair: Eli Shamir (Jerusalem)***G. Baliga, J. Case (Newark), S. Jain (Singapore):****Language learning with some negative information 672****S. Lange (Leipzig), T. Zeugmann (Darmstadt):****Language learning with a bounded number of mind changes 682****C. Blundo, A. De Santis, U. Vaccaro (Salerno):****Efficient sharing of many secrets 692****Systems****R. Drexler, W. Reif, G. Schellhorn, K. Stenzel, W. Stephan,****A. Wolpers (Karlsruhe):****The KIV system – a tool for formal program development 704****F. Höfting (Paderborn), E. Wanke (St. Augustin), A. Balmoşan,****C. Bergmann (Paderborn):****1st Grade – a system for implementation, testing and animation of
graph algorithms 706****T. Käufel (Karlsruhe):****The program verifier *Tatzelwurm* 708****S. Näher (Saarbrücken):****LEDA – a library of efficient data types and algorithms 710****Author Index 724**
