Preface	vii
Acknowledgments	ix
List of Tables	xv
List of Figures	xix
 CHAPTER 1	
Introduction and Definitions	1
1.1. Introduction and Objectives	1
1.2. Statistical Design	4
1.3. Types of Treatment	6
1.4. Treatment Designs in Category 4 for Intercropping Experiments	8
1.5. Some Statistical Problems Associated with Response Model Equations, Statistical Analyses, and Inferences	14
1.6. Some Concepts and Definitions	16
1.7. Literature Cited	17
 CHAPTER 2	
One Main Crop Grown with a Supplementary Crop	20
2.1. Objectives and Introduction	20
2.2. Some Examples of Main Crops Grown with a Supplementary Crop	21
2.3. Statistical Designs and Univariate Analyses of Main Crop Yields for Experiments on Main and Supplementary Crops	22
2.4. Some Additional Statistical Analyses for Yields of Main Crop Intercropped with a Supplementary Crop	30
2.5. Multivariate Analyses for a Main Crop Grown with Supplementary Crops and Grown as a Sole Crop	36
2.6. Summary and Discussion	36
2.7. Problems	37
2.8. Literature Cited	37
	 xi

CHAPTER 3

Both Crops Main Crops—Density Constant—

Analyses for Each Crop Separately	39
3.1. Objectives and Introduction	39
3.2. Treatment and Experiment Designs	40
3.3. Univariate Analyses on Observed Variables for Each of the Two Main Crops	42
3.4. Multivariate Analyses on a Vector of Observed Variables of One Crop	51
3.5. Summary and Discussion	64
3.6. Problems	65
3.7. Literature Cited	66

CHAPTER 4

Both Crops Main Crops—Density Constant—

Combined Crop Responses	67
4.1. Objectives and Introduction	67
4.2. Univariate Analyses on Functions of Combined Variables of Both Crops	69
4.3. Land Equivalent Ratio or Relative Yield Total	74
4.4. Multivariate Analysis on an Observation Vector of the Intercropping Systems	77
4.5. Effect of Varying Proportions on Created Functions	85
4.6. Summary and Discussion	87
4.7. Problems	90
4.8. Literature Cited	97
Appendix 4.1	97

CHAPTER 5

Both Crops of Major Interest with Varying Densities

5.1. Objectives and Introduction	99
5.2. Treatment Design and Statistical Analysis for Comparisons Among Density Combinations for Individual Crop Responses	100
5.3. Statistical Analyses for Responses from Both Crops for a Single Pair of Crops at Varying Densities	109
5.4. Models and Analyses for Monocultures and Mixtures of Two Crops over a Range of Densities	110
5.5. Analyses for c_1 Lines of Crop 1 and c_2 Lines of Crop 2	119
5.6. Summary and Discussion	121
5.7. Problems	122
5.8. Literature Cited	128
Appendix 5.1. Derivation of Parameter Estimates and Their Variances Using a Generalized Least Squares Method for the Linear Model of Section 5.4 (Prepared by Anila Wijesinha)	128
Appendix 5.2. Distribution of Estimators and Hypothesis Tests (Prepared by Anila Wijesinha)	131

CHAPTER 6

Monocultures and Their Pairwise Combinations when Responses Are Available for Each Member of the Combination	134
6.1. Introduction	134
6.2. Treatment Design	136
6.3. A Response Model and Some Statistical Analyses	138
6.4. Summary and Discussion	150
6.5. Problems	154
6.6. Literature Cited	156
Appendix 6.1	157
Appendix 6.2	158

CHAPTER 7

Monocultures and Their Pairwise Combinations when Separate Crop Responses Are Not Available	160
7.1. Introduction	160
7.2. Treatment Designs	161
7.3. Response Model Equations and Some Statistical Analyses	164
7.4. Response Models for a Crop Competition Experiment	170
7.5. Summary and Discussion	186
7.6. Problems	188
7.7. Literature Cited	190
Appendix 7.1. Derivation of Solutions for Response Model for Design 3	191
Appendix 7.2. Derivation of Solutions and Variances for Model 4, Example 7.5	192

CHAPTER 8

Spatial and Density Arrangements	196
8.1. Introduction	196
8.2. Spatial Arrangements—Density Constant	196
8.3. Spatial Arrangements—Density Variable	210
8.4. Statistical Analyses for the Arrangements in Section 8.3	220
8.5. Summary and Discussion	221
8.6. Problems	222
8.7. Literature Cited	223

CHAPTER 9

Some Analytical Variations for Intercropping Studies	225
9.1. Introduction	225
9.2. Replacement Series	225
9.3. Other Indices	231
9.4. Linear Programming	234
9.5. Summary and Discussion	239
9.6. Problems	240
9.7. Literature Cited	240

CHAPTER 10	
Experiment Designs for Intercropping Experiments	242
10.1. Introduction	242
10.2. Principles of Design of Experiments	247
10.3. Zero-Way Elimination of Heterogeneity	250
10.4. One-Way Elimination of Heterogeneity	252
10.5. Two-Way Elimination of Heterogeneity	262
10.6. Split Plot and Split Block Designs	272
10.7. More Complex Experiment Designs	279
10.8. Plot Technique	280
10.9. Stability Concepts and Parsimonious Experiment Design	281
10.10. Problems	289
10.11. Literature Cited	291
Index	295
