

Table of Contents

Preface	VII
----------------------	-----

I. Principles and Issues in Multisensor Fusion

Information Integration and Model Selection in Computer Vision	3
<i>Jan-Olof Eklundh</i>	
Principles and Techniques for Sensor Data Fusion	15
<i>James L. Crowley</i>	
The Issues, Analysis, and Interpretation of Multisensor Images	37
<i>J. K. Aggarwal and Chen-Chau Chu</i>	
Physically-Based Fusion of Visual Data over Space, Time, and Scale	63
<i>Demetri Terzopoulos</i>	
What Can Be Fused?	71
<i>Gerard T. McKee</i>	

II. Information Fusion for Navigation

Kalman Filter-Based Algorithms for Estimating Depth from Image Sequences	87
<i>Larry Matthies, Richard Szeliski, and Takeo Kanade</i>	
Robust Linear Rules for Nonlinear Systems	131
<i>Greg Hager</i>	
Geometric Sensor Fusion in Robotics (Abstract)	151
<i>Hugh F. Durrant -Whyte</i>	
Cooperation between 3D Motion Estimation and Token Trackers (Abstract)	153
<i>G. Toscani and R. Deriche</i>	
Three-Dimensional Fusion from a Monocular Sequence of Images	155
<i>J. L. Jezouin and N. Ayache</i>	

III. Multisensor Fusion for Object Recognition

Fusion of Range and Intensity Image Data for Recognition of 3D Object Surfaces	171
<i>Jianchi Wei, Paul Levi, and Ulrich Rembold</i>	
Integrating Driving Model and Depth for Identification of Partially Occluded 3D Models	195
<i>A. Sanfeliu, M. Añáños, and M. J. Dujó</i>	

Fusion of Color and Geometric Information	213
<i>Xavier F. Lebègue, David C. Baker, and J. K. Aggarwal</i>	
Evidence Fusion Using Constraint Satisfaction Networks	239
<i>Andrea Califano, Ruud M. Bolle, Rick Kjeldsen, and Russell W. Taylor</i>	
Multisensor Information Integration for Object Identification	255
<i>A. Mitiche, R. Laganière, and T. Henderson</i>	

IV. Computer Architectures for Multisensor Fusion

Distributing Inferential Activity for Synchronic and Diachronic Data Fusion	279
<i>V. Caglioti and M. Somalvico</i>	
Real-Time Perception Architectures: The SKIDS Project	293
<i>A. Ayoun, C. Bur, R. Havas, N. Touitou, and J.-M. Valade</i>	
Algorithms on a SIMD Processor Array	307
<i>A. van Inge, L. O. Hertzberger, A. G. Starreveld, and F. C. A. Groen</i>	
Shape and Curvature Data Fusion by Conductivity Analysis (Abstract)	323
<i>H. E. Stephanou and A. M. Erkmen</i>	
A Knowledge-Based Sensor Fusion Editor	325
<i>L. F. Pau, X. Xiao, and C. Westphal</i>	

V. Applications of Multisensor Fusion

Multisensor Change Detection for Surveillance Applications	345
<i>Rick Holben</i>	
Multisensor Techniques for Space Robotics	367
<i>P. Schenker, B. Wilcox, D. Gennery, and C. Anderson</i>	
Coordinated Use of Multiple Sensors in a Robotic Workcell	395
<i>A. C. Kak, S. A. Hutchinson, C. H. Chen, S. N. Gottschlich, and K. D. Smith</i>	
Neural Network Based Inspection of Machined Surfaces Using Multiple Sensors . . .	421
<i>Sheldon Gruber</i>	
Adaptive Visual/Auditory Fusion in the Target Localization System of the Barn Owl	439
<i>Clay D. Spence and John C. Pearson</i>	

Index of Key Terms	451
-------------------------------------	------------

Workshop Speakers	455
------------------------------------	------------
