

Table of Contents

<i>Section 1. Line and Area Algorithms</i>	17
<i>Invited Papers</i>	
R. BRONS, Catholic University of Nijmegen, The Netherlands "Theoretical and Linguistic Methods for Describing Straight Lines"	19
J.E. BRESENHAM, IBM, Research Triangle Park, USA "Run Length Slice Algorithm for Incremental Lines"	59
M.L.V. PITTEWAY, Brunel University, UK "The Relationship between Euclid's Algorithm and Run-Length Encoding"	105
A.R. FORREST, University of East Anglia, UK "Antialiasing in Practice"	113
<i>Submitted Papers</i>	
C.M.A. CASTLE and M.L.V. PITTEWAY, Brunel University, UK "An Application of Euclid's Algorithm to Drawing Straight Lines"	135
L. DORST, Delft University of Technology, The Netherlands "The Accuracy of the Digital Representation of a Straight Line"	141
A.C. GAY, IBM UK Laboratories Ltd, UK "Experience in Practical Implementation of Boundary-Defined Area Fill"	153
C.J. CARTLEDGE and G.H. WEEKS, University of Salford, UK "The Implementation of Fill Area for GKS"	161
A.P. SURANY, RCA Government Communications Systems, USA "A Simple Algorithm for Determining whether a Point Resides within an Arbitrarily Shaped Polygon"	187
 <i>Section 2. Arcs, Circles and Conics</i>	 195
<i>Invited Papers</i>	
J.E. BRESENHAM, IBM, Research Triangle Park, USA "Algorithms for Circular Arc Generation"	197
M.L.V. PITTEWAY, Brunel University, UK "Algorithms of Conic Generation"	219

Submitted Papers

T. HONG, Northwestern Polytechnical University, Xian, China "A High-Precision Digital Differential Analyzer for Circle Generation"	239
M.R. KAPPEL, The George Washington University, USA "An Ellipse-Drawing Algorithm for Raster Displays"	257
A.P. SURANY, RCA Government Communications Systems, USA "An Algorithm for Determining the Draw Start Point of a Hyperbola given the System Direction of Draw and the Coordinates of the Video Window"	281

<i>Section 3. Curves and Curve Drawing</i>	287
--	-----

Invited Papers

R.A. EARNSHAW, University of Leeds, UK, The George Washington University, USA "A Review of Curve Drawing Algorithms"	289
K.W. BRODLIE, University of Leicester, UK "Methods for Drawing Curves"	303

Submitted Paper

T.N.T. GOODMAN and K. UNSWORTH, University of Dundee, Scotland "Generation of β -Spline Curves using a Recurrence Relation"	325
--	-----

<i>Section 4. Character Generation and Display</i>	359
--	-----

Invited Papers

P. COUEIGNOUX, Data Business Vision Inc, USA "Character Generation and Display"	361
H. BROWN, University of Kent, UK "Font Information and Device-Independent Output"	397

<i>Section 5. Contouring and Surface Drawing</i>	409
--	-----

Invited Papers

M.A. SABIN, Fegs Ltd, UK "Contouring – the State of the Art"	411
P.A. DOWD, University of Leeds, UK "A Review of Geostatistical Techniques for Contouring"	483
P.A. DOWD, University of Leeds, UK "Algorithms for Three-Dimensional Interpolation between Planar Slices"	531

Submitted Papers

D. CATLEY, G.H. DAVISON, M.B. OKAN, C. WHITTLE and P. THORNTON, The British Ship Research Association, UK "GENSURF: A System for General Surface Definition and Manipulation"	555
--	-----

V. SKALA, Technical University, Czechoslovakia "An Interesting Modification to the Bresenham Algorithm for Hidden-Line Solution"	593
D.J. BOLLER, Royal Signals and Radar Establishment, UK "Efficient Hidden Line Removal for Surface Plots Utilising Raster Graphics"	603
<i>Section 6. Hardware Architectures and Algorithms</i>	617
<i>Invited papers</i>	
J.H. CLARK, Stanford University and Silicon Graphics Inc, USA "Graphics Software Standards and their Evolution with Hardware Algorithms"	619
A. GLASSNER and H. FUCHS, University of North Carolina at Chapel Hill, USA "Hardware Enhancements for Raster Graphics"	631
P.M. DEW, J. DODSWORTH and D.T. MORRIS, University of Leeds, UK "Systolic Array Architectures for High Performance CAD/CAM Workstations"	659
A.C. KILGOUR, University of Glasgow, Scotland "Parallel Architectures for High Performance Graphics Systems"	695
<i>Section 7. Computational Geometry and CAD</i>	705
<i>Invited Paper</i>	
A.R. FORREST, University of East Anglia, UK "Computational Geometry in Practice"	707
<i>Submitted Papers</i>	
D.T. MORRIS, University of Leeds, and P. QUARENDON, IBM UK Scientific Centre "An Algorithm for Direct Display of CSG Objects by Spatial Subdivision"	725
W.R. FRANKLIN, Rensselaer Polytechnic Institute, USA "Computational Geometry and Prolog"	737
P.A. KOPARKAR and S.P. MUDUR, Tata Institute of Fundamental Research, India "Subdivision Techniques for Processing Geometric Objects"	751
<i>Section 8. Theoretical Aspects and Models</i>	803
<i>Invited Papers</i>	
R.F. VOSS, IBM T.J. Watson Research Center, USA "Random Fractal Forgeries"	805
M.L.V. PITTEWAY, Brunel University, UK "The Algebra of Algorithms"	837
B.C. THOMPSON and J.V. TUCKER, University of Leeds, UK "Theoretical Considerations in Algorithm Design"	855
D.J. GROVER, British Technology Group, UK "Technology for the Protection of Graphics Algorithms"	879

R.D. PARSLOW, Brunel University, UK "Spatial Concepts in 3D"	883
<i>Submitted Papers</i>	
W.R. FRANKLIN and V. AKMAN, Rensselaer Polytechnic Institute, USA "Shortest Paths in 3-Space, Voronoi Diagrams with Barriers, and Related Complexity and Algebraic Issues"	895
M.H. OVERMARS, University of Utrecht, The Netherlands "Geometric Data Structures for Computer Graphics"	919
W.J.M. TEUNISSEN and J. VAN DEN BOS, University of Leiden, The Netherlands "A Model for Raster Graphics Language Primitives"	933
P.K. GHOSH and S.P. MUDUR, Tata Institute of Fundamental Research, India "Theoretical Framework for Shape Representation and Analysis"	949
<i>Section 9. Human-Computer Interface Issues</i>	995
<i>Invited Papers</i>	
R.A. GUEDJ, SIGRID s.a, France "Aspects of Human Machine Interface"	997
R.J. LANSDOWN, System Simulation Ltd, UK "Visual Perception and Computer Graphics"	1005
<i>Section 10. Computer Animation</i>	1027
<i>Invited Paper</i>	
R.J. LANSDOWN, System Simulation Ltd, UK "Object and Movement Description Techniques for Animation – An Informal Review"	1029
<i>Scientific Organising Committee</i>	1039
<i>Lecturers</i>	1039
<i>Participants</i>	1041
