

CONTENTS

The Safety-Critical Systems Club	ix
--	----

Part I: Experience from Around Europe

(Tuesday 9th February 1993)

Certification of Safety Critical Systems in Germany <i>G. Rabe</i>	3
Safety for European Space Agency Space Programmes <i>K.M. Wright</i>	17
The Swedish State Railways' Experience with n-Version Programmed Systems <i>J.F. Lindeberg</i>	36
Potential Difficulties in Managing Safety-critical Computing Projects: a Sociological View <i>M. Tierney</i>	43

Part II: Current Research

(Wednesday 10th February 1993)

Classification of Programmable Electronic Systems Operation for Testability <i>J.S. Parkinson</i>	67
Data Management in Clinical Laboratory Information Systems <i>R. Fink, S. Oppert, P. Collinson, G. Cooke, S. Dhanjal, H. Lesan, and R. Shaw</i>	84
Software Engineering Methods for Industrial Safety Related Applications <i>A. Canning</i>	96
Finite Element Safety Critical Software <i>A.J. Morris</i>	103
Using the Functional Programming Language Haskell to Specify Image Analysis Systems <i>I. Poole, D. Charleston, and B. Finnie</i>	133

Developing an Environment for Computer-based Automotive Suspension and Steering Systems <i>J. Robinson and S. Menani Merad</i>	150
The Practical Application of Formal Methods to High Integrity Systems – The SafeFM Project <i>P. Bradley, L. Shackleton, and V. Stavridou</i>	168
Tool Support for an Application-specific Language <i>R.E.B. Barnard</i>	177

Part III: Achieving and Evaluating Safety

(Thursday 11th February 1993)

SAM – A Tool to Support the Construction, Review and Evolution of Safety Arguments <i>J. Forder, C. Higgins, J. McDermid, and G. Storrs</i>	195
The Need for Evidence from Disparate Sources to Evaluate Software Safety <i>B. Littlewood</i>	217
A Modified Hazop Methodology for Safety Critical System Assessment <i>D.J. Burns and R.M. Pitblado</i>	232
Applying Security Techniques to Achieving Safety <i>D.F.C. Brewer</i>	246
New Developments in Quality Management as a Pre-requisite to Safety <i>D. Jackson</i>	257
An Industrial Approach to Integrity Level Determination and Safety Interlock System Implementation <i>V.J. Maggioli and W.H. Johnson</i>	270
Unification in Uncertainty? <i>B. Malcolm</i>	278
Author Index	286
