Preface

Free boundary problems

Antanovskii, L.K.:

| | |
|---|---|
| Analyticity of a free boundary in plane quasi-steady flow of a liquid form subject to variable surface tension..... | 1 |
|---|---|

Socolowsky, J.:

| | |
|--|----|
| On a free boundary problem for the stationary Navier-Stokes equations with a dynamic contact line..... | 17 |
|--|----|

Solonnikov, V.A., Tani, A.:

| | |
|--|----|
| Evolution free boundary problem for equations of motion of viscous compressible barotropic liquid..... | 30 |
|--|----|

Wolff, M.: Heat-conducting fluids with free surface in the case of slip-condition on the walls..... 56

Problems in unbounded domains

Borchers, W., Miyakawa, T.:

| | |
|---|----|
| On some coercive estimates for the Stokes problem in unbounded domains..... | 71 |
|---|----|

Chang, H.: The steady Navier-Stokes problem for low Reynolds number viscous jets into a half space. 85

Farwig, R., Sohr, H.:

| | |
|--|----|
| An approach to resolvent estimates for the Stokes equations in L^q -spaces. | 97 |
|--|----|

Galdi, G.P.: On the Oseen boundary-value problem in exterior domains..... 111

Salvi, R.: The exterior problem for the stationary Navier-Stokes equations: on the existence and regularity..... 132

Schonbek, M.E. :

| | |
|---|-----|
| Some results on the asymptotic behaviour of solutions to the Navier-Stokes equations. | 146 |
|---|-----|

Wiegner, M.: Approximation of weak solutions of the Navier-Stokes equations in unbounded domains. 161

Numerical methods

Rannacher, R.:

On Chorin's projection method for the incompressible Navier-Stokes equations..... 167

Süli, E., Ware, A. :

Analysis of the spectral Lagrange-Galerkin method for the Navier-Stokes equations...184

Varnhorn, W.:

A fractional step method for regularized Navier-Stokes equations.....196

Wetton, B.T.R.:

Finite difference vorticity methods..... 210

Statistical methods

Fursikov, A.V.:

The closure problem for the chain of the Friedman-Keller moment equations in the case of large Reynolds numbers..... 226

Inoue, A.:

A tiny step towards a theory of functional derivative equations - A strong solution of the space-time Hopf equation.....246

General qualitative theory

Grubb, G.: Initial value problems for the Navier-Stokes equations with Neumann conditions.....262

Mogilevskii, I.:

Estimates in $C^{2,1}$ for solution of a boundary value problem for the nonstationary Stokes system with a surface tension in boundary condition.....284

Schmitt, B.J., Wahl v.,W.:

Decomposition of solenoidal fields into poloidal fields, toroidal fields and the mean flow. Applications to the Boussinesq-equations.....291

Walsh, O.: Eddy solutions of the Navier-Stokes equations.....306

Xie, W.: On a three-norm inequality for the Stokes operator in nonsmooth domains..... 310

List of participants
