

Contents

1	Introduction — 1
2	Preliminaries — 36
2.1	Basic notation — 36
2.2	Results from geometric measure theory — 37
2.3	Results from harmonic analysis — 43
3	Layer potentials on UR domains — 60
4	Weighted Morrey spaces — 76
4.1	Definitions and basic examples — 76
4.2	Embedding results — 83
4.3	Extrapolation theory — 90
5	Singular integral operators on weighted Morrey spaces — 106
6	Weighted Block spaces — 131
6.1	Definitions and basic properties — 131
6.2	Basic examples — 153
6.3	Duality theory — 157
7	Singular integral operators on weighted Block spaces — 167
8	Weighted Morrey- and Block-based Sobolev spaces — 210
9	Layer potentials in weighted Morrey and Block spaces — 220
9.1	Layer potentials in weighted Morrey spaces — 220
9.2	Layer potentials in weighted Block spaces — 234
9.3	Invertibility of the single layer potential — 247
10	Generalized Banach function spaces — 258
10.1	Definitions and an extrapolation theorem — 258
10.2	Weighted vanishing Morrey spaces — 268
10.3	Morrey and Block spaces as generalized Banach function spaces — 294
11	Boundary value problems — 319
11.1	The Dirichlet problem on Morrey and Block spaces — 327
11.2	The Neumann problem on Morrey and Block spaces — 343
11.3	Regularity problems on Morrey and Block spaces — 355
11.4	The transmission problem in Morrey and Block spaces — 369

12 Boundary problems in domains with compact boundary — 386

Bibliography — 413

Index — 421

Symbol index — 423
