

CONTENTS

INTRODUCTION	xx
CONTRIBUTORS	xix
1- AUTOMATA THEORY	1
1 G.Y. VICHNIAC	
Cellular automata models of disorder and organization.	3
2 M. TCHUENTE	
Dynamics and Self organization in one-dimensional arrays.	21
3 F. ROBERT	
Basic results for the behaviour of discrete iterations.	33
4 Y. ROBERT, M. TCHUENTE	
On some dynamical properties of monotone networks.	49
5 H. HARTMAN, G.Y. VICHNIAC	
Inhomogeneous cellular automata (INCA).	53
6 J.P. ALLOUCHE	
The Ising model and the Rudin Shapiro sequence.	59
7 M. COSNARD, E. GOLES CHACC	
Dynamical properties of an automaton with memory.	63
8 D. PELLEGRIN	
Dynamics of random boolean networks.	67
9 J. DEMONGEOT, J. FRICOT	
Random fields and spatial renewal potentials	71
10 F. FOGELMAN SOULIE	
Lyapunov functions and their use in automata networks.	85
11 E. GOLES CHACC	
Positive automata networks.	101
12 J. MILNOR	
Directional entropies of cellular automaton-maps.	113
2- PHYSICAL DISORDERED SYSTEMS	117
13 M. MEZARD	
On the statistical physics of spin glasses.	119
14 B. LACOLLE	
Symbolic computation methods for some spin glasses problems.	133
15 R. MOSSERI, J.F. SADOE	
Order and defects in geometrically frustrated systems.	149

3- FORMAL NEURAL NETWORKS	153
16 J.J. HOPFIELD, D.W. TANK	
Collective computation with continuous variables.	155
17 P. PERETTO, J.J. NIEZ	
Collective properties of neural networks.	171
18 G. WEISBUCH, D. d'HUMIERES	
Determining the dynamic landscape of Hopfield networks.	187
19 L.D. JACKEL, R.E. HOWARD, H.P. GRAF, J. DENKER, B. STRAUGHN	
High resolution micro-fabrication and neural networks.	193
20 M.A. VIRASORO	
Ultrametricity, Hopfield model and all that.	197
21 M. KERSZBERG	
The emergence of hierarchical data structures in parallel computation.	205
22 J.A. ANDERSON	
Cognitive capabilities of a parallel system.	209
23 L. PERSONNAZ, I. GUYON, G. DREYFUS	
Neural network design for efficient information retrieval.	227
24 Y. LE CUN	
Learning process in an asymmetric threshold network.	233
25 D. d'HUMIERES	
Layered networks for unsupervised learning.	241
26 C. von der MALSBERG, E. BIENENSTOCK	
Statistical coding and short-term synaptic plasticity: a scheme for knowledge representation in the brain.	247
27 J. BUHMANN, K. SCHULTEN	
A physiological neural network as an autoassociative memory.	273
 4- COMBINATORIAL OPTIMIZATION	 281
28 S.A. SOLLA, G.B. SORKIN, S.R. WHITE	
Configuration space analysis for optimization problems.	283
29 E. BONOMI, J.L. LUTTON	
Statistical mechanics: a general approach to combinatorial optimization.	295
30 D. GEMAN, S. GEMAN	
Bayesian image analysis.	301
31 B. GIDAS	
The Langevin equation as a global minimization algorithm.	321
32 I.G. ROSENBERG	
Spin glass and pseudo boolean optimization.	327
33 Y.L. KERGOSIEN	
Local versus global minima, hysteresis, multiple meanings.	333

5- MODELS OF BIOLOGICAL ORGANIZATION	337
34 S.A. KAUFFMAN	
Boolean systems, adaptive automata, evolution.	339
35 J. COSTE , M. HENON	
Invariant cycles in the random mapping of n integers onto themselves. Comparison with Kauffman binary network.	361
36 Y. BOULIGAND	
Fibroblasts, morphogenesis and cellular automata.	367
37 A.J. NOEST	
Percolation and frustration in neural networks.	381
38 M. SCHATZMAN	
Self organizing mathematical models: non linear evolution equations with a convolution term.	385
39 H. AXELRAD, C. BERNARD, B. GIRAUD, M.E. MARC	
Recurrent collateral inhibition simulated in a simple neuronal automata assembly.	389
40 G. CHAUVET	
Cerebellum models: an interpretation of some features.	399
INDEX	403
