|--|---|
| Introduction. By M. Stockburger and A. Laubereau | 1 |
|--|---|

Part I Techniques and Instrumentation

| | |
|---|----|
| Energy-Partitioning Measurements in O(1D_2) Reactions by Time-Resolved Fourier Transform Infrared Emission Spectroscopy By P.M. Aker and J.J. Sloan (With 2 Figures) | 6 |
| High-Resolution Fourier Transform Raman Spectroscopy with Ultrashort Laser Pulses By H. Graener and A. Laubereau (With 2 Figures) | 11 |
| Picosecond Transient Raman Spectroscopy Using the High Repetition Rate, Amplified, Synchronously Pumped Dye Laser By T.L. Gustafson, D.A. Chernoff, J.F. Palmer, and D.M. Roberts (With 3 Figures) | 15 |
| Pulsed Multichannel Raman Technique By A. Deffontaine, M. Delhayé, and M. Bridoux (With 3 Figures) | 20 |
| Fluorescence Rejection in Raman Spectroscopy. By N. Overall, R.W. Jackson, J. Howard, and K. Hutchinson (With 5 Figures) | 25 |
| Measurement of the Third-Order Electronic Susceptibility of GaP by Picosecond CARS Spectroscopy By J. Kuhl, B.K. Rhee, and W.E. Bron (With 3 Figures) | 30 |
| Polarization Effects of Time-Resolved Coherent Raman Scattering in Liquids. By N. Kohles and A. Laubereau (With 3 Figures) | 35 |

Part II Vibrational Dynamics of Molecules

| | |
|---|----|
| Ultrafast Intramolecular Vibrational Redistribution and Intermolecular Energy Dissipation of Polyatomic Molecules in Solution. By W. Kaiser and A. Seilmeier (With 4 Figures) | 42 |
| Time-Resolved Observation of Vibrationally Highly Excited Polyatomic Molecules. By H. Hippler (With 8 Figures) | 45 |

| | |
|---|----|
| Time-Resolved Raman Spectroscopy of Highly Excited Vibrational States of Polyatomic Molecules By V.S. Letokhov and E.A. Ryabov (With 4 Figures) | 53 |
| Transient Vibrational Excitation of Dye Molecules in a Solid Polymer Matrix. By A. Seilmeier and W. Kaiser (With 2 Figures) | 59 |
| Ultrafast Vibronic Dynamics of Dye Molecules Studied by the Induced Grating Method. By P. Troeger, C.-H. Liu, and A. Laubereau (With 4 Figures) | 62 |
| Vibrational Fluorescence from Matrix-Isolated CO and NO Pumped with a Color Center Laser. By J.P. Galaup, J.Y. Harbec, J.J. Zondy, R. Charneau, and H. Dubost (With 3 Figures) | 67 |
| Vibrational Energy Decay of Surface Adsorbates. By E.J. Heilweil, M.P. Casassa, R.R. Cavanagh, and J.C. Stephenson | 71 |
| Vibrational Energy Relaxation of Hydrogen Chloride in Liquid and Solid Xenon. By J. Chesnoy (With 3 Figures) | 76 |
| Ultrafast IR Spectroscopy Studying Nearly-Free Induction Decay By H.-J. Hartmann, K. Bratengeier, and A. Laubereau (With 4 Figures) | 81 |
| Dephasing in Liquid N ₂ and in Binary Mixtures of N ₂ with Liquid Argon. By D. Brandt, H.J. van Elburg, B.L. van Hensbergen, and J.D.W. van Voorst (With 4 Figures) | 86 |
| High Pressure Brillouin Scattering on Liquid Carbon Tetrachloride and Benzene. By A. Asenbaum (With 3 Figures) | 90 |

Part III **Vibrational Dynamics in Solids**

| | |
|---|-----|
| Vibrational Energy Relaxation in Solid Benzene By R.M. Hochstrasser (With 3 Figures) | 96 |
| Time-Resolved Raman Spectroscopy of Laser-Heated Semiconductors. By D. von der Linde (With 4 Figures) | 100 |
| Picosecond Vibrational Dynamics of Hydrogen Bonded Solids: Phonons and Optical Damage. By J.R. Hill, T.J. Kosic, E.L. Chronister, and D.D. Dlott (With 6 Figures) | 107 |
| Time-Resolved Two-Color Optical Coherence Experiments By K. Duppen, D.P. Weitekamp, and D.A. Wiersma (With 6 Figures) | 112 |
| High Sensitivity Time-Resolved Study of the Coherence and Parametric Instabilities of Two-Phonon States By G. Gale, F. Vallée, and C. Flytzanis (With 3 Figures) | 117 |

| | |
|--|-----|
| Two-Phonon Bound States in Molecular Crystals By F. Bogani (With 6 Figures) | 124 |
|--|-----|

| | |
|----------------|--------------------------------|
| Part IV | Photochemical Reactions |
|----------------|--------------------------------|

| | |
|---|-----|
| Resonance Raman Studies of Transient Intermediates in Photoreactions of Anthraquinone and Flavone Species By J.N. Moore, D. Phillips, P.M. Killough, and R.E. Hester (With 5 Figures) | 132 |
| Resonance Raman Spectra and Assignments of Deuterated Stilbene Anion and Cation Radicals By C. Richter and W. Hub (With 1 Figure) | 137 |
| Application of Time-Resolved Resonance Raman Spectroscopy to Some Organic Photochemical Processes in Solution By H. Hamaguchi (With 5 Figures) | 142 |
| Time-Resolved Resonance Raman Studies of Photoenolization of ortho-Alkyl Substituted Benzophenones. By H. Takahashi, H. Ohkusa, H. Isaka, S. Suzuki, and S. Hirukawa (With 3 Figures) ... | 147 |
| Resonance CARS Spectra of Metastable Merocyanines Produced by UV-Photolysis of Spirooxazines By U. Klüter, W. Hub, and S. Schneider (With 3 Figures) | 152 |
| Photoisomerization of Stilbene and 1,4-Diphenylbutadiene in Compressed Gases and Liquids – Density-Dependent Solvent Shift and Transport Contributions. By G. Maneke, J. Schroeder, J. Troe, and F. Voß (With 2 Figures) | 156 |

| | |
|---------------|--------------------------|
| Part V | Transient Species |
|---------------|--------------------------|

| | |
|---|-----|
| Advantages of Resonance CARS for the Study of Short-Living Radicals and Photoisomers. By A. Lau, W. Werncke, M. Pfeiffer, H.-J. Weigmann, and J.T. Tschö (With 3 Figures) | 162 |
| Resonance CARS Study of α,ω -Diphenylpolyenes in the Electronic Excited States. By A. Kasama, M. Taya, T. Kamisuki, Y. Adachi, and S. Maeda (With 4 Figures) | 166 |
| Ultraviolet Resonance Raman Studies of Electronic Excitations By B.S. Hudson (With 2 Figures) | 170 |
| Excited States of Polyenes Studied by Time-Resolved Resonance Raman Spectroscopy. By F.W. Langkilde, N.-H. Jensen, and R. Wilbrandt (With 1 Figure) | 175 |
| Resonance Raman Spectra of the Triplet States and Anion Radicals of Trans-Nitrostilbenes. By C. Richter and W. Hub (With 2 Figures) | 179 |

| | |
|--|-----|
| Resonance Raman Spectroscopy of Transient Species in the Pulse Radiolytic Oxidation of Aqueous Aniline By G.N.R. Tripathi, R.H. Schuler, and L. Qin (With 4 Figures) | 183 |
| Intramolecular Kinetics of Vibrationally Excited Singlet and Triplet States in Some Cyclic Hydrocarbons By H.G. Löhmansröben and K. Luther (With 2 Figures) | 189 |
| In Situ Raman Studies of Homopolymerisation and Copolymerisation Reactions. By H.J. Bowley, I.S. Biggin, and D.L. Gerrard | 194 |
| Time-Resolved Spontaneous Raman Scattering by Chrysene in S ₁ and Incoherent CARS for T ₂ Measurement By T. Kobayashi, S. Koshihara, and T. Hattori (With 5 Figures) | 196 |

Part VI **Biological Systems**

| | |
|---|-----|
| How Protein Structure Controls Oxygen Dissociation in Haemoglobin: Implications of Picosecond Transient Raman Studies By J.M. Friedman (With 2 Figures) | 204 |
| Resonance Raman Spectra of Reaction Intermediates of Heme Enzymes. By T. Kitagawa, S. Hashimoto, and T. Ogura (With 4 Figures) | 211 |
| Heme-Linked Ionization of Horseradish Peroxidase Compound II Monitored by Changes in the Fe(IV)=O Resonance Raman Frequency. By J. Turner, A.J. Sitter, and C.M. Reczek | 216 |
| Resonance Raman Studies of Transient States in Bacterial Reaction Centers. By B. Robert, W. Szponarski, and M. Lutz (With 2 Figures) | 220 |
| Energy-Transfer Between Dimeric Chlorophyll <i>a</i> and All-Trans β -Carotene <i>in vitro</i> as Resolved by Fluorescence Photoquenching By N.E. Binnie, L.V. Haley, and J.A. Koningstein (With 6 Figures) .. | 225 |
| Using Time-Resolved Resonance Raman Spectroscopy to Map the Reaction Pathway for Enzyme-Substrate Transients By P.R. Carey (With 3 Figures) | 233 |
| UV, IR, and Raman Spectroscopic Tracings of the B \rightleftharpoons Z Transitions of Poly[d(GC)].poly[d(GC)]. By H. Takashima, S. Tate, M. Nakanishi, Y. Nishimura, and M. Tsuboi (With 2 Figures) | 237 |
| Kinetic Studies on Bacteriorhodopsin by Resonance Raman Spectroscopy. By M. Stockburger, Th. Alshuth, and P. Hildebrandt (With 7 Figures) | 240 |
| Resonance Raman Study on the Role of Water in Bacteriorhodopsin By P. Hildebrandt, A. Hagemeyer, and M. Stockburger (With 4 Figures) | 246 |

| | |
|--|-----|
| Picosecond and Nanosecond Resonance Raman Evidence for Structural Relaxation in Bacteriorhodopsin's Primary Photoproduct By D. Stern and R. Mathies (With 3 Figures) | 250 |
| Picosecond Time-Resolved Resonance Raman Spectroscopy of Bacteriorhodopsin Intermediates By G.H. Atkinson, I. Grieger, and G. Rumbles (With 1 Figure) | 255 |
| Evidence from FTIR-Measurements for a Separation of the Protonated Schiff Base from the Counterion into a Less Polar Environment. By K. Gerwert, F. Siebert, J.A. Pardoen, C. Winkel, and J. Lugtenburg (With 4 Figures) | 259 |
| Time-Resolved Infrared Spectroscopy Applied to Photobiological Systems. By K. Gerwert, R. Rodriguez-Gonzalez, and F. Siebert (With 6 Figures) | 263 |
| <hr/> Part VII Theoretical Aspects <hr/> | |
| Electrontransfer and Vibrational Relaxation in Bridged Donor-Acceptor Systems. By S.F. Fischer and I. Nußbaum (With 1 Figure) | 270 |
| Theory of Luminescence in the Three-Level System with Extension to the Multistate Problem by Transform Methods By A.C. Albrecht (With 3 Figures) | 274 |
| Application of Time-Dependent Raman Theory to the Analysis of Inorganic Photosystems By D.E. Morris and W.H. Woodruff (With 1 Figure) | 280 |
| Time-Dependent Quantum Dynamics of the Picosecond Vibrational IR-Excitation of Polyatomic Molecules By M. Quack, J. Stohner, and E. Sutcliffe (With 3 Figures) | 284 |
| Decay Law in Conformational Relaxation. By A.A. Villaeys | 289 |
| Stochastic Theory of Vibrational Dephasing and Transient CARS Lineshapes. By R.F. Loring and S. Mukamel (With 3 Figures) | 293 |
| On the Lineshape of Molecular Aggregate Spectra By P.O.J. Scherer and S.F. Fischer (With 2 Figures) | 297 |
| Index of Contributors | 301 |
