

Table of Contents

1	Introduction	1
1.1	Augmenting Research on Multi-layered City Dynamics	1
1.2	Pervasive Urban Monitoring – The Technical View	3
1.3	Closed Monolithic Systems Limit Monitoring Capacities	3
1.4	Standardisation Enables Open Measurement Infrastructures	4
1.5	Summary and Approach	5
2	Thesis Objectives	7
2.1	Research Question	7
2.2	Goals for the Live Geography Infrastructure	8
2.3	Goals for the Implementation of the Live Geography Approach	9
2.4	Non-Goals	10
3	Thematic Context of the Thesis	13
3.1	Live Geography – Disambiguation	13
3.2	The “City” as a Functional Context	15
3.3	Particular Challenges of Urban Monitoring	17
3.3.1	Technological and Technical Issues	17
3.3.2	Various Stakeholders	17
3.3.3	Impact and Privacy Implications	19
3.3.4	The Value of Sensing Collective Behaviour vs. Privacy Implications	19
3.4	Sensor Web Technology	20
3.5	Why Standards?	22
3.5.1	Standardisation Initiatives	22
3.5.2	Benefits Arising from Usage of Standards	23
3.6	Policy-frameworks for the Integration of Real-time Sensor Information	24
3.7	Use Cases and Application Scenarios	25
3.7.1	Use Cases	25
3.7.2	Application Scenarios	26
4	Related Work	33
4.1	Sensor Networks and GIS	33
4.2	Open Sensor Data Integration Architectures	33
4.3	Empirical Aspects – A State of the Art Review	34
4.3.1	Limitations	34
4.3.2	Technical Deliberations	35
4.3.3	External Dependencies	35
4.3.4	Security Aspects	36
5	Methods	41
5.1	Urban Geo-Sensor Networks	41
5.1.1	Literature Review	41
5.1.2	Sensor Web Characteristics	42
5.2	Real-time Data Integration and Sensor Fusion for GIS	46
5.2.1	Literature Review	46
5.2.2	Shortcomings of Previous Approaches	47
5.3	Web-based Geospatial Data Analysis	49
5.3.1	The OGC WPS Standard	49

5.3.2	Literature Review – WPS Implementations.....	49
5.3.3	WPS Profiles.....	50
5.3.4	Asynchronous processing.....	50
6	“Live Geography” Approach	53
6.1	Background.....	53
6.2	Standardised System Architecture.....	54
6.2.1	Web Service Standards.....	56
6.2.2	Sensor Web Enablement Initiative.....	57
6.2.3	Other Relevant OGC Standards.....	63
6.3	Geo-workflow Disambiguation – Sensor Fusion, Data Fusion and Geo-processing.....	68
6.3.1	Background – Literature.....	68
6.3.2	Data Fusion Definitions.....	70
6.3.3	Geo-processing Definitions.....	71
6.4	Geo-sensor Webs.....	75
6.5	Real-time Data Integration – Sensor Fusion.....	75
6.6	Location-aware Event-based Alerting.....	77
6.7	Real-time Geo-processing Using Server-based Analysis Technology.....	80
7	Implementation of the Live Geography Approach.....	83
7.1	Embedded Sensing Device.....	83
7.1.1	Sensor Pod Hardware.....	85
7.1.2	Software Infrastructure.....	87
7.1.3	Embedded Database.....	90
7.2	Standardised Service Infrastructure.....	93
7.2.1	Embedded OGC Sensor Observation Service.....	93
7.2.2	Embedded OGC Sensor Alert Service.....	94
7.3	Real-time Data Integration – Sensor Fusion.....	95
7.3.1	Technical Realisation.....	95
7.3.2	Functionality.....	96
7.3.3	Innovation and Benefits.....	99
7.4	CEP and Location-aware Complex Event Processing and Alerting.....	99
7.4.1	CEP Engines.....	100
7.4.2	Geographical Code Libraries.....	101
7.4.3	Technical Realisation.....	101
7.5	Live Geospatial Data Analysis.....	103
7.5.1	Desktop GIS Processing of Sensor Information.....	104
7.5.2	Time-series Analysis.....	105
7.5.3	Web-based Geospatial Processing.....	105
8	Results	109
8.1	Results Summary.....	110
8.2	The Urban Environment as the Functional Context.....	110
8.3	Live Geography Approach.....	111
8.4	Benefits of the Developed Approach.....	112
8.5	Implementation of the Live Geography Approach.....	113
8.5.1	Embedded Geo-Sensing Device.....	113
8.5.2	Standardised Service Infrastructure.....	114
8.5.3	Real-time Data Integration – Sensor Fusion.....	114
8.5.4	Complex Event Processing and Alerting.....	115
8.5.5	Web-based Data Analysis.....	115

8.6	Live Geography Portability – Implemented End Applications.....	115
8.6.1	Time Series Visualisation of Urban Air Quality	116
8.6.2	Live Pollutant Monitoring for Public Health	117
8.6.3	Fine-grained Air Temperature Variations	119
8.6.4	Monitoring of Environmental Conditions in a National Park	120
8.6.5	Ubiquitous Biometric Parameter Surveillance	121
8.6.6	Real-time Air Quality Assessment.....	122
8.6.7	Rapid Detection of Radiation Sources	123
9	Discussion and Conclusion	127
9.1	Future Outlook – Complete Live Geography Infrastructure.....	127
9.1.1	Further Research Directions	128
9.1.2	Fully-fledged Live Geography Infrastructure	129
9.2	Effects on the Urban Environment	131
9.3	Changing the Perception of the City.....	134
9.4	Future Research Directions	135
9.5	Conclusion.....	139
	References.....	143
	List of Abbreviations	149
	List of Figures	153
	List of Tables	155
	Annex I – XML Structures.....	157
