Contents

I Propagation and Generation of Plasma Waves

1 Basic Equations 3
- 1.1 Introduction . . . 3
- 1.2 Electromagnetic Equations . . . 4
- 1.3 Fluid Equations . . . 6
- 1.4 The Kinetic Equation . . . 7
- 1.5 Poynting's Theorem . . . 11
- 1.6 Harmonic Oscillations . . . 11
- 1.7 The Wave Equation . . . 13
- 1.8 Summary . . . 13

2 Waves in a Uniform Cold Magnetoplasma – 1. Infinite Plane Waves
- 2.1 Introduction . . . 15
- 2.2 Characteristic Frequencies and Speeds . . . 16
- 2.3 Linearization of the Equation of Motion . . . 18
- 2.4 Constitutive Relations . . . 18
- 2.5 Plane Waves . . . 24
- 2.6 Polarization . . . 30
- 2.7 Properties of the Refractive Index . . . 34
- 2.8 Energy Flux in a Plane Wave . . . 40
- 2.9 Summary . . . 41

3 Waves in a Uniform Cold Magnetoplasma – 2. Rays and Wave Packets
- 3.1 Introduction . . . 43
- 3.2 Wave Packets and Rays . . . 43
- 3.3 Classification of Waves in a Cold Plasma . . . 53
- 3.4 Refractive Index and Dispersion Relation . . . 66
- 3.5 Summary . . . 72

4 Propagation of Electromagnetic Waves in a Non-Uniform Cold Magnetoplasma
- 4.1 Introduction . . . 74
- 4.2 Plane Stratified Media . . . 74
- 4.3 Ray Tracing in General Media . . . 79
- 4.4 Summary . . . 81

Bibliografische Informationen
http://d-nb.info/930430611

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

5 Waves in a Uniform Warm Magnetoplasma
5.1 Introduction 83
5.2 Characteristic Speeds 84
5.3 The Constitutive Relation 84
5.4 Dispersion Relations and Refractive Index 86
5.5 Polarization 97
5.6 Summary 99

6 Waves in a Hot Plasma – 1. General Features
6.1 Introduction 101
6.2 Unperturbed Particle Orbits 101
6.3 Electrostatic Approximation 102
6.4 Propagation Parallel to the Magnetic Field 108
6.5 Growth and Decay of Waves 112
6.6 The Equilibrium Distribution Function – The Maxwellian 114
6.7 Non-Equilibrium Distribution Functions 115
6.8 Summary 121

7 Waves in a Hot Plasma – 2. Equilibrium and Non-Equilibrium Distributions
7.1 Introduction 123
7.2 Waves in Plasmas in Thermal Equilibrium 124
7.3 Longitudinal Waves Excited by a Particle Beam 130
7.4 Electrostatic Waves Associated with Anisotropic Distributions 135
7.5 Summary 150

8 The Effect of Wave Fields on Energetic Particles
8.1 Introduction 151
8.2 Particle Resonance 152
8.3 Trajectories of Resonant Particles in Velocity Space . . . 156
8.4 Diffusion in Velocity Space 169
8.5 Some Non-Linear Effects 176
8.6 Waves Resonant with a Test Particle 180
8.7 Summary 185

II Applications of the Theory to Plasma Wave Observations

9 Magnetospheric Plasmas 189
9.1 Introduction 189
9.2 Structure of the Earth's Magnetosphere 189
9.3 Cold Plasma Populations in the Magnetosphere 195

9.4 Hot Plasma Populations 198
9.5 Waves in the Magnetosphere 202
9.6 Summary 207

10 Waves in the Plasmasphere – 1. Whistler Observations and Basic Theory
10.1 Introduction 208
10.2 Properties of the Whistler Mode 208
10.3 Observations of Whistlers 213
10.4 Elementary Theory of Whistlers 216
10.5 Use of Whistlers as a Magnetospheric Probe 221
10.6 Summary 222

11 Waves in the Plasmasphere – 2. Details of Whistler Propagation
11.1 Introduction 223
11.2 Lightning as a Source of Electromagnetic Radiation . . . 223
11.3 Propagation in the Earth-Ionosphere Waveguide 223
11.4 Transmission of Whistlers Through the Ionosphere 226
11.5 Propagation of Unducted Whistlers 227
11.6 Propagation in Ducts 233
11.7 Summary 247

12 Waves in the Plasmasphere – 3. Ion Cyclotron Whistlers
12.1 Introduction 249
12.2 Observations 249
12.3 Ion Cyclotron Whistler Propagation in a Uniform Medium 251
12.4 Nature of Ion Cyclotron Whistler Generation 255
12.5 The Effect of Collisions on Coupling 260
12.6 Summary 264

13 Waves in the Plasmasphere – 4. Doppler Shifted Cyclotron Resonance of Electrons with Whistlers
13.1 Introduction 265
13.2 Some Relevant Observations 266
13.3 Whistler Wave–Particle Interaction in a Uniform Medium 268
13.4 Whistler-Mode Noise in a Non-Uniform Medium 277
13.5 Whistler-Mode Signals Generated by Energetic Particles . 283
13.6 Summary 287

14 Waves in the Auroral Region 289
14.1 Introduction 289
14.2 Observations 289
14.3 Propagation of Whistler Mode Hiss 293

14.4 Z-Mode Radiation 294
14.5 Terrestrial Myriametric Radiation 304
14.6 Auroral Kilometric Radiation 307
14.7 Summary 315

15 Some Final Words
15.1 Introduction 317
15.2 Man-Made Plasma Waves 317
15.3 Ultra Low Frequency Pulsations 318
15.4 Waves in the Magnetotail, Magnetosheath and Solar Wind 318
15.5 Future Work 318

A The Essence of Cartesian Tensors 321

B Some Mathematical Results 323
B.1 Properties of Bessel Functions and Related Results 323
B.2 The Plasma Dispersion Function 327

C Properties of the Earth's Dipole Field 330

D Definition of Symbols 331

Bibliography 335

Subject Index 343
