

Table of Contents

Preface	IX
 Molecular aspects of cell transformation and growth	
The impact of molecular genetics on cancer research <i>R. Dulbecco</i>	3
Identification of a chimeric gene frequently activated in human thyroid papillary carcinomas <i>G. Vecchio, A. Fusco, M. Grieco, M. Santoro, M.T. Berlingieri, M.A. Pierotti and G. Della Porta</i>	15
The role of tumor suppressor genes in human cancer progression <i>W.K. Cavenee</i>	25
The central role of the IGF-1 receptor in the control of cellular proliferation <i>R. Baserga, B.A. Jameson and E. Surmacz</i>	37
Loss of TGF- β expression is a critical component of malignant progression in multistage carcinogenesis of the mouse epidermis <i>A.B. Glick, T. Tennenbaum, H. Hennings and S.H. Yuspa</i>	49
Structure, biosynthesis and biochemical properties of the HGF/SF receptor <i>G. Gaudino, L. Gandino, M.F. Di Renzo, S. Giordano, A. Graziani, L. Naldini, C. Ponzetto, M. Prat, L.M. Sena and P.M. Comoglio</i>	59
Molecular characterization of Trop-2, a cell surface molecule highly expressed by human carcinomas – Cloning of the gene encoding Trop-2 <i>S. Alberti, M. Stella, R. Dell' Arciprete, C. Bucci, A. Naglieri, M. Nutini, E. Riva and M. Fornaro</i>	75
Loss of heterozygosity and distribution of alleles at the VNTR region of the HRAS gene in ovarian carcinoma <i>M. Genuardi, P. Tanci, S. Greggì, G. Scambia, R. Cento and G. Neri</i>	83
Mg ²⁺ in the regulation of ascites tumor cell energy metabolism <i>D. Bossi, F.I. Wolf, G. Calviello, L. Lauro, G. Curigliano, A. Romito and A. Cittadini</i>	89
Effect of quercetin on cell proliferation and heat shock protein synthesis induction in K562 erythroleukemia <i>G. Elia and M.G. Santoro</i>	95
Regulation of MnSOD expression by manganese in tumors <i>S. Borrello, M.E. De Leo and T. Galeotti</i>	103

Membrane receptors and signal transduction

An efficient expression cDNA cloning approach to screen human tumors for oncogenes	111
<i>A.M.-L. Chan and S.A. Aaronson</i>	
The roles of specific isoforms of protein kinase C (PKC) in signal transduction, growth control and diacylglycerol metabolism	123
<i>I.B. Weinstein, S.N. Guadagno, Ch. Borner, A. Cacace, S. Kahn and K. O'Driscoll</i>	
Regulation of protein kinase C	129
<i>P.J. Parker, A. Carozzi, L. Dekker, R.S. Ginger, N. Goode, S. Kiley and A.R. Olivier</i>	
Potential roles of p21ras in growth factor signalling – An overview	137
<i>C.J. Marshall, L.R. Howe, S.J. Leever, H.F. Paterson and S.G. Thorneycroft</i>	
p21-ras and p56-lck mediate the two major T-cell antigen receptor signal transduction pathways	141
<i>C.T. Baldari, A. Heguy and J.L. Telford</i>	
Further characterization of CDC25 ^{Mm} , a mammalian activator of p21ras	147
<i>E. Sturani, R. Zippel, E. Martegani, M. Vanoni, C. Ferrari, P. Coccetti, and L. Alberghina</i>	
MAP kinase cascade and the control of cell proliferation	153
<i>G. Pagès, A. Brunet, J-C. Chambard, G. L'Allemain, P. Lenormand and J. Pouyssegur</i>	
Accumulation and mitogenic activity of lysophosphatidylinositol in k-ras-transformed thyroid cells	165
<i>M. Falasca and D. Corda</i>	
Activities involved in the modulation of the G protein endogenous ADP-ribosylation in normal and K-ras-transformed thyroid cells	173
<i>M. Di Girolamo, T. Cacciamani, M. Pallas and D. Corda</i>	
The regulation of TNF- α receptors in human osteosarcoma cells	181
<i>D. Boscoboinik, T. Galeotti and A. Azzi</i>	
Chronic exposure to the tumor promoter TPA mimics differentiating effects of serum in primary cultures of cerebellar granules	191
<i>M.L. Eboli, M.T. Ciotti, D. Mercanti, A.M. Salvatore and L. Castellani</i>	
Transcriptional control by nuclear receptors	197
<i>G.A. Puca, N. Medici, C. Abbondanza, V. Nigro and A.M. Molinari</i>	

Models for new therapeutical strategies

Therapeutic opportunities involving cellular oncogenes	213
<i>B.E. Huber</i>	
Molecular analysis of fine needle aspiration cytologic specimens from suspicious thyroid nodules	223
<i>S. Sciacchitano and A. Pontecorvi</i>	

Tumor-associated macrophages: Cytokine regulation and therapeutic implications	229
<i>A. Mantovani, B. Bottazzi, S. Sozzani, G. Peri, P. Allavena, C. Garlanda, A. Vecchi and F. Colotta</i>	
Various cytokines (IL-2, IL-4, IFN-gamma) show different efficiency in inducing tumor rejection	235
<i>M. Brunetti, P. Musiani, A. Modica, G. Forni, P. Nanni, F. Pericle, G. Ferrara and A. Modesti</i>	
Adoptive immunotherapy of melanoma with interleukin-2 and lymphocytes	243
<i>G. Parmiani, F. Arienti, F. Belli, M. Santinami, M. Vaglini and N. Cascinelli</i>	
GM-CSF augments the IL-4 induced cytotoxic activity of human peripheral blood mononuclear cells in the presence of the mouse monoclonal antibody 17-1A	253
<i>E. Reali, H. Mellstedt, S. Traniello and G. Masucci</i>	
Autologous bone marrow transplantation with peripheral stem cells <i>in vivo</i> expanded by chemotherapy and G-CSF	261
<i>G. Leone, S. Sica, L. Teofili, S. Rutella, S. Iovino, L. Pierelli, G. Menichella, S. Storti and V. De Stefano</i>	
The regulatory subunit of cAMP-dependent protein kinase as a target for cancer diagnosis and therapy	267
<i>Y.S. Cho-Chung, A. Cereseto, A. Budillon, T. Clair and Ch. Rohlf</i>	
Type I isoform of PKA is involved in the control of cell proliferation and oncogene transformation of human mammary epithelial cells: Therapeutic implications	279
<i>G. Tortora, F. Ciardiello, S. Pepe, C. Bianco, G. Baldassarre, A. Ruggiero, A. Budillon, Y.S. Cho-Chung and A.R. Bianco</i>	
Modulation of the cell response to hyperthermia by membrane perturbing agents	285
<i>S. Meschini, A. Calcabrini, P. Matarrese, L. Marcocci, P. Pietrangeli, A. Candiloro and W. Malorni</i>	
MRS studies on experimental tumours treated with TNF	291
<i>G. Carpinelli, R. Canese, E. Proietti and F. Podo</i>	
Tumor vaccines – Perspectives and practice	297
<i>M. Shinitzky, A. Eisenthal, V. Ramakrishna and R. Abulafia</i>	

Clinical applications

Tumor imaging with radiolabeled monoclonal antibodies and other specific ligands	315
<i>M. Salvatore, S. Del Vecchio and S. Lastoria</i>	
Evaluation of p53 overexpression in bladder cancer	321
<i>G. Flamini, A. Sgambato, G. Calvisi, L. Ventura, T. Ventura and A. Cittadini</i>	
Biological factors and treatment decision in early breast cancer	327
<i>G. Clark</i>	
New chemotherapeutic agents: A selection of some of the most promising new drugs ...	335
<i>H.M. Pinedo, C.H. Smorenburg and G. Giaccone</i>	

Degradation of 5-fluorouracil via the pyrimidine degradative pathway	347
<i>K.D. Schnackerz, B. Podschun and P.F. Cook</i>	
Folinic acid and 5-fluorouracil $\pm$ interferon alfa-2b in the treatment of advanced colorectal cancer: Preliminary results of a randomized study	353
<i>C. Barone, A. Astone and A. Cassano</i>	
Pharmacokinetics of free and total platinum species after prolonged venous infusion of cisplatin and concurrent radiation therapy for lung carcinoma	359
<i>F. Morazzoni, F. Monzini, A. Pozzi, A.V. Bedini, A. Gramaglia, F. Milani, M. Palazzi, G. Ravasi and S. Villa</i>	
The role of interferons in the treatment of solid tumors	363
<i>K. Öberg</i>	
Endocrine treatment of malignant disease	375
<i>H.T. Mouridsen</i>	
Interactions between growth factors and oestrogens in breast cancer cells	385
<i>A.E. Wakeling</i>	
Potential of the antitumor activity of tamoxifen by interferons: A mini-review	391
<i>G. Sica and L. Marini</i>	
Vitamin E status is influenced by ω -3 polyunsaturated fatty acid supplementation in patients at risk for colon cancer	395
<i>G.M. Bartoli, P. Palozza, E. Piccioni, G. Marra, F. Armelao and M. Anti</i>	
Progress towards the clinical application of somatic cell gene therapy	401
<i>C. Bordinon</i>	
Intraoperative radiation therapy: An overview	411
<i>R. Dobelbower and J. Battle</i>	
Author index	429
Subject index	431
