

Contents

I. Introductory Perspectives

Idiopathic Dilated Cardiomyopathy: Current Concepts in Clinical Research

H.R. FIGULLA. With 2 Figures 3

II. Epidemiology and Natural Course of IDC

Epidemiology of Idiopathic Dilated Cardiomyopathy

H. KUHN, F. GIETZEN, G. BEER, and K. PETHIG.
With 1 Figure 13

Natural History of Idiopathic Dilated Cardiomyopathy

F. CAMERINI, A. DI LENARDA, G. LARDIERI, L. MESTRONI,
A. PERKAN, B. PINAMONTI, A. SALVI, and G. SINAGRA.
With 4 Figures 26

III. Basic Molecular Concepts Toward Understanding of IDC

Molecular Analysis of Cardiac Growth and Development in Transgenic Mouse Model Systems

K.R. CHIEN, K.U. KNOWLTON, K. LEE, R.S. ROSS,
H.A. ROCKMAN, and T.X. O'BRIEN. With 5 Figures 45

The Promoter of the Human Cardiac β -Myosin Heavy-Chain Gene Is Controlled by an Upstream Enhancer

A. WETTSTEIN and H.-P. VOSBERG. With 5 Figures 56

Growth Factor Expression in the Cardiac Myocyte

P. CUMMINS 65

IV. Structural Abnormalities in IDC

The Cytoskeleton and Extracellular Matrix in Human Hearts with Dilated Cardiomyopathy J. SCHAPER, B. SPEISER, and T. BRAND. With 4 Figures	75
Macro- and Micropathology of Dilated Cardiomyopathy E.G.J. OLSEN. With 3 Figures	81
Detection of Disruption of Sarcolemmal Membrane by Indium-111 Labeled Antimyosin Antibody Scan T. YASUDA. With 5 Figures	88
Extracellular Matrix Expression, Organization, and Interaction with Heart Myocytes During Development and Disease W. CARVER, M.L. BURGESS, R. JYRING, L. TERRACIO, and T.K. BORG. With 3 Figures	97

V. Contraction and Relaxation

Ventricular Remodeling in Idiopathic Dilated Cardiomyopathies E.H. SONNENBLICK, J. CAPASSO, and P. ANVERSA. With 1 Figure	111
Mechanisms of Deficient cAMP Generation in Heart Failure M. BÖHM, H. LENSCHKE, and E. ERDMANN. With 8 Figures	120
Abnormal Calcium Metabolism in Heart Muscle Dysfunction J.K. GWATHMEY and R.J. HAJJAR. With 3 Figures	132
Energy Requirements of Contraction and Relaxation of the Heart A.M. KATZ. With 1 Figure	145

VI. Microcirculation and Oxygen Supply in Cardiac Hypertrophy and IDC

Capillary Density, Distribution, and Length Parameters Related to Oxygen Supply in Myocardial Hypertrophy and Atrophy K. RAKUSAN, S. BATRA, P. VEPREK, and Z. TUREK. With 2 Figures	155
Microcirculation in the Cardiomyopathic Syrian Hamster and in Human Congestive Cardiomyopathy S.M. FACTOR. With 2 Figures	165
The Microcirculation in Cardiac Hypertrophy R.O. CANNON, III	176
Myocardial Oxygen Consumption in Patients with Idiopathic Dilated Cardiomyopathy: Effects of Vasodilating and Inotropic Agents CH. HOLUBARSCH, G. HASENFUSS, and H. JUST. With 5 Figures	185
Regression of Cardiac Hypertrophy with Pharmacotherapeutic Regimen W. MOTZ, M. VOGT, S. SCHELER, and B.E. STRAUER. With 5 Figures	195
 VII. Ionic Channels and Signal Gating	
β -Adrenergic Receptor Dysfunction in the Pathogenesis of Idiopathic Dilated Cardiomyopathy M.R. BRISTOW, M. MOVSESIAN, and A.M. FELDMAN. With 7 Figures	209
Na ⁺ Channels as Molecular Substrate of Cardiac Excitability: Elementary Properties and Responsiveness to Drugs M. KOHLHARDT	222
The Involvement of G _s in Regulation of the L-Type Voltage-Gated Ca ²⁺ Channel L. BIRNBAUMER, J. CODINA, R. MATTERA, A. YATANI, Y. IMOTO, A.M. BROWN, M.-J. HAWKES, S.L. HAMILTON, L. TORO, and E. STEFANI. With 13 Figures	234
Inositol Phosphates in Cardiac Regulation G.W. MAYR	250

VIII. Virus and Cardiomyopathy

Enterovirus-Induced Cardiomyopathy:

Molecular Analysis of Acute and Persistent Myocardial Infections

R. KANDOLF, K. KLINGEL, A. CANU, R. ZELL,
H.-C. SELINKA, F. MCPHEE, W.M. FRANZ, J. GULIZIA,
A. HEIM, U. FORTMÜLLER, C. HOHENADL, U. RAAB,
G. MALL, and B. McMANUS. With 3 Figures 267

Direct Damage of Myocardium by Enterovirus

B. McMANUS, L.H. CHOW, J.E. WILSON,
D.R. ANDERSON, and R. KANDOLF. With 8 Figures 284

Natural History of Enterovirus Persistence in the Murine Model of Coxsackievirus-Induced Myocarditis:

A Quantitative In Situ Hybridization and Immunohistochemistry Study

G. MALL, K. KLINGEL, M. ALBRECHT, M. SEEMANN,
T. MANDEL, and R. KANDOLF. With 2 Figures 294

Detection and Typing of Enteroviruses

T. HYYPIÄ. With 3 Figures 301

Specific and Nonspecific Heart Defenses in Enteroviral Infections

C.J. GAUNTT, A.L. HIGDON, H.M. ARIZPE, E.A. MAULL,
C.W. LUTTON, M.A. BECK, N.M. CHAPMAN,
B. McMANUS, J.C. MULLICAN, and S.M. TRACY 310

IX. Immunological Factors in Cardiomyopathy

Heart Autoantibodies in Human Myocarditis and Cardiomyopathy: Virus and Skeletal Muscle Cross-reactivity

D.A. NEUMANN, G.S. ALLEN, C.R. NARINS, N.R. ROSE,
and A. HERSKOWITZ. With 3 Figures 325

Are Anti-cardiac Antibodies in Dilated Cardiomyopathy "Natural" Antibodies?

B. MAISCH, E. BAUER, L. DRUDE, M. HERZUM,
G. HUFNAGEL, U. SCHÖNIAN, and S. PANKUWEIT.
With 3 Figures 335

X. Therapeutic Options in IDC and Myocarditis

Animal Models for Therapeutic Trials of Viral Myocarditis A. MATSUMORI. With 3 Figures	351
Immunosuppressive Therapy in Human Myocarditis J.B. O'CONNELL. With 1 Figure	363
Interferon Therapy in Enterovirus-Associated Idiopathic Dilated Cardiomyopathy M. STILLE-SIEGENER, A. HEIM, K. KLINGEL, R. KANDOLF, G. MALL, H. KREUZER, and H.R. FIGULLA. With 1 Figure	369
The Role of β -Blockers in Idiopathic Dilated Cardiomyopathy: Clinical Effect and Molecular Mechanism F. WAAGSTEIN, L.-X. FU, and Å. HJALMARSON. With 5 Figures	373
The Role of Calcium Channel Blockers in Idiopathic Dilated Cardiomyopathy H.R. FIGULLA and H. KREUZER. With 4 Figures	382
Gene Therapy for Cardiovascular Disease: Realistic Possibilities for the Future J.M. LEIDEN. With 2 Figures	390
Subject Index	397
