

Contents

Part 1 Mean-field and Beyond Mean-field Nuclear Theoretical Methods .	1
1 Independent-particle Models	3
1.1 The Fermi-gas Model	3
1.2 The Shell Model	6
1.3 The Hartree–Fock Approximation	9
2 Complex Mean-field Analyses	12
2.1 The Complex Potential. Formal Considerations.	12
2.2 The Complex Potential for Bound and Scattering States	15
2.3 Dispersion Relations Methods	20
3 Basic Correlation Methods.	30
3.1 An Analysis of Mean-field Theories	30
3.2 Correlation Methods Related to Mass Operator Expansions.	33
3.3 Beyond Single Slater Determinant Methods.	43
4 Further Correlation Methods.	49
4.1 The Generator Coordinate Method	49
4.2 The Coherent Density Fluctuation Model	55
4.3 The Natural Orbital Method	59
Part 2 Nucleon Correlations and Nuclear Structure	65
5 Spectral Functions	67
5.1 Introduction	67
5.2 Green Function Description of the Spectral Function	70
5.3 Spectral Functions within the Coherent Density Fluctuation Model	73
5.4 Sum Rules for the Spectral Function	79

6	Natural Orbitals and Occupation Numbers in Nuclei	83
6.1	Nucleon Correlations and Single-particle Occupation Numbers	83
6.2	Applications of the Natural Orbital Method	93
6.3	The Natural Orbital Representation within the Coherent Density Fluctuation Model (CDFM)	98
6.4	The Natural Orbital Representation within the Generator Coordinate Method (GCM)	101
6.5	Comparison of CDFM and GCM Results with Experimental Data for Occupation Numbers	109
7	Momentum Distributions in Nuclei	111
7.1	Nucleon Momentum and Density Distributions	111
7.2	Cluster Momentum Distributions in Nuclei	142
8	Ground and Excited Collective Nuclear States within the Coherent Density Fluctuation Model and the Generator Coordinate Method	157
8.1	Energies and Density Distributions in Ground and Excited Monopole States within the Coherent Density Fluctuation Model	157
8.2	Generator Coordinate Method Calculations of Energies and the Density Distributions of the Ground and Excited Monopole States	168
	Part 3 Nucleon Correlations and Nuclear Reactions	171
9	Electron–nucleus Scattering	173
9.1	Electron Elastic Scattering	173
9.2	Quasielastic Electron Scattering	179
9.3	Deep-inelastic Lepton–nucleus Scattering	192
10	Photonuclear Reactions at Intermediate Energies	202
11	Intermediate Energy Proton–nucleus Scattering	219
11.1	Proton–nucleus Scattering and Nucleon Correlations	219
11.2	Elastic Proton–nucleus Scattering within the Coherent Density Fluctuation Model	230
11.3	Deep-inelastic Proton–nucleus Scattering within the Coherent Density Fluctuation Model	238

12 Elastic Scattering of Complex Nuclear Systems	243
12.1 Intermediate-energy Alpha-particle Elastic Scattering on Nuclei.	243
12.2 Heavy-ion Elastic Scattering	248
