

CONTENTS

<i>General Preface</i>	1
<i>Introduction: The Effects of Scientific Emigration: Special Methodological Questions</i>	8
A. Method	14
B. Data Base and Preliminary Descriptive Analyses	23
C. Emigrants as Literary Producers in Nuclear Physics	29
D. Recognizing Emigrants' Scientific Achievement: Temporal Order, Social Stratification, and Type of Journal	48
E. Disciplinary Landscapes in Nuclear Physics: Social and Cognitive	63
I. Simple Ranking by Citation Counts	63
II. After the Quantum Revolution: Nuclei, Atoms, and Molecules 1926-1930	67
III. Nuclear Physics in Its Revolutionary Phase: From the 'Annus Mirabilis' 1932 to Fermi's Pioneering Discovery	104
IV. The Fate of a 'Normal' Science in 1941: The Public Role of the Nuclear Researcher Under Attack	140
V. The Failure to Return to Normality: Nuclear Physics as a Benefactor of, and Debtor to, Politics	174
F. Biography in Context	194
I. Educational and Institutional Background of Emigrant Nuclear Physicists	194
II. Physical Genealogies: Group Biography of Emigrant Atomic and Nuclear Physicists in Institutional Context	229
