

Contents

1	Semiconductor Crystals	1
1.1	Crystal Lattices	1
1.2	Diamond and Zincblende Structure	6
1.3	Energy Bands	9
1.4	Mixed Compound Semiconductors	12
	Problems	16
2	Propagation of Electromagnetic Waves	19
2.1	Maxwell's Equations	19
2.2	Wave Equation and Energy Flux	22
2.3	Plane Waves and Boundary Conditions	26
2.4	Reflection of Plane Waves	32
2.5	Absorption in AlGaAs and InGaAsP	42
2.6	Refractive Index in AlGaAs and InGaAsP	45
	Problems	47
3	Planar Waveguides	49
3.1	Wave Guiding	49
3.2	Field Distributions	56
3.3	Interface Deformations	62
3.4	Graded Index Films	71
	Problems	74
4	Strip Waveguides	75
4.1	Rectangular Waveguides	76
4.2	Wave Guiding by Raised Profiles	83
4.3	Theory of General Dielectric Waveguides	88
4.4	Modes	95
4.5	Transitions	102
	Problems	108
5	Coupling of Modes	109
5.1	Treatment of Coupled Modes	109
5.2	Theory of Mode Coupling	114
5.3	Mode Coupling in Anisotropic Media	125
	Problems	140

6	Directional Couplers	143
6.1	Principle of Operation	143
6.2	Electrooptic Control	154
6.3	Supermodes	164
	Problems	172
7	Electrons in Semiconductors	175
7.1	Fundamentals of Quantum Theory	175
7.2	The Band Structure of Semiconductors	187
7.3	Motion of Free Charge Carriers	195
7.4	Densities of States	200
7.5	Occupation Probabilities	206
7.6	Systems with Constrained Particle Motion	218
	Problems	224
8	Emission and Absorption	225
8.1	Transition Rates	225
8.2	Quantum Mechanics of Radiative Transitions	237
8.3	Direct Band-Band Transitions	244
8.4	Influence of Impurities	265
	Problems	276
9	Heterojunctions	277
9.1	Energy Band Diagram	277
9.2	Abrupt Junction in Equilibrium	280
9.3	Current Flow Across the pn-Heterojunction	285
9.4	Double Heterostructures	296
	Problems	301
10	Laser Diodes	303
10.1	Modes and Rate Equations	303
10.2	Steady State Behavior	312
10.3	Laser Structures	319
10.4	Emission Spectrum	327
10.5	Modulation	333
10.6	Noise in Single-Mode Laser Diodes	343
10.7	Specific Laser Diodes	358
	Problems	383
11	Photodetectors	387
11.1	Fundamentals	387
11.2	Photodiodes	396
11.3	Avalanche Photodiodes	418
11.4	Photodetectors with Multilayer Structure	434
11.5	Photoconductors	443
	Problems	450

12 Optoelectronic Modulators	453
12.1 Electrically Controlled Modulators	453
12.2 Optically Controlled Modulators	464
12.3 Field Induced Modulation in Quantum Wells	477
Problems	485
13 Optoelectronic Integration	487
13.1 Laser-Transistor Integration	487
13.2 Detector-Transistor Integration	494
13.3 Other Forms of Integration	504
Problems	507
Appendices	509
A. Physical Constants	509
B. Data on Some Indirect Semiconductors	510
C. Data on Some Direct Semiconductors	511
References	512
List of Important Symbols	522
Subject Index	530
