Part I The Parabolic Anderson Model

The Parabolic Anderson Model with Long Range Basic	
Hamiltonian and Weibull Type Random Potential	13
Stanislav Molchanov and Hao Zhang	
1 Dedication and Introduction	13
2 The Annealed and Quenched Asymptotic Properties of $u(t, 0)$ with Weibull Potential $V(x, \omega_m)$: $P\{V(\cdot) > x\} = \exp\{-\frac{x^\alpha}{\alpha}\} \dots$	20
3 The Annealed and Quenched Asymptotic Properties of $u(t, 0)$ with Potential $V(x, \omega_m)$ of the Form $P\{V(\cdot) > x\} = \exp\{-\frac{x^\alpha}{\alpha} L(x)\} \dots$	23
4 Concluding Remark	30
References	30

Parabolic Anderson Model with Voter Catalysts:	
Dichotomy in the Behavior of Lyapunov Exponents	33
Grégory Maillard, Thomas Mountford, and Samuel Schöpfer	
1 Introduction.....	34
1.1 Model	34
1.2 Voter Model	34
1.3 Lyapunov Exponents.....	35
1.4 Main Results	38

2	Proof of Theorems 1.1 and 1.3	39
2.1	Coarse-Graining and Skeletons	40
2.2	The Bad Environment Set B_E	42
2.3	The Bad Random Walk Set B_W	48
2.4	Proof of Theorem 1.1	51
3	Proof of Theorem 1.4	51
4	Proof of Theorem 1.4	62
