

Contents

List of Contributors	ix
1 Flow Cytometry: A Technique Waiting for Microbiologists <i>David Lloyd</i>	1
2 The Physical and Biological Basis for Flow Cytometry of <i>Escherichia coli</i> <i>Erik Boye and Harald B. Steen</i>	11
3 Flow Cytometric Analysis of Heterogeneous Bacterial Populations <i>Richard Allman, Richard Manchee and David Lloyd</i>	27
4 On the Determination of the Size of Microbial Cells Using Flow Cytometry <i>Hazel M. Davey, Chris L. Davey and Douglas B. Kell</i> ..	49
5 Uses of Membrane Potential Sensitive Dyes with Bacteria <i>David Mason, Richard Allman and David Lloyd</i>	67
6 Flow Cytometric Analysis, Using Rhodamine 123, of <i>Micrococcus luteus</i> at Low Growth Rate in Chemostat Culture <i>Hazel M. Davey, Arseny S. Kaprelyants and Douglas B. Kell</i>	83
7 Characterization of Bacterial Cell Size and Ploidy using Flow Cytometry and Image Analysis <i>Jerome Durodie, Kenneth Coleman and Michael J. Wilkinson</i>	95

8 Cytometric Evaluation of Antifungal Agents <i>Elizabeth A. Carter, Frank E. Paul and Pamela A. Hunter</i>	111
9 Applications of Flow Cytometry in Bacterial Ecology <i>Clive Edwards, Julian P. Diaper, Jonathan Porter and Roger Pickup</i>	121
10 Analysis of Microalgae and Cyanobacteria by Flow Cytometry <i>Alex Cunningham</i>	131
11 Flow Cytometry at Sea <i>Glen A. Tarran and Peter H. Burkill</i>	143
12 Neural Network Analysis of Flow Cytometry Data <i>Lynne Boddy and Colin W. Morris</i>	159
13 Rapid Analysis of Microorganisms Using Flow Cytometry <i>Michael Brailsford and Stephen Gatley</i>	171
14 Appendix: Spectral Characteristics of Some Fluorescent Dyes and Excitation Sources <i>David Lloyd</i>	181
Subject Index	185
