

Contents

Preface	vii
List of Contributors	ix
1. Numerical Methods and their Application to Device Modelling Eric A.B. Cole	1
2. MESFET Modelling Christopher M. Snowden.....	26
3. HEMT Modelling Michael Shur and Tor A. Fjeldly.....	56
4. HBT Modelling Robert E. Miles	74
5. Gunn Diode and IMPATT Diode Modelling Michael Shur	89
6. Introduction to Quantum Modelling Robert E. Miles	104
7. Modelling of Distributed Feedback Lasers Geert Morthier and Roel Baets	119
8. Equivalent Circuit Modelling Stavros Iezekiel	149
9. Large-Signal Models Robert J. Trew	170
10. Noise Modelling Alain Cappy	194
11. Monte Carlo Models and Simulations Paulo Lugli	210
12. Quasi-Two-Dimensional Models for MESFETs and HEMTs Alain Cappy	232
13. Application of Modelling to Microwave CAD D. Michael Brookbanks	246
14. Industrial Relevance of Device Modelling Anthony J. Holden	270
Subject Index	281
