

Contents

1. Non Monotonic Reasoning

Possibilistic Abduction	3
<i>D. Dubois, H. Prade</i>	
Management of Preferences in Assumption-Based Reasoning	13
<i>C. Cayrol, V. Royer, C. Saurel</i>	
Default Exclusion in a KL-ONE-Like Terminological Component	23
<i>P. Coupey</i>	
Unifying Various Approaches to Default Logic	33
<i>Y. Moinard</i>	
Using Maximum Entropy in a Defeasible Logic with Probabilistic Semantics	43
<i>J. Cussens, A. Hunter</i>	
Legality in Inheritance Networks	53
<i>N. Madani</i>	
A Note on Information Systems Associated to Termal Algebras	63
<i>M. Monserrat, F. Rosselló, J. Torrens</i>	
A Backward Chaining Resolution Process Involving Non-Monotonic Operators	73
<i>D. Ferney, A. Quilliot</i>	

2. Logical Methods

On Fuzzy Conditionals Generalising the Material Conditional	85
<i>E. Trillas</i>	
Integrating Resolution-Like Procedures with Lukasiewicz Implication	101
<i>G. Tamburrini, S. Termini</i>	
The Development of a "Logic of Argumentation"	109
<i>P. Krause, S. Ambler, J. Fox</i>	
From "And" to "Or"	119
<i>T. Arnould, A. Ralescu</i>	
Representing Spatial and Temporal Uncertainty	129
<i>E. Eberbach, A. Trudel</i>	

An Analysis of the Temporal Relations of Intervals in Relativistic Space-Time	139
<i>R. V. Rodriguez, F. D. Anger</i>	
Accumulation and Inference over Finite-Generated Algebras for Mapping Approximations	149
<i>J. Casasnovas, J.J. Miro-Julia</i>	

3. Acquiring Knowledge

Similarity Measures for Case-Based Reasoning Systems	161
<i>P.P. Bonissone, S. Ayub</i>	
Statistical Methods in Learning	173
<i>A. Sutherland, R. Henery, R. Molina, C.C. Taylor, R. King</i>	
Learning from Erroneous Examples Using Fuzzy Logic and "Textbook" Knowledge	183
<i>J. Kacprzyk, C. Iwanski</i>	
Incremental Learning of Roughly Represented Concepts	192
<i>A. O. Arigoni, C. Furlanello, V. Maniezzo</i>	
Self-Organizing Qualitative Multimodel Control	199
<i>G. Nagib, W. Gharieb, Z. Binder</i>	
MoHA, an Hybrid Learning Model: A Model Based on the Perception of the Environment by an Individual	209
<i>F. Bordeaux, F. Forest, B. Grau</i>	
A New Perspective in the Inductive Acquisition of Knowledge From Examples	219
<i>G. Fiol, J. Miró-Nicolau, J. Miró-Julià</i>	
Knowledge Representation Through Object in the Development of Expert System Chemical Synthesis and Reaction	229
<i>I. Luque Ruiz, J.L. Cruz Soto, M. A. Gómez-Nieto</i>	

4. Knowledge Based Systems

Hierarchical Representation of Fuzzy If-Then Rules	239
<i>R.R. Yager</i>	
Approximate Reasoning in Expert Systems: Inference and Combination Tools	248
<i>A. M. Spilski-Pétieau, D. Willaëys</i>	

Modes of Interval-Based Plausible Reasoning Viewed via the Checklist Paradigm	256
<i>L.J. Kohout, W. Bandler</i>	
Rule-Based Systems with Unreliable Conditions	265
<i>L. Cardona, J. Kohlas, P.A. Monney</i>	
Fuzzy Semantics in Expert Process Control	275
<i>J. Quevedo, C. Gibert Oliveras, J. Aguilar-Martín</i>	
Qualitative Operators and Process Engineer Semantics of Uncertainty	284
<i>N. Rakoto-Ravalontsalama, A. Missier, J.S. Kikkert</i>	
Facing Uncertainty in the Management of Large Irrigation Systems: Qualitative Approach	294
<i>S. Sawadogo, A.K. Achaibou, F. Mora-Camino</i>	
Semantic Ambiguity in Expert Systems: The Case of Deterministic Systems	304
<i>D.E. O'Leary</i>	
A Deduction Rule for the Approximated Knowledge of a Mapping	314
<i>J. Casanovas</i>	
On Knowledge Base Redundancy Under Uncertain Reasoning	321
<i>G. Valiente Feruglio</i>	
A Fuzzy Logic Approach for Sensor Validation in Real Time Expert Systems	330
<i>J.A. Aguilar-Crespo, E. de Pablo, X. Alamán</i>	

5. Neural Networks

Application of Neuro-Fuzzy Networks to the Identification and Control of Nonlinear Dynamical Systems	341
<i>P. Y. Glorennec, C. Barret, M. Brunet</i>	
Comparison Between Artificial Neural Networks and Classical Statistical Methods in Pattern Recognition	351
<i>C. Hervás Martínez, E. J. Romero Soto, N. García Pedrajas, R. Medina Carnicer</i>	
Learning Methods for Odor Recognition Modeling	361
<i>S. Amghar, H. Paugam-Moisy, J.P. Royet</i>
