

Contents

Part I Computational Methods in Classical Physics

By J. G. Zabolitzky

| | |
|---|----|
| Introduction | 3 |
| 1 Motion of a Classical Point-Like Particle | 5 |
| 2 Short Course in FORTRAN Programming Methodology | 15 |
| 3 Methods of Higher Accuracy (and Efficiency) | 19 |
| 4 Finding Extremal Points of Motion | 37 |
| 5 Statics and Dynamics of Strings | 51 |
| 6 Dynamics of Strings | 59 |
| 7 Literature | 65 |

Part II Monte Carlo Simulations in Statistical Physics

By D. Stauffer

| | |
|---|-----|
| Introduction | 69 |
| 1 Random Numbers | 73 |
| 2 Ising Model | 79 |
| 3 Cellular Automata (Q2R and Creutz) | 85 |
| 4 Diffusion and Percolation | 91 |
| 5 Eden Clusters | 95 |
| 6 Kauffman Model | 99 |
| 7 Summary | 103 |
| 8 Appendix: A Short Introduction to FORTRAN | 105 |
| 9 Literature | 109 |

Part III Principles of Vector and Parallel Computing

By N. Ito and D. Stauffer

| | | |
|-----|--|-----|
| 1 | Basic Idea | 113 |
| 2 | An Example – Q2R | 117 |
| 3 | More About Vector Processing | 127 |
| 3.1 | IF-Statement | 127 |
| 3.2 | Initial Cost for the Vector-Processing | 130 |
| 3.3 | Bank Conflict | 131 |
| 3.4 | Library Routines | 134 |
| 4 | Before and After the Vectorization | 137 |
| 5 | Parallel Computing | 139 |
| 5.1 | Basic Ideas | 139 |
| 5.2 | Types of Parallel Computers and Algorithms | 140 |

**Part IV REDUCE for Beginners – Seven Lectures
on the Application of Computer-Algebra (CA)**

By V. Winkelmann and F. W. Hehl

| | | |
|-----------------------|---|-----|
| Introduction | 147 | |
| | | |
| First Lecture | 151 | |
| 1.1 | A First Interactive Reduce Session | 151 |
| 1.2 | What Can CA Do for You? | 154 |
| 1.3 | The Reduce Character Set | 156 |
| 1.4 | Integers, Rational and Real Numbers | 157 |
| 1.5 | Variables Named by Identifiers | 158 |
| 1.6 | A Reduce Program, a Follow-up of Commands | 159 |
| 1.7 | Assigning Values to Variables | 160 |
| 1.8 | Access to Previous Input and Output | 161 |
| 1.9 | Homework | 162 |
| | | |
| Second Lecture | 163 | |
| 2.1 | Built-in Operators | 163 |
| 2.2 | Reduce Expressions | 165 |
| 2.3 | The Process of Evaluation in Reduce | 167 |
| 2.4 | Repeatedly Doing Something: Loops | 169 |
| 2.5 | Loops and Lists | 171 |

| | |
|--|------------|
| 2.6 Multidimensional Objects: Arrays | 172 |
| 2.7 Homework | 175 |
| Third Lecture | 177 |
| 3.1 The Conditional Statement | 177 |
| 3.2 Combining Several Statements: I. The Group Statement | 178 |
| 3.3 Combining Several Statements: II. The Compound Statement | 179 |
| 3.4 Some Elementary Mathematical Functions | 182 |
| 3.5 Differentiation with DF | 182 |
| 3.6 Integration with INT | 184 |
| 3.7 Substitution with SUB and Rule Lists | 185 |
| 3.8 Homework | 186 |
| Fourth Lecture | 187 |
| 4.1 Operators That Act on Lists | 187 |
| 4.2 Right- and Left-hand-side of an Equation | 188 |
| 4.3 Solving (Non-)linear Equations | 189 |
| 4.4 Retrieving Parts of Polynomials and Rational Functions | 190 |
| 4.5 To Make Decisions with Boolean Operators | 192 |
| 4.6 Writing Messages | 192 |
| 4.7 How to Define Your Own Operators | 193 |
| 4.8 Rule Lists and the LET-statement | 194 |
| 4.9 Homework | 197 |
| Fifth Lecture | 199 |
| 5.1 Activate and Deactivate Rule Lists | 199 |
| 5.2 More About Rule Lists | 200 |
| 5.3 Examples: Factorials and Binomial Coefficients | 200 |
| 5.4 Deactivating User-defined Rules | 204 |
| 5.5 Non-commutative Algebras, Symmetric and Antisymmetric Operators | 206 |
| 5.6 Procedures for Repeated Use of Commands | 207 |
| 5.7 A Procedure for l'Hospital's Rule and a Caveat | 209 |
| 5.8 Homework | 211 |
| Sixth Lecture | 213 |
| 6.1 Linear Algebra Package: Matrices | 213 |
| 6.2 Turning Switches On and Off | 217 |
| 6.3 Reordering Expressions | 220 |
| 6.4 On Reduce Input and Output | 221 |

| | |
|--|------------|
| 6.5 Generating Fortran Programs | 224 |
| 6.6 Concluding Remarks | 224 |
| 6.7 Homework | 225 |
| Seventh Lecture | 227 |
| 7.1 Vector and Tensor Calculus | 227 |
| 7.2 Packages for Three-dimensional Vector Calculus | 229 |
| 7.3 Tensor Analysis, Christoffel Symbols, General Relativity | 233 |
| 7.4 The EXCALC Package for Exterior Differential Forms | 242 |
| 7.5 Graphics with GNUPLOT | 246 |
| 7.6 Homework | 253 |
| A Some Additional Exercises | 257 |
| B Changes From Reduce 3.3 to Reduce 3.4.1 | 265 |
| C Further Information on Reduce | 269 |
| C.1 Where Can You Buy Reduce? | 270 |
| C.2 Execution Times for the Reduce Standard Test | 273 |
| D Literature | 275 |
| <hr/> Joint Index <hr/> | 281 |
