

Table of Contents

Editor's Introduction	1
Conclusions	9
 1. Theoretical Aspects of Learning Environments	
Knowledge Representation and the Learning Process: Taking Account of Developmental Features and Support Features in Interactive Learning Environments	13
<i>M.M.A. Valcke</i>	
Reasoning Involved in Control Technology	27
<i>Jacques Sougné</i>	
Cognitive Spectacles	43
<i>Pierre Nonnon</i>	
Language Control Language: Control Microworlds of the Mind	51
<i>Mike P. Doyle</i>	
What Role Is There for Control Technology in Learning with Computational Expressive Media?	71
<i>G. Gyiadimos, P. Georgiadis, C. Kynigos</i>	
 2. Experiments and Case Studies	
2.1. Course Contents	
Robotics and Telecommunication (Experience of the Ecole Active de Malagnou in Geneva Within the Framework of a Computerized Educational Environment)	85
<i>Jean-Claude Brès</i>	
Could the Robotics/Control Technology Be an Interdisciplinary Tool in School?	95
<i>Montse Guiter</i>	

Control Technology and the Creative Thinking Process for Teachers and Students	103
<i>Marilyn Schaffer</i>	

2.2. Methodology

Integrating the Use of LEGO-LOGO into the Curriculum of a Primary School: A Case Study	109
<i>Maria Lucia Giovannini</i>	

An Aesthetic of Learning Environment Design	119
<i>Gregory Gargarian</i>	

Situation Graphs as Tools for Ordering of Students' Thinking and Understanding of Actual Existing Servo Mechanisms	133
<i>Jorma Enkenberg</i>	

Problems Associated with Getting Control Technology Working in Schools	151
<i>Reg Eyre</i>	

Promoting Active Learning: A Pragmatic Approach	161
<i>Chris Robinson</i>	

Workshops and Discussion about Educational Situations	167
<i>Martial Vivet and Pascal Leroux</i>	

2.3. The Teacher's Role

Educational Uses of Control Technology	173
<i>Martial Vivet</i>	

Measuring some Cognitive Effects of Using Control Technology	183
<i>Brigitte Denis</i>	

3. Tools Developed for Control Technology

3.1. State of the Art

Workshops	217
<i>Mike P. Doyle</i>	

Hands-on Control Technology with New LEGO Dacta Tools	233
<i>Ole Moeller</i>	

3.2. Future Trends

A New Development of Control Technology	241
<i>Pascal Leroux</i>	
A Data Acquisition System in a Learning Environment	253
<i>Pierre Nonnon and Claude Johnson</i>	
Concurrent Control for Children	265
<i>David Argles</i>	
Learning Mode in the Exploration of Parallelism in Pedagogical Robotics	279
<i>Jean-Baptiste La Palme and Maurice Bélanger</i>	
ActNet - A Heterogeneous Network of Actors for Learning of Parallelism, Communication, and Synchronization	289
<i>Philippe Darche and Gérard Nowak</i>	
Participants and Contributors	309
