Abstract	III
Kurzfassung	V
Acknowledgments	IX
List of Frequently Used Symbols	XI
1 Introduction	1
1.1 Background and Motivation	1
1.2 Literature Survey	3
1.2.1 Vehicle Dynamics Control - Historic and Current Systems	3
1.2.2 Regulations Concerning a Central Brake Concept	9
1.3 Scope and Objectives of this Thesis	10
1.4 Thesis Outline	11
1.5 Publications	12
2 Analysis of State of the Art 4-Channel VDC Vehicles	13
2.1 Approach	13
2.2 Example Vehicle and Simulation Environment	14
2.3 Classification of Vehicle Test Catalogue (VTC)	16
2.4 Load Cases with Wheel Individual Brake Torque Application	17
2.5 Implications and Resulting Research Demand	25
3 Vehicle Dynamics with Axle Central Brake Torque Generation	27
3.1 Introduction	27
3.2 Assessment of Longitudinal Manoeuvres	27
3.2.1 Acceleration on μ -split Surface	27
3.2.2 Braking on a μ -split Surface	30
3.3 Assessment of Lateral Dynamics Manoeuvres	34
3.3.1 Impact of the Actuation System	34
3.3.2 3-Channel VDC Implementation	37
3.3.3 Results in Double Lane Change and J-Turn	50
3.4 Conclusions	54
4 Effects of Differential Gearboxes	57
4.1 Introduction	57

4.2	Drivetrain and Differential Model	59
4.3	Methodology for Quantification of Driving Dynamics at Vehicle Limit . .	60
4.4	Methodology for Assessment in Daily Driving Conditions	63
4.5	Example Results	66
4.5.1	Analysis of Steady-State Behaviour in MMDs	66
4.5.2	Impact on Dynamic Manoeuvres	68
4.5.3	Behaviour during Daily Driving	69
4.6	Conclusions	72
5	Parking Brake Concept Development	75
5.1	Introduction	75
5.2	Requirement Definition	75
5.2.1	Legal and Technical Requirements	76
5.2.2	Considered Driving and Parking Situations	78
5.3	Concept Search	79
5.3.1	Parking Brake Topology	80
5.3.2	Actuator Concept Design	85
5.3.3	Dimensioning	87
5.4	Simulative Evaluation of the Concept Proposal	92
5.4.1	Modelling of the Parking Brake Actuator	93
5.4.2	Longitudinal Vehicle Dynamics Model with a TCS	98
5.4.3	Analysis of Relevant Parking Brake Load Cases	101
5.5	Conclusions	105
6	Discussion	107
6.1	Application Examples	107
6.2	Evaluation of Vehicle Configurations	110
7	Conclusion	119
7.1	Summary of Contributions	119
7.2	Open Research Questions	121
A	Appendix	123
A.1	Estimation of Vehicle State Variables for VDC using an Observer	123
A.2	Parking Brake Concept Development	127
A.3	Differential Gearboxes in Different Driving Conditions	135
	Bibliography	139
	Curriculum Vitae	150
