

Contents

1 The Basic Principles of Micronutrition

The Role of Micronutrients in Prevention and Therapy	2	Variability in Micronutrient Requirements among Individuals ..	5
Mechanism of Action	3	Safety	6

2 Micronutrients in Foods

Micronutrients in the Diets of Industrialized Countries	10	Meat (Beef, Pork, Lamb, and Poultry)	14
The Difference between the Diet of Our Distant Ancestors and Our Diet Today	12	Eggs	14
Food Sources of Micronutrients	13	Milk and Milk Products	14
Vegetables and Fruits	13	Fish	15
		Cereals, Bread, Wheat Bran, and Wheat Germ	15
		Salt	17
		Vegetarian Diets	18

3 The Micronutrients

Vitamins	22	Copper	75
Vitamin A and Carotenoids	22	Molybdenum	77
Vitamin D	26	Chromium	79
Vitamin E	29	Iodine	82
Vitamin K	33	Selenium	84
Thiamin (Vitamin B1)	34	Fluoride	87
Riboflavin (Vitamin B2)	37	Fats and Fat-Related Compounds ..	89
Niacin (Vitamin B3)	38	Essential Fatty Acids: Omega-3 and Omega-6 Fatty Acids	89
Vitamin B6	41	Choline and Lecithin	95
Folic Acid	45	Amino Acids	97
Vitamin B12	47	Branched-Chain Amino Acids: Leucine, Isoleucine, and Valine	97
Pantothenic Acid	50	Arginine	99
Biotin	52	Lysine	100
Vitamin C (Ascorbic Acid)	53	Glutamine	101
Minerals and Trace Elements	58	Methionine	103
Calcium	58	Cysteine and Glutathione	105
Magnesium	61	Phenylalanine and Tyrosine	107
Potassium	63		
Iron	65		
Zinc	69		

Tryptophan	109	Antioxidants and Free Radicals	115
Taurine	111	Free Radicals	115
Carnitine	113	Antioxidants	116
		Coenzyme Q10	119

4 Micronutrition through the Life Cycle

Planning a Pregnancy	122	Nutritional Needs during Breastfeeding ..	134
Nutrition and Birth Defects	123	Postpartum Depression	136
Prepregnancy Weight	123	Dietary Hazards: Caffeine and Alcohol ...	137
		Breastfeeding and Infant Health	137
Pregnancy	124	Nutrients of Special Importance for	
Oral Contraception before Pregnancy	124	Infants	138
Role of the Placenta	124	Childhood and Adolescence	141
Fetal Growth	125	Nutritional Needs	141
Nutritional Needs during Pregnancy	125	Nutrition and Child Health	145
Micronutrient Deficiency and Its Effect on		Summary	147
Pregnancy	127	Aging and Longevity	148
Dietary and Environmental Hazards		Aging	148
during Pregnancy	128	Nutrition, Lifestyle, and Longevity	148
Maternal Health Problems during		Physical Changes of Aging and Their	
Pregnancy	130	Impact on Nutritional Health	151
Vitamin and Mineral Supplementation		Drugs and Nutritional Health	153
during Pregnancy	131	Micronutrient Supplementation for Older	
Summary	132	Adults	154
Breastfeeding and Infancy	134		
Composition of Breast Milk	134		

5 Micronutrients as Prevention and Therapy

Skin Care	158	Dental Caries	167
Introduction: Healthy Skin	158	Canker Sores (Oral Aphthae)	168
Dry Skin	158	Digestive Disorders	169
Aging Skin: Wrinkles and Age Spots	159	Constipation and Diverticulitis	169
Acne	159	Gastroesophageal Reflux (Heartburn)	169
Psoriasis	160	Peptic Ulcer	170
Eczema	162	Gallstones	171
Eye and Ear Care	163	Inflammatory Bowel Disease: Ulcerative	
Healthy Eyes	163	Colitis and Crohn's Disease	172
Conjunctivitis and Styes	163	Obesity	174
Cataracts	164	Cardiovascular Disease	175
Glaucoma	165	Introduction: Atherosclerosis	175
Middle Ear Infection (Otitis Media)	165	Coronary Heart Disease	176
Oral Health	166	Hypertension and Stroke	179
Gingivitis and Periodontal Disease	166		

Peripheral Vascular Disease (Intermittent Claudication)	181	Psychiatric Disorders	218
Disorders of Blood Sugar Regulation	182	Anxiety and Nervous Tension	218
Diabetes	182	Depression	218
Hypoglycemia	184	Women's Health	220
Anemia	187	Premenstrual Syndrome (PMS)	220
Musculoskeletal Disorders	188	Fibrocystic Breast Disease	221
Osteoarthritis	188	Oral Contraceptives	222
Rheumatoid Arthritis	189	Cervical Dysplasia (Abnormal Pap Smear)	223
Osteoporosis	191	Menopause	223
Muscle Cramps	192	Breast Cancer	224
Infectious Diseases	194	Urinary Tract Disorders	226
The Immune System	194	Prostate Enlargement (Benign Prostatic Hyperplasia)	226
Colds and Influenza	196	Nephrolithiasis (Kidney Stones)	227
Herpes Simplex Infection	197	Stress and Fatigue	229
HIV Infection and Acquired Immunodeficiency Syndrome (AIDS)	198	Infertility	231
Cancer	200	Females	231
Allergic Disorders	203	Males	232
Allergic Rhinitis	203	Cigarette Smoking	233
Asthma	203	Heavy Alcohol Consumption	235
Food Allergies and Sensitivities	204	Exposure to Heavy Metals	237
Insomnia	206	Lead	238
Nervous System Disorders I	207	Aluminum	238
Migraine	207	Mercury	238
Learning Disabilities	209	Cadmium	239
Carpal Tunnel Syndrome	209	Minimizing Exposure to Toxic Metals	239
Hyperactivity	210	Exercise and Sport	241
Epilepsy	211	Energy Sources: Carbohydrate and Fat ...	241
Nervous System Disorders II	213	Carbohydrate "Loading"	242
Parkinson's Disease	213	The Pre-Event Meal	243
Multiple Sclerosis	214	Fluids	243
Memory and Concentration Loss	215	Protein for Bodybuilding	243
Dementia and Alzheimer's Disease	216	Vitamins and Minerals	244

Appendix

Appendix I	248	Appendix III	256
Drug-Micronutrient Interactions		Laboratory Diagnosis of Micronutrient Status	
Appendix II	253	Index	263
Nutrient-Nutrient Interactions
