1	Introduction	1
2	Optical Antennas: Looking at two Faces of the Same Coin	5
2.1	Antenna Fundamentals – an Engineer’s Point of View	6
2.1.1	Linear Wire Antenna Radiation	9
2.1.2	Antenna Parameters and Definitions	14
2.2	Localized Surface Plasmons	20
2.2.1	Drude-Sommerfeld-Model	21
2.2.2	Absorption and Scattering of Small Particles	25
2.2.3	Antenna Resonance as a Waveguide Problem	32
2.2.4	Two-Arm Antenna Resonances	34
2.3	Describing Optical Antennas	37
2.4	Nonlinear Optical Effects in Optical Antennas	38
2.5	Other Optical Antenna Geometries	40
2.6	Applications of Optical Antennas	42
3	Luminescence and Semiconductor Quantum Dots	45
3.1	Fluorescence and Phosphorescence	46
3.2	Quantum Dot Functionality	47
3.3	Semiconductor Quantum Dot Fabrication	49
3.4	Some Applications of Quantum Dots	51
4	Antenna Fabrication and Topographical Characterization	53
4.1	Gold Antenna Engineering on an ITO/Glass Substrate	54
4.2	Aluminum Antenna Fabrication on a Glass Substrate	57
4.3	SEM and AFM Characterization	60
5	Characterization Setup and Techniques	65
5.1	Complete Characterization Setup	66
5.2	Dark-Field Microscopy	66

5.3	Confocal Microscopy	70
5.3.1	Point Spread Function	73
5.4	Time-Correlated Single Photon Counting	76
5.4.1	Two-Photon Excitation Induced Antibunching of Single Quantum Dots	78
5.5	Further Capabilities and Conclusions	81
6	Dark-Field Scattering Characterization	83
6.1	Two-Arm and Single-Arm Gold Antennas	83
6.1.1	Antenna Arm Length Variation	84
6.1.2	Antenna Gap Variation	91
6.2	Cross-Resonant Four-Arm Gold Antennas	94
6.3	Aluminum Antenna Scattering	96
6.3.1	Aluminum Antenna Arm Length Variation	97
6.4	Comparison of Gold and Aluminum Antennas	101
6.5	Conclusions	102
7	Two-Photon Luminescence	105
7.1	Experimental	106
7.2	Gold Antenna Longitudinal Plasmon Response	106
7.2.1	Results and Discussion	106
7.3	Gold Antenna Transverse Plasmon Response	117
7.3.1	Results and Discussion	117
7.4	Aluminum Antenna Plasmon Response	122
7.4.1	Emission Intensity Investigations	123
7.4.2	Spectral Investigations	125
7.5	Conclusions	127
8	Near-Field Measurements	129
8.1	Experimental	131
8.2	Results and Discussion	133
8.3	Conclusions and Outlook	137
9	Lightning Rod Effect on Long Single-Arm Antennas	139
9.1	Two-Photon Luminescence Investigation	139
9.1.1	Localized Emission Response	140
9.1.2	Morphological Changes	143
9.1.3	Spectral Properties	146
9.2	Probing of Enhanced Fields Using Quantum Dots	147
9.2.1	Real Colour CCD image	147

9.2.2 Raster Scanning	148
9.3 Conclusions	150
10 Summary and Outlook	153
