

Preface — VII

Part I: Laying the Foundation

Chapter 1

Modern Tools of Organizational Assessment — 3

- What Is a Good Outcome? — 3
 - A Closer Look at Outcome Assessment — 5
- Framing Robust Outcome Assessment — 7
 - Spatial vs. Temporal Assessment — 7
 - Static vs. Dynamic Estimation — 9
 - Existing vs. Created Origins — 11
- Assessment Modalities — 12
 - Focus of Assessment — 13
 - Outcome vs. Process Assessment — 15
- A Closer Look at the Idea of Best Practice — 17
 - Benchmarks and Baselines vs. Best Practices — 18
 - Applicability and Usages — 20
- Organizations and Organizational Assessment — 21
 - Organizational Society — 21
 - Commercial vs. Noncommercial Organizations — 22
 - Collaborative Decision-Making — 24
 - Spatiotemporal Assessment — 25
- Structure of the Book — 26

Chapter 2

The Genesis and the Current State — 28

- Origins — 28
 - Benchmarking — 29
 - Baselining — 30
- A Call to Action — 31
 - Diversity of Perspectives or Lack of Focus? — 32
- Rethinking Benchmarking and Baselining — 34
 - The General Conceptual Framework — 36
- Framing the Notion of Benchmarking — 37
 - Industry Classification Taxonomies — 39
 - Is Product or Market Industry Classification Still Pertinent? — 46
 - Emerging Perspectives: Sustainable Industry Classification — 46
 - Benchmarking Definition Revisited — 48

- Framing the Notion of Baselineing — 49
- Benchmarks, Baselines, and Materiality of Difference — 50
 - The (Not So) Gold Standard: Statistical Significance — 51
- The Alternative: Effect Size — 55

- Chapter 3
- Foundational Estimation and Parameterization Considerations — 60
 - Probabilistic Estimates — 61
 - The Question of Believability — 62
 - Probability as Uncertainty-Reducing Tool — 64
 - Dependability of Probabilistic Estimates — 66
 - A Note on Probability vs. Likelihood — 68
 - Key Estimation and Parameterization Considerations — 68
 - Spatial vs. Temporal Data — 70
 - Statistical Aspects of Benchmarking and Baselineing — 75
 - Positive vs. Negative Variability — 78
 - Nonsymmetric Confidence Intervals — 81
 - Standardization and Normalization — 83

Part II: Framing the Ideas of Benchmarking and Baselineing

- Chapter 4
- Benchmark-Setting — 87
 - Benchmarking and Benchmark-Setting — 87
 - Benchmark-Setting Criteria — 88
 - Definitional Clarity — 89
 - Conceptual Definition — 90
 - Appropriateness of Standard — 91
 - Data and Methodological Soundness — 92
 - Data Due Diligence — 93
 - Estimation and Parameterization — 96
 - Dealing with Outliers — 101
 - Reliability and Generalizability — 103
 - Cognitive Bias — 103
 - Statistical Bias — 105
 - Generalizability — 106
 - Stability and Consistency — 108
 - Usability — 111
 - Refresh Cycle — 111
 - Relevance — 112
 - Ease of Administration and Use — 113

Chapter 5

Baseline-Setting — 114

- Baselining and Baseline-Setting — 115
 - Baseline-Setting Criteria — 115
- Definitional Clarity — 116
 - Conceptual Definition — 116
 - Appropriateness of Standard — 117
- Data and Methodological Soundness — 118
 - Data Due Diligence — 118
- Estimation and Parameterization — 122
 - Trended Magnitude Estimation — 122
 - Understanding Time Series — 125
 - Trended Magnitude Estimation and Direct Baselines — 134
 - Trended Magnitude Estimation and Indirect Baselines — 136
 - Temporal Reliability — 138
 - Stability vs. Responsiveness — 139
- Usability — 140
 - Refresh Cycle — 140
 - Relevance — 141
 - Ease of Administration and Interpretation — 143

Chapter 6

Static vs. Dynamic Standards — 145

- Static vs. Dynamic: The Distinction — 146
- Benchmarks — 147
 - Static Benchmarks — 148
 - Dynamic Benchmarks — 150
- Baselines — 152
 - Static Baselines — 152
 - Dynamic Baselines — 155

Chapter 7

Machine Learning and Standard-Setting — 157

- Artificial Intelligence — 157
 - The Computational Mind — 159
- The Heart of AI: Machine Learning — 161
- Machine Learning and Standard-Setting — 164
- Machine Learning and Benchmarks — 165
 - Machine Learning and Benchmark-Setting — 167
- Machine Learning and Baselines — 171

Chapter 8

Predictive Standard-Setting — 174

- Inferential vs. Predictive Standards — 174
- Prediction and Forecasting — 175
 - Regression as a Tool of Prediction — 178
- Predicted Benchmarks — 179
 - Linear Regression — 179
- Forecasted Baselines — 183
 - The General Idea of Time Series Regression — 184
 - Autoregressive Forecasting Models — 185
- Some Usage Considerations — 188

Part III: Putting It to Work

Chapter 9

Baselining Case Study – Macro Standards — 193

- The Broad Context: Security Class Action Litigation Trends — 193
 - Private Securities Litigation Reform Act — 195
- The Modern Era of Shareholder Litigation — 195
 - Organizational Duality and Shareholder Actions — 197
 - Reliance and Materiality — 198
 - Outcome Scenarios — 199
- Key Shareholder Litigation Trends — 199
 - Aggregate Frequency and Severity — 200
- Digging Deeper — 203
 - Industry Definition and Data Recency — 203
 - Recent Cross-Industry SCA Trends — 206
- Key Takeaways — 210

Chapter 10

Benchmarking Case Study – Micro Standards — 212

- The Broad Context: The Art and Science of Managing — 212
 - Scientific Management in the Age of Data — 213
 - The Role of Assessment Standards — 219
- Benchmarking Exposure to Shareholder Litigation — 220
 - Risk Mitigation and Risk Transfer — 223
- Deeper Dive Benchmarking — 225
 - Risk Mitigation: Reducing Likelihood — 226
 - Risk Transfer: Managing Potential Costs — 229

The Tug of War: Informational Needs vs. Rights of Others — 235

Responsible Data Capture and Usage — 236

List of Figures — 241

List of Tables — 243

Index — 245
