

Table of Contents

Part 1: Search and Strategies

A Least-Certainty Heuristic for Selective Search	1
<i>Paul E. Utgoff and Richard P. Cochran</i>	
Lambda-Search in Game Trees – with Application to Go	19
<i>Thomas Thomsen</i>	
Abstract Proof Search	39
<i>Tristan Cazenave</i>	
Solving Kriegspiel-Like Problems: Examining Efficient Search Methods ...	55
<i>Makoto Sakuta and Hiroyuki Iida</i>	
Strategies for the Automatic Construction of Opening Books	74
<i>Thomas R. Lincke</i>	
Awari Retrograde Analysis	87
<i>Roel van der Goot</i>	
Construction of Chinese Chess Endgame Databases by Retrograde Analysis	96
<i>Haw-ren Fang, Tsan-sheng Hsu, and Shun-chin Hsu</i>	

Part 2: Learning and Pattern Acquisition

Learning from Perfection.	
A Data Mining Approach to Evaluation Function Learning in Awari.....	115
<i>Jack van Rijswijk</i>	
Chess Neighborhoods, Function Combination, and Reinforcement Learning	133
<i>Robert Levinson and Ryan Weber</i>	
Learning a Go Heuristic with TILDE.....	151
<i>Jan Ramon, Tom Francis, and Hendrik Blockeel</i>	
Learning Time Allocation Using Neural Networks	170
<i>Levente Kocsis, Jos Uiterwijk, and Jaap van den Herik</i>	

Part 3: Theory and Complexity Issues

The Complexity of Graph Ramsey Games	186
<i>Wolfgang Slany</i>	

XII Table of Contents

Virus Versus Mankind	204
<i>Aviezri S. Fraenkel</i>	
Creating Difficult Instances of the Post Correspondence Problem	214
<i>Richard J. Lorentz</i>	
Integer Programming Based Algorithms for Peg Solitaire Problems	229
<i>Masashi Kiyomi and Tomomi Matsui</i>	
Ladders Are PSPACE-Complete	241
<i>Marcel Crășmaru and John Tromp</i>	
Simple Amazons Endgames and Their Connection to Hamilton Circuits in Cubic Subgrid Graphs	250
<i>Michael Buro</i>	
Part 4: Further Experiments with Games	
New Self-Play Results in Computer Chess	262
<i>Ernst A. Heinz</i>	
SUPER-SOMA – Solving Tactical Exchanges in Shogi without Tree Searching	277
<i>Jeff Rollason</i>	
A Shogi Processor with a Field Programmable Gate Array	297
<i>Youhei Hori, Minenobu Seki, Reijer Grimbergen, Tsutomu Maruyama, and Tsutomu Hoshino</i>	
Plausible Move Generation Using Move Merit Analysis with Cut-Off Thresholds in Shogi	315
<i>Reijer Grimbergen</i>	
Abstraction Methods for Game Theoretic Poker	333
<i>Jie fu Shi and Michael L. Littman</i>	
Reasoning by Agents in Computer Bridge Bidding	346
<i>Takahisa Ando and Takao Uehara</i>	
Part 5: Invited Talks and Reviews	
Linguistic Geometry for Solving War Games	365
<i>Boris Stilman</i>	
Physics and Ecology of Rock-Paper-Scissors Game	384
<i>Kei-ichi Tainaka</i>	
Review: Computer Language Games	396
<i>Michael L. Littman</i>	

Review: Computer Go 1984–2000	405
<i>Martin Müller</i>	
Review: Intelligent Agents for Computer Games	414
<i>Alexander Nareyek</i>	
Review: RoboCup through 2000	423
<i>Itsuki Noda and Ian Frank</i>	
Review: Computer Shogi through 2000.....	433
<i>Takenobu Takizawa and Reijer Grimbergen</i>	
Author Index	443
