

# Table of Contents

## Chapter 1

### State of the Art and Prospective

|                                                                                                                       |    |
|-----------------------------------------------------------------------------------------------------------------------|----|
| <b>The High Speed Direct Injection Diesel Engine-Future Potential</b><br>N. Jackson.....                              | 3  |
| <b>European Emission Legislation of Heavy Duty Diesel Engines<br/>and Strategies for Compliance</b><br>W. Knecht..... | 17 |
| <b>Combustion Process Optimization for Euro 3</b><br>M. Lejeune, S. Michon, M. Hedna .....                            | 33 |

## Chapter 2

### Fuels in Diesel Engines

|                                                                                                                                                                                |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Fuels for Compression Ignition Engines</b><br>T. W. Ryan III, A. C. Matheaus, G. D. Neely .....                                                                             | 61  |
| <b>Effect of the Properties of Several Fuels on the Injection<br/>and Combustion Process in HSDI Diesel Engines</b><br>J. M. Desantes, J. Benajes, J. Arrègle, A. Delage ..... | 81  |
| <b>Combustion of an Ethanol/Diesel Fuel Blend in an HSDI Diesel Engine</b><br>P. C. Miles .....                                                                                | 107 |

**Chapter 3**

**Injection Systems and Spray Formation**

**Diesel Nozzle-The Determining Interface Between Injection System and Combustion Chamber**  
D. Potz, W. Christ, B. Dittus ..... 133

**Is Cavitation Important in Diesel Engine Injectors?**  
C. Arcoumanis, J. H. Whitelaw ..... 145

**Gas Entrainment in Diesel Sprays**  
A. Coghe, G. E. Cossali, L. Araneo ..... 159

**The Tip Evolution of an Evaporative Intermittent Fuel Spray**  
J. Jiménez, F. Castro, F. Tinaut, B. Giménez ..... 175

**Chapter 4**

**Air Management**

**Variable Geometry Turbine Modelling and Control for Turbocharged Diesel Engine Transient Operation**  
F. Payri, J. Galindo, J. R. Serrano ..... 189

**Mixed-Flow Turbine: Steady and Unsteady Performance with Detailed Flow Measurements**  
R. Martínez-Botas ..... 211

**Chapter 5**

**Combustion and Pollutant Formation**

**Analysis Methods for the Effects of Injection Rate Control in Direct Injection Diesel Engines**  
F. Chmela, M. Engelmayer, H. Riediger, P. Werlberger ..... 239

|                                                                                                                       |     |
|-----------------------------------------------------------------------------------------------------------------------|-----|
| <b>Effects of Injector Conditions on the Flame Lift-Off Length of DI Diesel Sprays</b>                                |     |
| D. L. Siebers, B. S. Higgins .....                                                                                    | 253 |
| <b>Analysis of the Effect of Combustion Bowl Geometry of a DI Diesel Engine on Efficiency and Emissions</b>           |     |
| M. G. Lisbona, L. Olmo, G. Rindone .....                                                                              | 279 |
| <b>Chemical and Morphological Analysis of Particulate Matter from Differently Fuelled Passenger Car Diesel Engine</b> |     |
| M. Lapuerta, O. Armas, J. J. Hernández, R. Ballesteros .....                                                          | 295 |

## Chapter 6

### Modelling

|                                                                                                                             |     |
|-----------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Development of an Integrated Spray and Combustion Model for Diesel Simulations</b>                                       |     |
| S. Ch. Kong, C. J. Rutland, R. D. Reitz .....                                                                               | 319 |
| <b>Turbulence Generation Mechanisms in IC Engine Flows: A Numerical Study</b>                                               |     |
| I. Yavuz, I. Celik .....                                                                                                    | 335 |
| <b>Use of ILDM Reduced Chemistry in Direct Injection Diesel Engines</b>                                                     |     |
| C. Correa, H. Niemann, B. Schramm, J. Warnatz .....                                                                         | 353 |
| <b>A Zero Dimensional Simulation Model for HSDI Diesel Engines for Predicting NO<sub>x</sub>, Spray and Swirl Formation</b> |     |
| F. J. Wallace, S. Khalil Arya, J. G. Hawley, D. Dang .....                                                                  | 363 |

## Chapter 7

### Experimental Techniques

|                                            |     |
|--------------------------------------------|-----|
| <b>Laser Diagnostics of Diesel Engines</b> |     |
| T. Kamimoto, H. Kosaka .....               | 385 |

## **XII Table of Contents**

### **Swirling Flow Motion Analysis Integration Numbers and Scales**

P. Guibert, M. Truscelli, L. Lemoyne, M. Murat ..... 399

### **Experiments on Applicability of Different Laser**

#### **Diagnostics to Droplet Sizing in Diesel Sprays**

S. di Stasio, G. Valentino, F.E. Corcione.....425
