

Table of contents

Preface, Professor H. Hricak	V
Preface of the french edition, Professor L. Boccon-Gibod	VII
Foreword	IX
Embryology ; technical notes and ultrasound anatomy	1
Review of the embryology	1
The outlines	1
Congenital anomalies	2
Dystrophic cysts	5
Ultrasound anatomy	5
Technique and performance of the examination	5
The testis	7
The excretory genital passages	7
The vessels	9
The spermatic cord	11
The nerves	11
The investing layers of the scrotal sac	11
The acute scrotum	21
Inflammatory conditions of the scrotal contents	21
Torsions of the spermatic cord	23
Testicular tumors	23
Ultrasound findings	24
Traumatisms	24
Ultrasound findings	24
The chronically enlarged scrotum	57
Hydroceles	57
Definition	57
Ultrasound findings and characteristics of a hydrocele	57
Associated signs	58
Testicular tumours	59
Ultrasound diagnosis	59
Follow-up	60
Tumours and pseudotumours of the testicular appendages	60
Tumours of the testicular appendages	60
Adenomatoid tumour	60
Fibrous pseudotumour	61
Cystadenoma of the head of the epididymis	61
Rhabdomyosarcoma	61
Mesothelial hyperplasia and mesothelioma of the tunica vaginalis	61
Pseudotumours	61

Impalpable testicular tumours within a clinically normal scrotal sac .	91
Investigation of the aetiology of lymphadenopathy	91
Investigation of the aetiology of gynaecomastia	91
Unexplained and persistent scrotal pain in a young adult	92
Male infertility	101
The concept of genital ultrasound	101
Indications for genital ultrasound	101
The important steps in the performance of genital ultrasound	102
Examination of the scrotum	102
Examination of the pelvis	102
Post-surgery scrotal sac	133
Surgery of the testis	133
Orchidectomy	133
Orchidopexy	134
Lowering of ectopic testes	134
Tumourectomy	135
Surgery of the testicular appendages	135
Tunica vaginalis	135
Epididymis	135
Vas deferens	136
Surgery of infertility	136
Varicocele	136
Epididymo-deferential anastomosis	136
Neo-spermatocele	136
Calcifications of structures within the scrotum and the periscrotal region	157
Gamut of the causes of calcifications of the testicular appendages in relation to their localisation	157
Gamut of the causes of calcification within the testis	158
Gamut of the causes of calcification of the penis	158
Principal types and characteristics of calcified lesions of the testicular appendages	158
Cystic structures of the scrotal contents	175
Ultrasound appearances of an intra-scrotal cystic lesion	175
Criteria of a simple cyst	175
Cyst of/or in the region of the epididymis	176
Congenital cysts	176
Acquired cysts	176
Cysts of the tunica vaginalis	176
Cysts of the spermatic cord	176
Cysts of the tunica albuginea	176
Cysts of the testicular parenchyma	176
Alphabetical index	197
