Zum Abschnitt: *Introduction:*

Scientists and the Language Barriers (C. W. Hanson)	7
Some Remarks on the Scientific Method (Anthony Standen)	9

Zum Abschnitt: *Famous Scientists:*

Sir Isaac Newton (1642–1727)	9
Charles Darwin (1809–1882)	10
J. Robert Oppenheimer (1904–1967)	11

Zum Abschnitt: *Problems and Discoveries of Science:*

How did the Universe begin? (Robert Jastrow)	13
The Age of Matter (Victor F. Weisskopf)	15
If Nature could run backward (Lord Kelvin)	17
How Life began on Earth (Robert Jastrow)	18
Will the Earth be overcrowded One Day? (Thomas Malthus)	19
“Natural Selection” or: “The Survival of the Fittest” (Charles Darwin)	20
Why and how we speak (Norbert Wiener)	21
The Discovery of Radium (Marie Curie)	21
Possibilities of Modern Medicine (Watson Davis)	23
The Computer Revolution (Edmund C. Berkeley)	23

Zum Abschnitt: *Science in our Future World:*

Why more Science? (James B. Conant)	23
The Automobile of the Future (William H. Crouse)	24
Can a Hurricane be tamed? (Gordon E. Dunn and B. I. Miller)	25
Is it Possible to produce Artificial Rain? (Sir George Thomson)	26
Oil from the Sea (Peter Briggs)	26
The Laser (William H. Crouse)	27
Man’s Imprint on the Face of North America (Peter Farb)	28
Man and his Surroundings, or: Which Problems will the Science of Ecology have to face? (Clifford B. Knight)	28

Zum Abschnitt: *Science and the Man:*

On the Way to Independent Scientific Thinking (Francis Bacon)	30
The Importance of Observation in Science (Peter Alexander)	30
What is a Hypothesis? (W. I. B. Beveridge)	31
“The Struggle for Existence” (Charles Darwin)	32
Evolution and Ethics (T. H. Huxley)	32
The Spiritual Bearing of Science on Life (Erwin Schrödinger)	33
The Relation between Science and the Humanities (C. Roberts)	34
Science is a Sacred Cow (Anthony Standen)	35
A Letter to President Roosevelt (Albert Einstein)	36
