

Contents

1.	Introduction and historical overview	18
1.1.	Some milestones in the development of femtosecond lasers and their applications	18
1.2.	References	19
2.	Physical principles of the generation and amplification of ultrashort laser pulses	22
2.1.	Laser process and laser resonator	22
2.2.	Bandwidth of laser radiation	22
2.3.	Laser resonator	22
2.4.	Mode synchronisation (mode-locking)	23
2.5.	Amplification of fs pulses	24
2.6.	References	26
3.	Femtosecond lasers in ophthalmology: laser-tissue interaction, multiphoton imaging, biomechanical modelling	28
3.1.	Introduction	28
3.2.	Laser-tissue interaction	28
3.3.	Multiphoton imaging	30
3.4.	Biomechanical modelling	34
3.5.	Conclusions and outlook	36
3.6.	References	37
4.	Clinical application	40
4.1.	Intrastromal femtosecond laser incisions	40
4.1.1.	Introduction	40
4.1.2.	Implantation of ICRS and effects on keratoconus	40
4.1.3.	Mechanical tunnel incisions and implantation of ICRS	40
4.1.4.	Femtosecond laser-controlled tunnel incisions before ICRS implantation	41
4.1.5.	Application	41
4.1.6.	Surgery	42
4.1.7.	Case report: Ex- and reimplantation of ICRS in keratoconus with fs laser support	44
4.1.8.	Long-term postoperative results	45
4.1.9.	Summary	46
4.1.10.	References	46
4.2.	Perforating keratoplasties with the femtosecond laser	47
4.2.1.	Introduction	47
4.2.2.	High degree of flexibility in the pKPL using the femtosecond laser	47
4.2.3.	Application	48
4.2.4.	Surgery	50
4.2.5.	Results	50
4.2.6.	Case reports	51
4.2.7.	Summary	53
4.2.8.	References	53

4.3.	Penetrating keratoplasty using the TECHNOLAS femtosecond laser: The Heidelberg Experience	54
4.3.1.	Introduction	54
4.3.2.	Studies on penetrating keratoplasty with the TECHNOLAS fs laser	54
4.3.2.1.	Clinical experiences	54
4.3.2.2.	Histopathology of corneal buttons	56
4.3.2.3.	Postoperative endothelial cell count	57
4.3.3.	Results of penetrating keratoplasty by different fs laser cut designs	58
4.3.4.	References	59
4.4.	Anterior lamellar keratoplasties with the femtosecond laser	60
4.4.1.	Introduction	60
4.4.2.	Application	60
4.4.3.	Surgery	60
4.4.4.	Results	61
4.4.5.	Case reports	61
4.4.6.	Summary	63
4.4.7.	References	63
4.5.	Endothelial grafts or posterior lamellar keratoplasties with the femtosecond laser	63
4.5.1.	Introduction	63
4.5.2.	Application	63
4.5.3.	Surgery	65
4.5.4.	Results	65
4.5.5.	Case reports	65
4.5.6.	Summary	67
4.5.7.	References	67
4.6.	Astigmatic keratotomies with the femtosecond laser	67
4.6.1.	Introduction	67
4.6.2.	Indications	68
4.6.3.	Diagnostic analysis	68
4.6.4.	Application	68
4.6.5.	Surgery	69
4.6.6.	Case reports	69
4.6.7.	References	72
