

Contents

Part I Materials and Properties

A Finite Element Simulation of Longitudinal Impact Waves in Elastic Rods	3
Hesham A. Elkaranshawy and Nasser S. Bajaba	
Hamiltonian Formalisms Applied to Continuum Mechanics: Potential Use for Fracture Mechanics	19
N. Recho	
A Finite Element Solution for Transient Wave Propagation in an Infinite Circular Plate With Nonlinear Viscoelastic Model	37
Saeid Arabnejad, Manouchehr Salehi and Hamed Farahmand	
Analytical, Numerical and Experimental Study of the Effects of Braking on Single Disc Motorcycle Forks.	51
Dario Croccolo, M. De Agostinis and N. Vincenzi	
Computational Simulation in Centrifugal Casted Aluminum–Silicon Engine Cylinder Liner.	81
Valter Barragan Neto, Antonio Augusto Couto and Jan Vataavuk	
Numerical Study of Heavy Oil Flow on Horizontal Pipe Lubricated by Water	99
Tony Herbert Freire de Andrade, Kelen Cristina Oliveira Crivelaro, Severino Rodrigues de Farias Neto and Antonio Gilson Barbosa de Lima	
Bending Experiments on Thin Cylindrical Shells	119
Tohid Ghanbari Ghazijahani and Hossein Showkati	

Numerical Simulation of Cross Wedge Rolling: Influence of Die Geometry, Process Conditions and Inclusion Content of Two Steels on the Formation of Internal Defects	141
Mário Luiz Nunes da Silva and Sérgio Tonini Button	
Nonlinear Creep Model for Concrete in Analysis of Plates and Shells	163
Jure Radnić, Domagoj Matešan and Marija Smilović	
Numerical Model for Fluid–Structure Coupled Problems Under Seismic Load	175
Danijela Brzović, Goran Šunjić, Jure Radnić and Alen Harapin	
Numerical Model for the Determination of the Soil Retention Curve from Global Characteristics Obtained via a Centrifuge	199
B. Malengier, J. Kačur and P. Kišon	
Numerical Investigation of Chatter in Cold Rolling Mills	213
S. K. Dwivedy, S. S. Dhutekar and P. Eberhard	
Heavy Oils Transportation in Catenary Pipeline Riser: Modeling and Simulation.	229
Severino Rodrigues de Farias Neto, Jobsan Sueny de Souza Santos, Kelen Cristina de Oliveira Crivelaro, Fabiana Pimentel Macêdo Farias and Antonio Gilson Barbosa de Lima	
First Principle Study on the Lead-Free Perovskite Structure of SnTiO_3	251
M. F. M. Taib, K. H. K. Arifin, M. K. Yaakob, A. Chandra, A. K. Arof and M. Z. A. Yahya	
Strength Anisotropy in Prestressing Steel Wires.	259
Jesús Toribio, Beatriz González and Juan-Carlos Matos	
Tensile Characteristics of High-Toughness Steel at High Temperatures	271
S. H. Park, Y. K. Yoon and J. H. Kim	
 Part II Non-classical Materials and Structures	
Damage and Fracture Analysis of Rubber Component	289
Chang-Su Woo, Wan-Doo Kim, Hyun-Sung Park and Wae-Gi Shin	

The Thermal Shock Resistance and Mechanical Properties at Elevated Temperature of Transparent Ceramics	307
Marek Boniecki, Zdzisław Librant, Tomasz Sadowski and Władysław Wesółowski	
Analysis of the Effect of the Elliptical Ratio in Tubular Energy Absorbers Under Quasi-Static Conditions	323
Ahmad Baroutaji and Abdul Ghani Olabi	
Dynamic Response Analysis of Thermoplastic Polyurethane	337
V. Fontanari, M. Avalle, C. Migliaresi, L. Peroni and B. D. Monelli	
A Study on the Displacement Field of Nonlocal Elasticity for Mechanical Analysis of Nano Structures.	355
Emad Jomehzadeh and Ali Reza Saidi	
A Finite Element Model to Investigate the Stress–Strain Behavior of Single Walled Carbon Nanotube	369
Ehsan Mohammadpour and Mokhtar Awang	
Nonlinear Bending and Post Buckling of Functionally Graded Circular Plates under Asymmetric Thermo-Mechanical Loading	383
F. Fallah and A. Nosier	
Finite Element Analysis of the Total Forming Force of Thin-Walled Metallic Tube Junctions Employing Elastomers	419
Cristiano Roberto Martins Foli, Miguel Ângelo Menezes and Lindolfo Araújo Moreira Filho	
On the Stretching and Bending Analyses of Thin Functionally Graded Annular Sector Plates	433
H. R. Noori, E. Jomehzadeh and A. R. Saidi	
Multi-Walled Carbon Nanotubes Effect on Mechanical Properties of High Performance Fiber/Epoxy Nanocomposite	447
Mehdi Taghavi Deilamani, Omid Saligheh and Rouhollah Arasteh	
Effects of Single-Walled Carbon Nanotubes on Fiber Diameter Distribution of Poly (Butylene Terephthalate) Electrospun Composite Nanofibers	455
Mehdi Forouharshad, Omid Saligheh, Rouhollah Arasteh and Reza Eslami Farsani	

Structure, Surface and Hardness Properties of $Y_xAg_yBa_2Cu_3O_{7-\delta}$ Composites Superconductor	463
Nurulhawa Ali Hasim and Mohd Rafie Johan	
Transport Phenomena in an Evaporated Black Hole	469
R. Leticia Corral-Bustamante and Aarón Raúl Rodríguez-Corral	
Calendering Process Numerical Simulation with an Elastoviscoplastic Polymer Blend Model	483
Baya Madani and Ahmed Ouibrahim	
Condensation Issues in Ventilated Façades	497
Matthias Haase and Tore Wigenstad	
Structural Design and Experimental Investigation of a Carbon Fibre Wheel for Low Consumption Vehicle	521
Massimiliana Carello and Alessandro Scattina	
Non Linear Shear Effects on the Cyclic Behaviour of RC Hollow Piers	537
P. Delgado, A. Monteiro, A. Arêde, N. Vila Pouca, A. Costa and R. Delgado	
Heat Transfer in a Packed-Bed Cylindrical Reactor of Elliptic Cross Section: Mathematical Modeling and Simulation	549
Antonio Gilson Barbosa de Lima, Laércio Gomes de Oliveira and Wagner Celso Paiva Barbosa de Lima	
Study of Thermal and Rheological Behavior of Polystyrene/TiO₂, Polystyrene/SiO₂/TiO₂ and Polystyrene/SiO₂ Nanocomposites	573
A. Mohebbi, M. Dehghani and A. Mehrabani-Zeinabad	
Characterizing the Anisotropic Hardening Behavior of Aluminum Bonding Wires	583
Holm Altenbach, Christian Dresbach and Matthias Petzold	
Part III New Technologies	
Numerical Computation of Melting Efficiency of Aluminum Alloy 5083 During CO₂ Laser Welding Process	601
Joseph Ifeanyichukwu Achebo and Oviemuno Oghoore	

The Credibility Measure of Probabilistic Approaches in Life-Cycle Assessment of Complex Systems: A Discussion	619
Elsa Garavaglia	
Simulation of Blunt Defect Behaviour in a Thin Walled Cylinder for the Development of Structural Health Monitoring Techniques for Pipeline Repairs.	637
M. A. Murad and F. P. Brennan	
High-Low Sequence Loading Effect on the Crack Growth Rate using UniGrow Model	647
N. Nik Abdullah, Mohammad Hadi Hafezi and S. Abdullah	
Molecular Dynamics Simulation on Nano-Machining of Single Crystal Copper with a Void.	661
Seyed Vahid Hosseini, Mehrdad Vahdati and Ali Shokuhfar	
Dynamic Modeling and Control Study of the NAO Biped Robot with Improved Trajectory Planning.	671
E. Hashemi and M. Ghaffari Jadidi	
Comparison Between BEM Analysis and SONAH Measurements Using an Acoustic Camera.	689
Christian Maier, Rolf Winkler, Wolfram Pannert and Markus Merkel	
Simulation of Thin Metal Laser Lap Welding	697
Takeji ARAI	
Crack Propagation Analysis in Underwater Laser Drilling	715
Etsuji Ohmura, Takashi Okazaki, Keiichi Kishi, Toshio Kobayashi, Masahiro Nakamura, Satoshi Kubo and Komei Okatsu
