1 General Information	1	Injury Mechanism	63
Fractures Overview	1	Diagnosis	63
Fracture Classification	1	Treatment	63
Bones	3	Other Classifications of Humeral Fractures	63
Segments	3	The Neer Classification of	
Types	4	Proximal Humeral Fractures	63
Groups and Subgroups	4	Overview	63
Epidemiologic Study of Fractures	5	Clinical Epidemiologic Features	
Incidence of Sex-specific Fractures	5	for Neer Classification	66
Fracture Location	10	Classification of Humeral Fractures	
Fractures in Children	10	by Fracture Location	67
2 Fractures of the Humerus	11	Supracondylar Humeral Fractures	67
Overview	11	Intercondylar Humeral Fractures	71
Anatomic Features	11	Lateral Humeral Condylar Fractures	74
AO Classification and Coding System		Medial Humeral Condylar Fractures	77
for Humeral Fractures	12	Lateral Humeral Epicondyle Fractures	80
Clinical Epidemiologic Features		Medial Humeral Epicondyle Fractures	82
of Humeral Fractures	12	Humeral Capitellum Fractures	85
Humeral Fractures by Location	15	3 Fractures of the Ulna and Radius	89
Proximal Humeral Fractures (Segment 11)	16	Overview	89
Anatomic Features	16	Anatomic Features	89
(A) AO Classification of Proximal Humeral Fractures	17	AO Classification and Coding System	
Clinical Epidemiologic Features		for Fractures of the Ulna and Radius	89
of Proximal Fractures (Segment 11)	17	Clinical Epidemiologic Features	
Injury Mechanism	31	of Radius/Ulna Fractures	90
Diagnosis	31	Proximal Radius/Ulna Fractures (Segment 21)	94
Treatment	32	Anatomic Features	94
Humerus Shaft Fractures (Segment 12)	33	AO Classification of	
Anatomic Features	33	Proximal Radius/Ulna Fractures	94
AO Classification of Humeral Shaft Fractures	33	Clinical Epidemiologic Features of	
Clinical Epidemiologic Features of		Proximal Radius/Ulna Fractures (Segment 21)	95
Humeral Shaft Fractures (Segment 12)	34	Injury Mechanism	108
Injury Mechanism	47	Olecranon Fractures	108
Diagnosis	47	Fractures of the Radial Head or Neck	
Treatment	47	of the Radius	108
Distal Humerus Fractures (Segment 13)	48	Coronoid Fractures	108
Anatomic Features	48	Diagnosis	108
AO Classification of Distal Humeral Fractures	49	Treatment	108
Clinical Epidemiologic Features of Distal Humeral		Fractures of the Radial/Ulnar Shaft	
Fractures (Segment 13)	50	(Segment 22)	109
		Anatomic Features	109
		AO Classification of Radial/Ulnar Shaft	
		Fractures	109

Clinical Epidemiologic Features				Clinical Epidemiologic Features of	
of Radial/Ulnar Shaft Fractures (Segment 22)	110			Proximal Femur Fractures (Segment 31)	163
Injury Mechanism	123			Injury Mechanism	176
Radial Shaft Fractures	123			Diagnosis	176
Ulnar Shaft Fractures	123			Intertrochanteric Fractures	176
Fractures of the Shaft of				Femoral Neck Fractures	176
the Radius and Ulna	123			Femoral Head Fractures	176
Diagnosis	123			Treatment	177
Treatment	123			Intertrochanteric Fractures	177
				Femoral Neck Fractures	177
				Femoral Head Fractures	177
Distal Fractures of the Radius/Ulna				Diaphyseal Femur Fractures (Segment 32)	177
(Segment 23)	123			Anatomic Features	177
Anatomic Features	123			AO Classification of Diaphyseal Femur Fractures	178
AO Classification of Distal Fractures				Clinical Epidemiologic Features of	
of the Radius/Ulna	124			Diaphyseal Femur Fractures (Segment 32)	179
Clinical Epidemiologic Features of Distal Fractures				Injury Mechanism	192
of the Radius/Ulna (Segment 23)	125			Diagnosis	192
Injury Mechanism	138			Treatment	192
Diagnosis	138				
Treatment	138			Distal Femur Fractures (Segment 33)	192
				Anatomic Features	192
Other Classifications of Radius/Ulna Fractures	138			AO Classification of Distal Femur Fractures	193
Monteggia Fractures	138			Clinical Epidemiologic Features	
Overview	138			of Distal Femur Fractures (Segment 33)	193
Clinical Epidemiologic Features				Injury Mechanism	207
of Monteggia Fractures	141			Supracondylar Femur Fractures	207
Galeazzi Fractures	144			Femoral Condyle Fractures	207
Overview	144			Diagnosis	207
Clinical Epidemiologic Features				Treatment	207
of Galeazzi Fractures	144				
Colles Fractures	146			Other Classifications of Femur Fractures	207
Overview	146			Evans Classification of Trochanteric	
Clinical Epidemiologic Features				Fractures of the Femur	207
of Colles Fractures	146			Garden Classification of Femoral Neck Fractures	210
Smith Fractures	149			Pipkin Classification of Femoral Head Fractures	213
Overview	149				
Clinical Epidemiologic Features				5 Fractures of the Tibia/Fibula	217
of Smith Fractures	150			Overview	217
Barton Fractures	153			Anatomic Features	217
Overview	153			AO Classification and Coding System	
Clinical Epidemiologic Features				of Tibia/Fibula Fractures	218
of Barton Fractures	154			Clinical Epidemiologic Features	
				of Tibia/Fibula Fractures	218
4 Fractures of the Femur	157			Proximal Tibia Fractures (Segment 41)	222
Overview	157			Anatomic Features	222
Anatomic Features	157			AO Classification of Proximal Tibia Fractures	223
AO Classification and Coding System				Clinical Epidemiologic Features of	
for Femur Fractures	158			Proximal Tibia Fractures (Segment 41)	224
Clinical Epidemiologic Features of				Injury Mechanism	237
Femur Fractures	158			Diagnosis	237
				Treatment	237
Proximal Femur Fractures (Segment 31)	162				
Anatomic Features	162				
AO Classification of Proximal Femur Fractures	162				

Tibial Diaphyseal Fractures (Segment 42)	237	Further Classifications of Cervical Spine Fractures . .	311
Anatomic Features	237	Anderson Classification of	
AO Classification of Tibial Diaphyseal Fractures . . .	238	Odontoid Fractures	311
Clinical Epidemiologic Features		Hangman's Fracture	311
of Tibial Diaphyseal Fractures (Segment 42) . . .	238	Levine–Edwards Classification	
Injury Mechanism	252	of Hangman's Fracture	311
Diagnosis	252	Allen–Ferguson Classification	
Treatment	252	of Lower Cervical Spine Fractures	311
 Distal Tibia Fractures (Segment 43)	252	 Thoracolumbar Fractures (Segments 52 and 53) . .	314
Anatomic Features	252	Anatomic Features	314
AO Classification of Distal Tibia Fractures	253	AO Classification of	
Clinical Epidemiologic Features		Thoracolumbar Spine Fractures	314
of Distal Tibia Fractures (Segment 43)	254	Clinical Epidemiologic Features of Fractures of the	
Injury Mechanism	267	Thoracolumbar Spine (Segments 52 and 53) . . .	315
Diagnosis	267	Injury Mechanism	323
Treatment	267	Diagnosis	323
 Malleolar Injury (Segment 44)	267	Treatment	323
Anatomic Features	267	Further Classification of	
AO Classification of Malleolar Injury	268	Thoracolumbar Spine Fractures	324
Clinical Epidemiologic Features		Denis Classification	324
of Malleolar Injury (Segment 44)	269	 7 Fractures of the Pelvic Ring	
Injury Mechanism	282	and Acetabulum	327
Diagnosis	282	Overview	327
Treatment	282	Anatomic Features	327
 Commonly Used Classification		AO Classification and Coding System for Fractures	
for Fractures of the Tibia/Fibula	282	of the Pelvic Ring and Acetabulum	327
Tibial Plateau Fractures	282	Clinical Epidemiologic Features of Fractures	
Overview	282	of the Pelvic Ring and Acetabulum	329
Clinical Epidemiologic Features		 Pelvic Ring Fractures (Segment 61)	334
of Tibial Plateau Fractures	285	Anatomic Features	334
Pilon Fractures	288	AO Classification of Pelvic Ring Fractures	334
Overview	288	Clinical Epidemiologic Features	
Epidemiologic Features of Pilon Fractures	290	of Pelvic Ring Fractures (Segment 61)	335
 6 Spinal Fractures	293	Injury Mechanism	349
Overview	293	Diagnosis	349
Anatomic Features	293	Treatment	349
AO Classification and Coding System		 Acetabular Fractures (Segment 62)	350
for Spine Fractures	294	Anatomic features	350
Clinical Epidemiologic Features of Fractures		AO Classification of Acetabular Fractures	350
of the Spinal Column	295	Clinical Epidemiologic Features of	
 Cervical Fractures (Segment 51)	298	Acetabular Fractures (Segment 62)	350
Anatomic Features	298	Injury Mechanism	365
AO Classification of Cervical Spine Fractures	299	Diagnosis	365
Clinical Epidemiologic Features of Fractures of the		Treatment	365
Upper Cervical Spine (Segment 51.01–51.02) . .	300	Surgical Treatment	365
Clinical Epidemiologic Features of Fractures of the		 Other Classifications for Fractures	
Lower Cervical Spine (Segment 51.03–51.07) . .	306	of the Pelvic Ring and Acetabulum	366
Injury Mechanism	310	Tile Classification of Pelvic Ring Fractures	366
Diagnosis	310	Overview	366
Treatment	310		

Young–Burgess Classification			
of Pelvic Ring Fractures	370		
Overview	370		
Epidemiologic Features of Pelvic Ring fractures			
based on the Young–Burgess Classification	371		
Letournel Classification of Pelvic Ring Fractures	378		
Special Type of Pelvic Ring Fracture:			
Bilateral Sacroiliac Dislocation with			
an Intact Anterior Pelvic Ring	379		
Letournel–Judet Classification			
of Acetabular Fractures	379		
Overview	379		
Epidemiologic Features of Acetabular Fractures			
Based on the Letournel–Judet Classification	380		
Tile Classification of Acetabular Fractures	385		
8 Hand Fractures	387		
Overview	387		
Anatomic Features	387		
OTA Classification and Coding System			
for Hand Fractures	387		
Clinical Epidemiologic Features of Hand Fractures	387		
Carpal Fractures (Segments 71–76)	392		
Anatomic Features	392		
OTA Classification of Carpal Fractures	392		
Clinical Epidemiologic Features			
of Carpal Fractures (Segments 71–76)	393		
Injury of Mechanism	404		
Diagnosis	404		
Treatment	405		
Further Classification of Scaphoid Fractures	405		
Anatomic Features and Coding System	405		
Clinical Epidemiologic Features			
of Scaphoid Fractures in Adults	405		
Injury of Mechanism	411		
Diagnosis	411		
Treatment	411		
Metacarpal Fractures (Segment 77)	411		
Anatomic Features	411		
OTA Classification of Metacarpal Fractures	411		
Clinical Epidemiologic Features of Metacarpal			
Fractures in Adults (Segment 77)	411		
Injury of Mechanism	426		
Diagnosis	426		
Treatment	426		
Further Classification of Base Fractures			
of the First Metacarpal Bone	426		
Anatomic Features and Classification	426		
Clinical Epidemiologic Features of Fractures			
of the Base of the First Metacarpal Bone	427		
Injury of Mechanism	431		
Diagnosis	431		
Treatment	431		
Phalanx Fractures (Segment 78)	431		
Anatomic Features	431		
OTA Classification of Phalanx Fractures	431		
Clinical Epidemiologic Features of Phalanx			
Fractures (Segment 78)	432		
Injury of Mechanism	446		
Diagnosis	446		
Treatment	446		
Multiple Fractures (Segment 79)	446		
OTA Classification of Multiple Fractures			
of the Hand	446		
9 Foot Fractures	449		
Overview	449		
Anatomic Features	449		
OTA Classification and Coding System			
for Foot Fractures	449		
Clinical Epidemiologic Features			
of Foot Fractures	450		
Talus Fractures (Segment 81)	454		
Anatomic Features	454		
OTA Classification of Talus Fractures	454		
Clinical Epidemiologic Features of			
Talus Fractures	456		
Injury of Mechanism	467		
Diagnosis	468		
Treatment	468		
Other Common Classifications			
of Talus Fractures	468		
Calcaneus Fractures (Segment 82)	472		
Anatomic Features	472		
OTA Classification of Calcaneal Fractures	473		
Clinical Epidemiologic Features			
of Calcaneal Fractures (Segment 82)	474		
Injury Mechanism	483		
Diagnosis	483		
Treatment	484		
Other Classifications of Calcaneal Fractures	484		
Traditional Classification:			
Essex–Lopresti Classification	484		
Sanders Classification	484		
Fractures of the Tarsal Navicular Bone			
(Segment 83)	487		
Anatomic Features	487		
OTA Classification of Tarsal Navicular Fractures	487		
Clinical Epidemiologic Features			
of the Tarsal Navicular (Segment 83)	488		
Injury of Mechanism	493		
Diagnosis	493		
Treatment	493		

Cuboid Fractures (Segment 84)	493	10 Fractures of Other Locations	547
Anatomic Features	493	Fractures of the Patella (Segment 34)	547
OTA Classification of Cuboid Fractures	494	Anatomic Features	547
Clinical Epidemiologic Features		OTA Classification and Coding System	
of Cuboid Fractures (Segment 84)	494	for Patellar Fractures	547
Injury Mechanism	499	Clinical Epidemiologic Features	
Diagnosis	499	of Patellar Fractures (Segment 34)	548
Treatment	499	Injury of Mechanism	559
Cuneiform Fractures (Segment 85)	499	Diagnosis	559
Anatomic Features	499	Treatment	559
OTA Classification of Cuneiform Fractures	500	Further Classifications of Patellar Fractures	559
Clinical Epidemiologic Features		Regazzoni Classification	559
of Cuneiform Fractures (Segment 85)	500	Clavicle Fractures (Segment 15)	564
Injury Mechanism	507	Anatomic Features	564
Diagnosis	507	Anatomic Features and Muscular	
Treatment	507	Attachment of the Clavicle	565
Metatarsal Fractures (Segment 87)	507	OTA Classification and Coding System	
Anatomic Features	507	for Clavicle Fractures	566
OTA Classification of Metatarsal Fractures	508	Clinical Epidemiologic Features	
Clinical Epidemiologic Features		of Clavicle Fractures (Segment 15)	566
of Metatarsal Fractures (Segment 87)	509	Injury of Mechanism	571
Injury Mechanism	524	Diagnosis	571
Diagnosis	524	Treatment	571
Treatment	524	Further Classifications of Clavicle Fractures	572
Phalangeal Fractures (Segment 88)	524	Allman Classification of Clavicle Fractures	572
Anatomic Features	524	Robinson Classification of Clavicle Fractures ...	577
OTA Classification of Phalangeal Fractures	525	Scapular Fractures (Segment 14)	580
Clinical Epidemiologic Features		Anatomic Features	580
of Phalangeal Fractures (Segment 88)	526	OTA Classification and Coding System	
Injury Mechanism	541	for Scapular Fractures	581
Diagnosis	541	Epidemiologic Features of Scapular Fractures	
Treatment	541	(Segment 14)	581
Multiple Fractures of the Foot (Segment 89)	541	Injury of Mechanism	594
Clinical Epidemiologic Features of Multiple		Diagnosis	594
Fractures of the Foot (Segment 89)	541	Treatment	594
OTA Classification of Multiple Fractures		Further Classifications of Scapular Fractures	595
of the Foot	541	Coracoid Process Fractures	595
Additional Multiple Foot Fractures		Acromion Fractures	601
not Included in OTA Classification	544	Scapular Neck Fractures	606
		Glenoid Fractures	612
		Index	618
