

Contents

Preface

Bernard Bäker, Lutz Morawietz

1	North American Automotive Market and Technology Trends in Interior Mechatronics	1
	Walter Maisel	
2	Predictions, an Approach Based on the Development of Selected Technologies	4
	Gerhard Hettich	
3	ISO 26262: A Work Product Oriented View	14
	Bernhard Hohlfeld	
4	Aspects of Function Partitioning in Respect to Power Management	25
	Gregor Walla, Andreas Barthels, Florian Ruf, Robert Dörfel, Hans-Ulrich Michel, Joachim Fröschl, Uwe Baumgarten, Hans-Georg Herzog, Walter Stechele, Andreas Herkersdorf	
5	Generating Optimized Stochastic Power Management Strategies for Electric Car Components	36
	Matthias Fruth, Steve Bastian	
6	Integrated Approach for Efficient Energetic Evaluation of Vehicles Using Virtual Methods	46
	Christian Kehrner, Stefan Mohr	
7	Combined Simulation of Energy and Thermal Management for an Electric Vehicle	60
	Björn Mohrmann, Peter Jeck, Carsten Simon, Jochen Ungermann	
8	InEco: Energy Efficiency by Ultra-Lightweight Composite Construction	75
	Werner Hufenbach, Jens Werner, Jörn Kiele, Thomas Methner	
9	Converted Vehicle for Battery Electric Drive: Aspects on the Design of the Software-Driven Vehicle Control Unit	85
	Martin Gießler, Alexander Fritz, Jens Paul, Oliver Sander, Frank Gauterin, Klaus D. Müller-Glaser	

10	Möglichkeiten und Herausforderungen bei Dienstleistungen für die energieeffiziente Mobilität	98
-	Tilman Werner, Frank Wustmann	
11	Simulation and Evaluation of (eVehicle) Charging Strategies Based on Renewable Energy Availability	107
	Torsten Schwan, René Unger, Bernard Bäker, Beate Mikoleit, Kevin Krebs	
12	Causes for Torque Degradation During Deceleration and the Effect on the Driving Range of Battery Electric Vehicles	116
	Johannes Lieb, Andreas Wilde, Bernard Bäker	
13	Investigation into the Traction System of Battery-Driven Vehicle (Electric Motorcar) with Super Capacitors	127
	Oleksandr Kuzomin, Mykhailo Gurtovyi, Artur Kirylyuk, Viktor Pismenckiy, Mykola Slipchenko	
14	Dual Voltage Power Supply with 48 Volt	135
	Joachim Fröschl, Hartmut Pröbstle, Ottmar Sirch	
15	Determining an Energy-Optimal Thermal Management Strategy for Electric Driven Vehicles	151
	Andre Suchanek, Tobias Probst, Fernando Puente León	
16	Thermoelectric Generator Systems for Waste Heat Usage in Diesel Electric Vehicles	164
	Alexander Heghmanns, Robert Schimke, Michael Beitelschmidt, Karlheinz Geradts	
17	Performance and Efficiency of a Hydraulic Hybrid Powertrain	174
	Mohammad Ali Karbaschian, Dirk Söffker	
18	Efficiency Optimization for Transmissions in Customer Operation	188
	Kathrien Inderwisch, Ferit Küçükay, Rashad Mustafa	
19	Loss Minimization Control and Efficiency Determination of Electric Drives in Traction Applications	195
	Thomas Windisch, Wilfried Hofmann	

The Authors
