Preface / xv

Chapter 1 Component Database Systems: Introduction, Foundations, and Overview / 1

Klaus R. Dittrich, Andreas Geppert

- 1.1 Introduction / 2**
- 1.2 The Need for Componentized DBMSs / 4**
 - 1.2.1 Handling Nonstandard Data Types / 4
 - 1.2.2 Data Integration / 5
 - 1.2.3 Downsized Database Systems / 6
 - 1.2.4 Discussion / 7
- 1.3 Prerequisites and Foundations of CDBMSs / 8**
 - 1.3.1 DBMS Architecture / 8
 - 1.3.2 Components and Database Management System Architecture / 10
- 1.4 Related Work: The Roots of CDBMSs / 12**
 - 1.4.1 Kernel Systems / 12
 - 1.4.2 Pure Extensible Database Systems / 13
 - 1.4.3 Customizable Systems / 13
 - 1.4.4 Toolkit Systems / 14
 - 1.4.5 Transformational Systems / 15
 - 1.4.6 Generators / 16
 - 1.4.7 Frameworks / 17
 - 1.4.8 Discussion / 17
- 1.5 Component Database Models / 19**
 - 1.5.1 Plug-in Components / 19
 - 1.5.2 Database Middleware / 22
 - 1.5.3 DBMS Services / 24
 - 1.5.4 Configurable DBMS / 26
 - 1.5.5 Discussion / 27
- 1.6 Summary and Conclusion / 28**

Chapter 2 Distributed Component Database Management Systems / 29

Paul Brown

- 2.1 Introduction / 30**
 - 2.1.1 Why Distributed ORDBMSs? / 31
 - 2.1.2 Description of the Example Application / 33
 - 2.1.3 Chapter Overview / 35
- 2.2 Single-Site Component DBMSs / 35**
 - 2.2.1 ORDBMS Abstract Data Model / 35
 - 2.2.2 Component Standards and Integration / 37
 - 2.2.3 Query-Processing Overview / 42
 - 2.2.4 ORDBMS Query Optimization / 45
 - 2.2.5 Internal Architecture of ORDBMS / 49
 - 2.2.6 Function Manager / 51
- 2.3 Distributed Component DBMSs / 52**
 - 2.3.1 Overview of Query Processing in Distributed ORDBMS / 54
 - 2.3.2 Distributed Extensions to SQL / 56
 - 2.3.3 Query Processing in Distributed ORDBMSs / 59
 - 2.3.4 External Storage Interfaces / 61
 - 2.3.5 Distributed Processing / 65
 - 2.3.6 Distributed Data Movement / 68
- 2.4 Summary / 69**

Chapter 3 All Your Data: The Oracle Extensibility Architecture / 71

Sandeepan Banerjee, Vishu Krishnamurthy, Ravi Murthy

- 3.1 Overview / 72**
- 3.2 Extensible Type System / 76**
 - 3.2.1 Object Types / 76
 - 3.2.2 Collection Types / 76
 - 3.2.3 Relationship Types / 77
 - 3.2.4 Large Objects / 77
 - 3.2.5 Opaque Types / 77
- 3.3 Server Execution Environments / 78**
 - 3.3.1 Java / 78
 - 3.3.2 PL/SQL / 79
 - 3.3.3 C and C++ / 79
 - 3.3.4 Safe Execution / 80
- 3.4 Extensible Indexing and Operators / 81**
 - 3.4.1 Index-Organized Tables / 82
 - 3.4.2 Function-Based Indexing / 83
 - 3.4.3 User-Defined Operators / 85

3.5	Defining a Text-Indexing Scheme / 86
3.5.1	Using the Text-Indexing Scheme / 88
3.6	Extensible Optimizer / 88
3.6.1	Statistics / 89
3.6.2	Selectivity / 90
3.6.3	Cost / 92
3.7	User-Defined Aggregates / 93
3.7.1	Using the User-Defined Aggregates / 95
3.8	Abstract Tables / 96
3.8.1	Table Functions / 98
3.9	Cartridge Basic Services / 100
3.9.1	Memory Management / 100
3.9.2	Parameter Management / 100
3.9.3	Internationalization / 100
3.9.4	Error Reporting / 101
3.9.5	Context Management / 101
3.9.6	File I/O / 101
3.10	Case Studies / 101
3.10.1	The Oracle8i <i>interMedia</i> Text Data Cartridge / 101
3.10.2	The Oracle8i Spatial Data Cartridge / 102
3.10.3	The Oracle8i Visual Information Retrieval Data Cartridge / 103
3.11	Conclusion / 104

Chapter 4 Extensible Indexing Support in DB2 Universal Database / 105

Stefan DeBloch, Weidong Chen, Jyh-Herng Chow, You-Chin (Gene) Fuh, Jean Grandbois, Michelle Jou, Nelson Mattos, Raiko Nitzsche, Brian Tran, Yun Wang

4.1	Introduction / 106
4.2	Hard-Wired Indexing / 108
4.3	High-Level Indexing of User-Defined Types / 109
4.3.1	Index Maintenance / 110
4.3.2	User-Defined Predicates and Search-Key Generation / 112
4.3.3	Index Exploitation / 114
4.3.4	Implementation and Predicate Filtering / 114
4.4	Applications / 118
4.4.1	Indexing for Geographical Information System Applications / 118
4.4.2	Indexing on XML Documents / 121

4.5	Loose Integration of External Search Engines / 124
4.5.1	DB2 Text Extender Overview / 124
4.5.2	Exploiting High-Level User-Defined Indexing / 127
4.5.3	Generalization for Arbitrary Predicates / 129
4.6	Performance / 132
4.7	Related Work and Conclusion / 134

Chapter 5 Enabling Component Databases with OLE DB / 139

José A. Blakeley and Michael J. Pizzo

5.1	Introduction / 140
5.2	Universal Data Access / 141
5.3	OLE DB: A Component Data Model / 143
5.3.1	The Microsoft Component Object Model / 143
5.3.2	Introspection via Properties / 146
5.3.3	Common Abstractions / 147
5.3.4	Common Extensions / 149
5.4	Services / 154
5.4.1	Adding Generic Connection Facilities through Data Link / 155
5.4.2	Adding Common Resource-Pooling Facilities / 155
5.4.3	Providing a Rich Client-Cursor Service / 156
5.5	Custom Data Providers / 157
5.6	Component Database Scenarios / 158
5.6.1	Database Server / 159
5.6.2	Distributed and Heterogeneous Query Processing / 160
5.6.3	Full-Text Queries on Relational Data / 162
5.6.4	Distributed Transformation Services / 164
5.6.5	Online Analytical Processing Services / 166
5.7	Microsoft Data Access Software Developer's Kit / 167
5.7.1	Documentation / 167
5.7.2	ActiveX Data Objects (ADO) / 168
5.7.3	OLE DB Data Providers / 170
5.7.4	Simple Provider Toolkit / 170
5.7.5	Test Tools / 171
5.7.6	Samples / 171
5.8	Summary / 171

Chapter 6 An Architecture for Transparent Access to Diverse Data Sources / 175

Mary Tork Roth, Peter Schwarz, and Laura Haas

- 6.1 Introduction / 176
- 6.2 System Overview / 178
- 6.3 Goals for the Wrapper Component Architecture / 179
- 6.4 Building a Wrapper / 180
 - 6.4.1 Modeling Data as Objects / 180
 - 6.4.2 Method Invocation / 183
 - 6.4.3 Query Planning / 186
 - 6.4.4 Query Execution / 195
 - 6.4.5 Wrapper Packaging / 198
- 6.5 Wrapper Implementations / 200
- 6.6 Related Work / 202
- 6.7 Conclusion / 205

Chapter 7 Building Component Database Systems Using CORBA / 207

M. Tamer Özsu and Bin Yao

- 7.1. Introduction / 208
- 7.2 Object Management Architecture / 209
- 7.3 Common Object Request Broker Architecture / 211
 - 7.3.1 Interface Definition Language / 212
 - 7.3.2 Client-CORBA Object Communication / 217
 - 7.3.3 Object Adapters / 221
 - 7.3.4 ORB Interoperability / 224
- 7.4 Common Object Services / 224
 - 7.4.1 Naming Service / 225
 - 7.4.2 Event Service / 225
 - 7.4.3 Life-Cycle Service / 226
 - 7.4.4 Persistent Object Service / 226
 - 7.4.5 Transaction Service / 227
 - 7.4.6 Concurrency Control Service / 227
 - 7.4.7 Query Service / 227
 - 7.4.8 Collections Service / 228
 - 7.4.9 Other Object Services / 228
- 7.5 Common Facilities / 229
- 7.6 Building Componentized Applications / 229

7.7	CORBA and Database Interoperability / 233
7.7.1	Object Granularity / 234
7.7.2	Object Interfaces / 234
7.7.3	Association Mode / 234
7.7.4	Call Mode / 235
7.7.5	Concurrently Active Objects / 235
7.8	Conclusion / 235

Chapter 8 The Architecture of a Database System for Mobile and Embedded Devices / 237

Heiko Bobzin

8.1	Introduction / 238
8.2	The Idea of a Pure Java Database Management System / 238
8.3	User API and Object Model / 239
8.3.1	Implementation / 240
8.3.2	Database / 240
8.3.3	Transaction / 241
8.3.4	Collections / 241
8.4	Object Management 242
8.5	Transaction Management / 243
8.6	Concurrency Control / 244
8.7	Backend / 245
8.8	Distributed Applications / 246
8.9	Event Management / 247
8.10	Log Service / 248
8.11	Postprocessing / 249
8.12	On-Demand Assembly of Components / 250
8.13	Outlook / 251

Chapter 9 Conclusions and Perspectives / 253

Andreas Geppert and Klaus R. Dittrich

9.1	Achievements / 254
9.2	Open Issues / 255
9.2.1	Adequate Support for Components / 255
9.2.2	Application Development Using CDBMSs / 256
9.2.3	Performance Issues / 258
9.2.4	Development of CDBMS Components / 259
9.3	The End (Is Not Yet Near) / 260

Bibliography / 263

Index / 281

About the Authors / 290
