

<b>Standard sections</b>	(front cover flap)	<b>LESSON 4</b>	<b>Abdomen</b>
<b>Physical Principles and Technique</b>		<b>Kidneys</b>	
Image formation, sound transmission, reflection	6	Normal findings	45
Echogenicity, frequency range	7	Normal variants and cysts	46
Operation and types of sonographic equipment	8	Kidneys and collecting system in pediatrics:	
Selection of sonographic equipment and transducers	9	Normal findings	47
		Changes of the renal parenchyma	48
		Atrophy and inflammation	49
<b>New Imaging Techniques</b>		Urinary obstruction	50
Panorama imaging, 3D, Photopic® imaging	10	Differential diagnosis of urinary obstruction	51
Harmonic imaging	11	Urinary obstruction and reflux in pediatrics:	52
Phase inversion, contrast enhancers	12	Voiding cystourethrogram (VCUG)	53
SonoCT®	13	Renal stones and infarcts	54
		Tumors of the kidneys and adrenal glands	55
<b>Artifacts</b>		Tumors of the kidneys and adrenal glands in pediatrics	56
Reverberation, section thickness, acoustic enhancement	14		
Acoustic shadowing, mirror effect	15	<b>Urinary bladder</b>	
Side-lobe artifacts, quiz for self-assessment	16	Normal findings	57
		Indwelling catheter and cystitis	58
<b>Practical Tips and Tricks for the Beginner I / II</b>	17	Urinary bladder in pediatrics	59
<b>LESSON 1</b>	<b>Abdomen</b>	<b>Renal Transplants (RT)</b>	
<b>Retroperitoneum, Sagittal Plane</b>		Normal findings	60
Superior retroperitoneum: normal findings	19	Complications	61
Inferior retroperitoneum: normal findings	20	Quiz for self-assessment	62
Aortic ectasia and aneurysm	21		
Lymph nodes: disease-specific assignment	22	<b>LESSON 5</b>	<b>Abdomen</b>
Other clinical cases	23	<b>Gastrointestinal Tract (GIT)</b>	
Quiz for self-assessment	24	Upper GI Tract: Stomach, pyloric hypertrophy	63
		Upper GI Tract: Small bowel:	
		Crohn's disease, ascites, hernias	65
		GIT in children: Invagination, contrast enema	66
		Appendicitis, diarrhea, Hirschsprung disease	67
		Colon: coprostasis, colitis, diverticulitis	68
<b>LESSON 2</b>	<b>Abdomen</b>		
<b>Upper Abdomen, Transverse Plane, Pancreas</b>		<b>Spleen</b>	
Basic anatomy	25	Normal findings, curtain trick	69
Normal findings	26	Diffuse splenomegaly, systemic hematologic diseases	70
Acute and chronic pancreatitis,	27	Focal lesions: infarcts, lymphomatous infiltration,	71
age-related echogenicity		and other conditions	
Pancreas, additional cases	28	Organometry, quiz for self-assessment	72
Lymph nodes	29		
Porta hepatis: normal findings	30	<b>LESSON 6</b>	<b>Reproductive Organs (M. Hofer, T. Reihls)</b>
Porta hepatis: portal hypertension, lymph nodes	31	<b>Male Reproductive Organs</b>	
Quiz for self-assessment	32	Prostate gland, prostate hypertrophy,	73
		testis and scrotum	
<b>LESSON 3</b>	<b>Abdomen</b>	Undescended testis, orchitis, epididymitis	74
<b>Liver</b>		Hydrocele, inguinal hernia	
Organ size, lateral angle; gallbladder	33		
Hepatic venous star, right heart failure	34	<b>Female Reproductive Organs</b>	
Normal variants, fatty liver	35	Endovaginal sonography, image orientation	75
Focal fatty infiltration	36	Uterus: normal findings, intrauterine device	76
Cysts, parasites, and hemangiomas	37	Uterus tumors: myoma, adenocarcinoma	77
Other focal hepatic changes, pneumobilia	38	Ovaries: normal findings, volumetry, cycle phases	78
Cirrhosis and hepatocellular carcinoma	39	Ovaries: cysts, tumors, infertility treatment	79
Hepatic metastases, quiz question	40	Pregnancy testing	80
		Placenta position and gender determination	81
<b>Gallbladder and Biliary Ducts</b>		Biometry in the 1st trimester: CCD, YS, CRL	82
Biliary ducts: cholestasis	41	Biometry in the 2nd and 3rd trimesters: BPD, FL, AC	83
Gallstones and polyps	42		
Gallbladder: cholecystitis	43		
Quiz for self-assessment, liver and gallbladder	44		

<b>Malformations</b>	
Cerebellum and CSF spaces	84
Spine: anatomy, spina bifida	85
Facial bones, nuchal translucency, hydrops fetalis	86
Heart and vessels, cardiac shunts	87
GIT, omphalocele, kidneys	88
Extremities, skeleton, clubfoot	89
Quiz for self-assessment, reproductive organs	90

LESSON 7

Head and Neck

<b>Head in Newborns</b>	
Normal findings, coronal plane	91
CSF spaces, normal findings, sagittal plane	93
Normal variants: cavum septi pellucidi, corpus callosum agenesis	95
Hemorrhage: pathophysiology, sonographic morphology	96
Hydrocephalus, cerebral atrophy	97
Hydrocephalus and spinal canal	98
<b>Thyroid Gland</b>	
Normal findings, anatomy, volumetry	99
Pathologic cases: Struma	100
Focal solid nodule, thyroiditis, organometry	101
<b>Neck</b>	
Lymph nodes (LN): Signs of malignancy	102
Quiz for self-assessment head and neck	103
<b>Pediatrics: Hip joints</b>	
Correct positioning, angle measurements	104
Classification of infant hips according to Graf; transient synovitis of the hip	105
<b>Appendix</b>	
Answers to the quiz questions	106
Diagrams for standard sections (to be copied)	110
Primer of Sonographic Evaluation	112
Index	116
Template of Normal Ultrasound Report	117
Acknowledgment	118
Table of normal values in prenatal care	119
Table of normal values in adults	(back cover flap)
Legends with the numbers to the diagrams	(opened back cover flap)

# Where Do I Find a Particular Chapter?

<b>Physical Principles</b>	<b>6</b>
----------------------------	----------

<b>LESSON 1</b>	
<b>Retroperitoneum</b>	<b>19</b>
<b>LESSON 2</b>	
<b>Transverse Sections of the UA, Pancreas</b>	<b>25</b>
<b>LESSON 3</b>	
<b>Liver, Gallbladder, Biliary Ducts</b>	<b>33</b>
<b>LESSON 4</b>	
<b>Adrenal Glands, Kidneys, Urinary Bladder, RT</b>	<b>45</b>
<b>LESSON 5</b>	
<b>Gastrointestinal Tract, Spleen</b>	<b>63</b>
<b>LESSON 6</b>	
<b>Reproductive Organs, Malformations</b>	<b>73</b>
<b>LESSON 7</b>	
<b>Head and Neck</b>	<b>91</b>
<b>Answers to the Quiz, Sonography Primer</b>	<b>106</b>
