Norbert Knarr

Translation Planes

Foundations and Construction Principles

Springer

Table of Contents

Introduction 1

1. Foundations 5
   1. Translation Planes and Spreads 5
   2. Quasifields and Spread Sets 10
   3. Isomorphisms and Collineations of Translation Planes 15
   4. Some Topological Tools 20
   5. Locally Compact Connected Translation Planes 21
   6. The Transposition of Translation Planes 23

2. Spreads of 3-dimensional Projective Spaces 25
   1. The Klein Quadric 25
   2. Transversal Mappings 26
   3. Betten's Variant 29
   4. Indicator Sets 31
   5. L_1-indicator Sets 33
   6. The Kinematic Mapping 36
   7. A_1-indicator Sets 37

3. Kinematic Spaces 40
   1. Stretch Translation Spaces 41
   2. Euclidean Motion Groups 42
   3. Minkowskian Motion Groups 43
   4. Elliptic Motion Groups 45
   5. Other Kinematic Spaces 46

4. Examples and Supplements 48
1. André Planes 48
2. Remarks on the Collineation Group 49
3. Indicator Sets and Quasifields 51
4. Reguli and Flocks of Reguli 55

5. Locally Compact 4-dimensional Translation Planes 61
1. Topological Spreads of a 4-dimensional Real Vector Space 61
2. Flocks of Reguli in Topological Spreads 64
3. Locally Compact 4-dimensional Translation Planes with Large Collineation Group 65

6. Planes of Lenz Type V with Complex Kernel 78
1. Locally Compact Translation Planes with Complex Kernel 78
2. Locally Compact Planes of Lenz Type V with Complex Kernel ... 79
3. Proof of Theorem 6.6 84

7. Locally Compact Translation Planes of Higher Dimension .. 95
1. Contractions of Normed Algebras and Topological Spreads 95
2. Locally Compact Translation Planes with Large Collineation Group 98

Generalizations and Extensions 104

Bibliography 105
