Michael Sperling

Atomic Absorption Spectrometry

Third, Completely Revised Edition

 **WILEY-VCH**

Weinheim • New York • Chichester • Toronto • Brisbane • Singapore

Contents

1	The Historical Development of Atomic Absorption.....	1
1.1	The Early History.....	1
1.2	Sir Alan Walsh and the Period 1952–1962.....	3
1.3	The Development of Spectral Radiation Sources.....	7
1.4	Single-beam, Double-beam, Single-channel, Multi-channel.....	12
1.5	The Non-specific Attenuation of Radiation.....	15
1.6	Burners and Flames.....	20
1.7	Electrothermal Atomization.....	27
1.7.1	Boris L'vov and the Graphite Cuvette.....	27
1.7.2	Walter Slavin and the STPF Concept.....	35
1.7.3	The Two-step Atomizer.....	38
1.7.4	Graphite Tubes and Other Atomizers.....	41
1.8	Chemical Vapor Generation.....	47
1.8.1	The Cold Vapor Technique.....	47
1.8.2	The Hydride-Generation Technique.....	49
1.8.3	Further Techniques of Chemical Vapor Generation.....	55
1.9	Analysis of Solid Samples.....	56
2	Physical Principles.....	63
2.1	Atomic Structure and Spectra.....	63
2.1.1	Atomic Structure.....	63
2.1.2	Atomic Spectra.....	63
2.1.3	Selection of the Spectral Lines.....	65
2.2	Thermal Equilibrium.....	69
2.3	Line Width and Line Profile.....	74
2.3.1	Natural Line Width.....	75
2.3.2	Doppler Broadening.....	76
2.3.3	Collisional Broadening.....	77
2.3.4	Self-absorption and Self-reversal.....	80
2.3.5	Convolution of the Various Broadening Mechanisms.....	81
2.4	Hyperfine Structure.....	83
2.5	Measuring the Absorption.....	86
2.5.1	The Absorption Coefficient.....	86
2.5.2	The Beer-Lambert Law.....	89
2.5.3	Deviations from the Linearity of the Calibration Function.....	92
2.6	The Zeeman Effect.....	96
3	Spectrometers.....	103
3.1	Radiation Sources.....	103
3.1.1	Line Sources.....	103
3.1.2	Continuum Sources.....	110

3.2	The Radiation Train	110
3.3	Dispersion and Separation of the Radiation.....	113
3.3.1	Spectral Slitwidth.....	115
3.3.2	Reciprocal Linear Dispersion.....	119
3.4	The Measurement and Correction of Background Attenuation ...	120
3.4.1	Background Correction with Continuum Sources	121
3.4.2	Background Correction Utilizing the Zeeman Effect	123
3.4.3	Background Correction with High Current Pulsing.....	133
3.5	The Detection of Radiation	136
3.6	The Modulation of Radiation.....	138
3.7	Simultaneous Spectrometers	139
3.8	Data Acquisition and Output.....	142
3.8.1	Measured Quantities.....	143
3.8.2	Signal Handling.....	144
3.8.3	Baseline Offset Correction	146
3.8.4	Integrated Absorbance	147
4	Atomizers and Atomizer Units.....	149
4.1	Flame Atomization.....	149
4.1.1	Spectroscopic Flames.....	150
4.1.2	Nebulizer-Burner Systems	154
4.1.2.1	Burner Heads.....	154
4.1.2.2	Nebulizers and Spray Chambers	156
4.1.3	Special Introduction Techniques for the Measurement Solution.	166
4.1.3.1	The Injection Technique	166
4.1.3.2	The Use of Pumps	167
4.1.3.3	Flow Injection	167
4.1.3.4	Hydraulic High Pressure Nebulization.....	169
4.2	Electrothermal Atomization.....	170
4.2.1	Graphite Structure and Reactivity	171
4.2.2	Graphite Atomizers	175
4.2.2.1	Dimensions of Graphite Tubes.....	175
4.2.2.2	Profiled Tubes	178
4.2.2.3	Platforms	179
4.2.2.4	Probes.....	182
4.2.2.5	Temporally and Spatially Isothermal Atomizers	183
4.2.3	Heating Rate and Temperature Program.....	185
4.2.4	Protective Gas and Purge Gas	188
4.2.5	Metal Atomizers.....	192
4.2.6	Atomizer Units for GF AAS	193
4.2.7	Analysis of Solid Samples	197
4.2.7.1	Direct Analysis of Solid Samples	197
4.2.7.2	Aids for Direct Solids Analysis.....	198
4.2.7.3	Analysis of Suspensions.....	200
4.2.8	Simultaneous Multielement Determinations.....	202

4.3	Chemical Vapor Generation.....	203
4.3.1	Systems for Chemical Vapor Generation.....	203
4.3.1.1	Batch Systems	203
4.3.1.2	Flow Systems	206
4.3.1.2.1	Continuous flow systems	206
4.3.1.2.2	Flow injection systems.....	208
4.3.1.2.3	Gas-liquid separators (GLS)	209
4.3.1.2.4	On-line sample preparation.....	211
4.3.1.3	Materials for Containers and Tubing	212
4.3.1.4	Special Apparatus for CV AAS	214
4.3.2	Collection and Preconcentration	215
4.3.2.1	Preconcentration of Mercury.....	215
4.3.2.2	Preconcentration of Hydrides.....	217
4.3.3	Atomization Units	217
4.3.3.1	Absorption Cells for CV AAS	218
4.3.3.2	Atomization Units for HG AAS.....	218
5	The Individual Steps of an Analytical Method.....	221
5.1	Sampling and Sample Preparation	222
5.1.1	Sampling	222
5.1.2	Sample Conservation and Storage	223
5.1.3	Sample Pretreatment	226
5.2	Measurement, Calibration, Evaluation.....	229
5.2.1	Samples and Measurement Solutions.....	229
5.2.2	Calibration.....	234
5.2.2.1	Standard Calibration Technique.....	235
5.2.2.2	Bracketing Technique	238
5.2.2.3	Analyte Addition Technique.....	239
5.2.2.4	Reference Element Technique	241
5.2.2.5	Selection of the Calibration Function and Its Quality of Fit.....	242
5.2.3	Evaluation	244
5.2.3.1	Evaluation Function and Sensitivity	245
5.2.3.2	Precision.....	246
5.2.3.3	Limits of Detection, Identification, and Quantitation	252
5.2.3.4	Measurement Range; Working Range	256
5.2.3.5	Trueness	261
5.3	Optimizing Instruments and Methods.....	263
5.3.1	Error Recognition and Instrument Optimization	263
5.3.2	Determining Smaller Concentrations or Masses	267
5.3.3	Determining Higher Analyte Contents.....	271
5.4	Interferences in AAS.....	274
5.4.1	Classification of Interferences.....	274
5.4.1.1	Spectral Interferences.....	274
5.4.1.2	Non-spectral Interferences	281
5.4.2	Recognizing Interferences.....	283

5.4.3	Avoiding and Eliminating Interferences	285
5.4.3.1	Eliminating Spectral Interferences	285
5.4.3.2	Elimination of Non-spectral Interferences	287
5.5	Methods Development, Quality Control and Quality Assessment	290
5.5.1	Methods Development and Validation	291
5.5.2	Internal Quality Control	294
6	Mechanization and Automation	297
6.1	Flow Injection	297
6.2	Automatic Transport and Change of Measurement Solutions	300
6.3	Automatic Addition of Reagents or Calibration Solutions	301
6.4	Automatic Dilution	302
6.5	Automatic Separation and Preconcentration	305
6.5.1	FI On-line Sorbent Extraction	306
6.5.2	FI On-line Precipitation and Coprecipitation	313
6.5.3	FI On-line Solvent Extraction	315
6.6	On-line Sample Pretreatment	316
6.7	Automatic Setup and Optimization of Instrument Functions	317
6.8	Automatic Data Handling	318
7	Speciation Analysis	323
7.1	Non-chromatographic Separation Techniques	324
7.1.1	The Hydride-generation Technique	324
7.1.2	Preconcentration on Packed Columns	324
7.2	Chromatographic Separation Techniques	326
7.2.1	Gas Chromatographic (GC) Separation	326
7.2.2	Liquid Chromatographic (HPLC) Separation	329
7.2.3	The Coupling of Hydride-generation, Preconcentration, and GC Separation	332
8	The Techniques of Atomic Absorption Spectrometry	335
8.1	The Flame Technique	335
8.1.1	Atomization in Flames	335
8.1.1.1	The Process of Volatilization	336
8.1.1.2	The Process of Dissociation	337
8.1.1.3	Deviations from Equilibrium	339
8.1.1.4	The Kinetic Aspect	340
8.1.1.5	The Solvent Effect	341
8.1.2	Interferences	342
8.1.2.1	Spectral Interferences	342
8.1.2.2	Transport Interferences	343
8.1.2.3	Spatial-distribution Interferences	345
8.1.2.4	Solute-volatilization Interferences	346
8.1.2.4.1	The volatilization of particles	346
8.1.2.4.2	Reactions during volatilization	348

8.1.2.4.3	The alkaline-earth elements	350
8.1.2.4.4	The flame effect	355
8.1.2.5	Vapor-phase Interferences	357
8.1.2.5.1	Dissociation interferences	358
8.1.2.5.2	Ionization interferences	358
8.2	The Graphite Furnace Technique	361
8.2.1	The Atomization Signal	362
8.2.2	Methods to Elucidate Mechanisms	366
8.2.2.1	Atomic and Molecular Spectrometric Techniques	367
8.2.2.1.2	Pyrolysis and atomization curves	367
8.2.2.1.2	Time-resolved signals	368
8.2.2.1.3	Molecular absorption	372
8.2.2.1.4	Time-resolved and spatially-resolved measurements	373
8.2.2.2	Techniques for Investigating the Gas Phase	377
8.2.2.2.1	ETV-F AAS and ETV-ICP-MS	377
8.2.2.2.2	Mass spectrometric (MS) investigations	377
8.2.2.3	Techniques for Investigating the Condensed Phase	379
8.2.2.3.1	The use of radiotracers	379
8.2.2.3.2	Electron microscopy	380
8.2.2.3.3	X-ray diffraction analysis (XRD)	381
8.2.2.3.4	Miscellaneous techniques of surface analysis	381
8.2.2.4	Derived Procedures and Techniques	383
8.2.2.4.1	Arrhenius diagrams	383
8.2.2.4.2	High-temperature equilibria calculations	384
8.2.2.4.3	Monte Carlo simulation techniques	384
8.2.3	Atomization Mechanisms	384
8.2.3.1	The Alkali Metals	387
8.2.3.2	The Alkaline-earth Elements	387
8.2.3.3	Yttrium and the Rare-earth Elements (REE)	389
8.2.3.4	Vanadium, Chromium, and Molybdenum	390
8.2.3.5	Manganese and the Iron Group	392
8.2.3.6	The Noble Metals	394
8.2.3.7	Zinc and Cadmium	395
8.2.3.8	Aluminium and Boron	395
8.2.3.9	Gallium, Indium, Thallium	399
8.2.3.10	Silicon, Germanium, Tin	400
8.2.3.11	Lead	402
8.2.3.12	Arsenic	404
8.2.3.13	Selenium	406
8.2.4	Interferences	409
8.2.4.1	The STPF Concept	409
8.2.4.1.1	Chemical modification	410
8.2.4.1.2	Isothermal atomization	415
8.2.4.1.3	Control of the atmosphere in the atomizer	416
8.2.4.2	Spectral Interferences	418
8.2.4.3	Non-spectral Interferences	424

8.2.4.3.1	Classification of non-spectral interferences	424
8.2.4.3.2	Interference mechanisms.....	425
8.2.4.3.3	Avoiding non-spectral interferences	428
8.2.5	Absolute Analyses.....	432
8.3	The Hydride-generation Technique	434
8.3.1	Generation and Transport of the Hydride	434
8.3.1.1	Reduction to the Hydride	434
8.3.1.2	Driving the Hydride out of Solution	435
8.3.1.3	The Influence of the Hydride-generation System	436
8.3.1.4	The Influence of the Oxidation State of the Analyte	437
8.3.1.5	Transport of the Hydride.....	439
8.3.2	The Atomization of Hydrides.....	440
8.3.2.1	Non-heated Flame-in-tube Atomizers (FIT Atomizers)	440
8.3.2.2	Atomization in Heated Quartz Tubes (QTAs)	442
8.3.2.3	Atomization in Graphite Furnaces	451
8.3.3	Interferences	454
8.3.3.1	Spectral Interferences.....	455
8.3.3.2	Interferences during Hydride Generation.....	455
8.3.3.2.1	Influence of the analyte species	455
8.3.3.2.2	Interferences caused by concomitants.....	456
8.3.3.2.3	Memory interferences	461
8.3.3.3	Interferences in the Atomizer.....	463
8.3.3.3.1	Quartz tube atomizers	463
8.3.3.3.2	Graphite tube atomizers	468
8.4	The Cold Vapor Technique.....	469
8.4.1	Mobility, Contamination, and Losses	469
8.4.2	Digestion Procedures	471
8.4.3	Interferences	473
8.4.3.1	Interferences on the Release of Mercury	473
8.4.3.2	Interferences to Amalgamation	474
9	The Individual Elements.....	477
9.1	Aluminium (Al).....	479
9.2	Antimony (Sb).....	482
9.3	Arsenic (As)	483
9.4	Barium (Ba).....	486
9.5	Beryllium (Be)	488
9.6	Bismuth (Bi).....	589
9.7	Boron (B)	490
9.8	Cadmium (Cd).....	492
9.9	Calcium (Ca)	493
9.10	Cesium (Cs).....	495
9.11	Chromium (Cr).....	496
9.12	Cobalt (Co).....	499
9.13	Copper(Cu).....	500

9.14	Gallium (Ga)	502
9.15	Germanium (Ge)	503
9.16	Gold (Au)	504
9.17	Hafnium (Hf).....	506
9.18	Indium (In)	506
9.19	Iodine (I)	508
9.20	Iridium (Ir)	508
9.21	Iron (Fe)	510
9.22	Lanthanum (La) and the Rare-earth Elements (REE)	512
9.23	Lead (Pb).....	516
9.24	Lithium (Li).....	519
9.25	Magnesium (Mg).....	520
9.26	Manganese (Mn)	522
9.27	Mercury (Hg)	523
9.28	Molybdenum (Mo).....	529
9.29	Nickel (Ni)	531
9.30	Niobium (Nb).....	533
9.31	Non-metals	534
9.32	Osmium (Os).....	535
9.33	Palladium (Pd).....	537
9.34	Phosphorus (P)	538
9.35	Platinum (Pt)	538
9.36	Potassium (K).....	541
9.37	Rhenium (Re).....	542
9.38	Rhodium (Rh).....	542
9.39	Rubidium (Rb)	544
9.40	Ruthenium (Ru).....	545
9.41	Scandium (Sc).....	546
9.42	Selenium (Se).....	547
9.43	Silicon (Si)	551
9.44	Silver (Ag).....	553
9.45	Sodium (Na)	554
9.46	Strontium (Sr)	555
9.47	Sulfur (S)	556
9.48	Tantalum (Ta)	557
9.49	Technetium (Tc).....	557
9.50	Tellurium (Te).....	558
9.51	Thallium (Tl).....	559
9.52	Tin (Sn)	561
9.53	Titanium (Ti).....	565
9.54	Tungsten (W)	567
9.55	Uranium (U)	567
9.56	Vanadium (V).....	568
9.57	Yttrium (Y)	569
9.58	Zinc (Zn)	570
9.59	Zirconium (Zr)	572

10	Applications of AAS	575
10.1	Body Fluids and Tissues	575
10.1.1	The Electrolytes	577
10.1.2	Trace Elements	581
10.1.3	Industrial Hygiene and Toxicology	598
10.1.4	Therapeutically Administered Elements	608
10.1.5	The Analysis of Tissues	610
10.2	Biological Materials	614
10.2.1	Sampling and Sample Pretreatment	616
10.2.2	Digestion Procedures for F AAS and GF AAS	616
10.2.3	Determination Procedures for F AAS	623
10.2.4	Determination Procedures for GF AAS	628
10.2.5	Digestion Procedures for Analytical Techniques Using Chemical Vapor Generation	640
10.2.6	Speciation Analysis	648
10.3	Environmental Analysis	655
10.3.1	Water Analysis	656
10.3.1.1	Sampling and Sample Conservation	657
10.3.1.2	Methods for F AAS	658
10.3.1.3	Methods for GF AAS	662
10.3.1.4	Methods for HG AAS	672
10.3.1.5	Methods for CV AAS	675
10.3.1.6	Methods of Speciation Analysis	676
10.3.1.7	Indirect Determination Methods	681
10.3.2	Soils, Sediments, Sludges	682
10.3.2.1	Sampling	682
10.3.2.2	Determining the Total Concentration of Analytes	682
10.3.2.3	Selective Extraction of Individual Constituents and Bonding Forms	688
10.3.2.4	Speciation Analysis in Soils, Sediments, and Sludges	691
10.3.3	Coal, Ash, Dust, and Air	694
10.3.3.1	Sampling Dusts	695
10.3.3.2	Digestion Procedures	697
10.3.3.3	The Direct Analysis of Solid Samples and Slurries	699
10.3.3.4	Methods for the Determination of Mercury	700
10.3.3.5	Speciation Analysis	702
10.4	Rocks, Minerals, Ores	703
10.4.1	Digestion Procedures	703
10.4.2	Direct Determinations from Digestion Solutions	705
10.4.3	Extraction and Preconcentration Procedures	708
10.4.4	The Direct Analysis of Solid Samples	710
10.5	Crude Oil and Petroleum Products	711
10.5.1	Origin-specific Elements and Contamination in Crude Oil	712
10.5.2	Additives to Fuels, Lubricating Oils, and Greases	716
10.5.3	Wear Metals and Lubricating Oils	719

10.5.4	Rubber and Plastics	722
10.6	Metallurgical Samples	724
10.6.1	Iron, Steel and Ferrous Alloys	724
10.6.1.1	Digestion Procedures	725
10.6.1.2	Direct Determinations by F AAS	726
10.6.1.3	Separation and Preconcentration Procedures	727
10.6.1.4	The Application of GF AAS	728
10.6.1.5	The Application of HG AAS	729
10.6.1.6	Direct Analysis of Solid Samples	730
10.6.2	Non-ferrous Metals and Alloys	731
10.6.2.1	Light Metals and Alloys	731
10.6.2.2	Lead, Tin, and Lead-Tin Alloys	732
10.6.2.3	Copper and Copper Alloys	733
10.6.2.4	Nickel, Chromium, Cobalt, Manganese and their Alloys	736
10.6.2.5	Hard and Refractory Metals	738
10.6.2.6	Ultrahigh-purity Metals	739
10.6.2.7	Noble Metal Analysis	740
10.6.2.8	Electrolytic Baths	741
10.7	Miscellaneous Industrial Products	742
10.7.1	The Analysis of Glass	742
10.7.2	Ceramic Materials, Superconductors	744
10.7.3	Cement and its Raw Materials	746
10.7.4	Chemicals	748
10.7.5	Pharmaceuticals and Cosmetics	752
10.7.5.1	Determination of Metallic Active Ingredients and Impurities	752
10.7.5.2	Indirect Determination of Organic Active Ingredients	754
10.7.6	Catalysts	755
10.7.7	Semiconductors	759
10.7.8	Nuclear Materials	762
10.7.9	Fertilizers, Fungicides and Pesticides	763
10.7.10	Paints, Varnishes, Pigments	765
10.7.11	Papers, Textiles, Leather	766
10.8	Multidisciplinary Applications	768
10.8.1	Forensic Analysis	768
10.8.2	Archeological Finds	769
Bibliography		771
Index		907
