Contents	xi
1 Introduction	1
2 Fundamentals of Josephson terahertz detectors	3
2.1 Superconductivity and the Josephson effect	4
2.2 The RCSJ model	5
2.2.1 Josephson oscillations and unperturbed I–V curve	7
2.2.2 Time-varying currents and Shapiro steps	9
2.2.3 Above-zero temperature and noise	10
2.2.4 Junction capacitance	12
2.3 Response to non-electrical influences	14
2.3.1 Temperature response	14
2.3.2 Magnetic field response	14
2.4 RF current response	17
2.4.1 Weak monochromatic RF current response	18
2.4.2 Hilbert spectroscopy	19
2.5 Frequency mixing and phase response	20
2.5.1 Broadband detection	20
2.5.2 Frequency range limitations	22
3 Hardware and acquisition setup	23
3.1 Setup overview	23
3.1.1 Josephson cantilever assembly	26
3.1.2 Cryogenic temperature control	30
3.1.3 Cryogenic sample operation	32
3.1.4 FIR laser	33
3.2 Cantilever readout	34
3.2.1 Biasing schemes	34
3.2.2 Current source	36
3.2.3 Voltage measurement	40
3.2.4 Hardware integration	43
3.2.5 Employing pyroelectric detectors	47

4	Numerical modeling and reconstruction techniques	51
4.1	Numerical simulation of JJ I–V curves	52
4.1.1	The Monte-Carlo approach	53
4.1.2	The Fokker–Planck approach	54
4.2	I–V curve preprocessing	60
4.2.1	Filtering and differential resistance reconstruction	61
4.2.2	Amplifier offset detection	66
4.3	Characterization of the Josephson junction	66
4.4	Spectroscopy	68
4.4.1	Hilbert spectroscopy	68
4.4.2	Deconvolution spectroscopy	68
4.5	Extended dynamic range imaging	71
4.5.1	Curve fitting with on-demand simulation	72
4.5.2	Employing efficient function approximators	74
5	Computational implementation	81
5.1	GPGPU for numerical simulation	82
5.1.1	GPU execution model fundamentals	83
5.1.2	Development languages and APIs	86
5.1.3	Optimization of the RSJ FPE solver	88
5.2	Automated differentiation for gradient methods	91
5.3	Networking and user interface concepts	92
5.3.1	Server configuration	93
6	Measurements	97
6.1	Cantilever characterization	97
6.2	Microwave imaging	100
6.3	Terahertz imaging	102
6.4	Dual-band mixing	106
7	Conclusion and Outlook	109
	List of Figures	111
	Own Publications	113
