

Contents

1	Introduction	1
1.1	Motivation for THz Communications	2
1.2	State of the Art	4
1.2.1	The THz Channel	4
1.2.2	Physical Layer Simulations for Wireless THz Systems	7
1.3	Structure and Contribution of This Dissertation	11
2	Methodology of Channel Measurements in Complex Scenarios	15
2.1	Measurement Methodology	15
2.1.1	Channel Measurement Techniques at THz Frequencies	16
2.1.2	Channel Classification	17
2.1.3	Challenges of Channel Measurements	18
2.1.4	In-situ Channel Measurements	20
2.2	Channel Sounding and Measurement Evaluation	21
2.2.1	Measurement Hardware	24
2.2.2	Measurement Procedure	25
2.2.3	Calibration and Post-Processing	26
2.2.4	Extraction of Multipath Components	29
2.3	Channel Parameters	31
2.4	Concluding Remarks	35
3	Channel Measurements of Wireless Links in a Data Center	37
3.1	Double-Directional Propagation Channel	39
3.1.1	Measurement Setup	39
3.1.2	Channel Characterization	40
3.2	Double-Directional Radio Channel	47
3.3	Point-to-Point Radio Channel	50
3.3.1	Top-of-Rack Links	51
3.3.2	Medium Height Links	54
3.4	Intra-Rack Links	55
3.5	Concluding Remarks	58
4	Realistic Channel Modeling of Wireless Links in a Data Center	61
4.1	Aspects of Channel Modeling at Low THz Frequencies	61
4.1.1	Modeling Approaches for Low THz Channels	61
4.1.2	Creation of the 3D Model	63
4.1.3	Interaction of Waves with Matter	64
4.2	Ray-Optical Channel Predictions	69
4.2.1	Functionalities of the Simulation Tool	70
4.2.2	Simulation Setup and Conduct	70

4.2.3	Comparison of Simulations and Measurements	71
4.3	A Hybrid Channel Model for Low THz Links in a Data Center	75
4.3.1	Model Description	75
4.3.2	Verification of the Channel Model	78
4.4	Concluding Remarks	81
5	A Physical Layer Simulator for Low THz Communication Systems	83
5.1	Selected Fundamentals on Physical Layer Simulations	84
5.1.1	Digital Modulation	84
5.1.2	Equivalent Lowpass Representation	85
5.1.3	Bandwidth Definitions	88
5.2	Main Building Blocks and Working Principles	89
5.2.1	Channel Coding	90
5.2.2	Modulation	90
5.2.3	Channel Implementation	92
5.2.4	Demodulation and Detection	94
5.2.5	Bit Evaluation	95
5.3	Validation	95
5.4	Top-of-Rack Link Characterization	97
5.4.1	Impact of Multipath Propagation	97
5.4.2	Performance Evaluation	100
5.5	Concluding Remarks	102
6	Advanced Physical Layer Simulations for THz Links in a Data Center	105
6.1	Simulation of Multicarrier THz Transmissions	105
6.1.1	IEEE Std 802.15.3d-2017	106
6.1.2	Multicarrier Extension of the Simulator	107
6.1.3	Inter-carrier Interference in Multicarrier THz Systems	110
6.2	Influence of Impairments of Radio Frequency Devices	116
6.2.1	Types of Impairments	116
6.2.2	Simulations	119
6.3	Realistic Interference Simulation in Complex Environments	122
6.3.1	Interference Model in Link Level Simulations	122
6.3.2	Interference in a THz Network	123
6.4	Concluding Remarks	128
7	Conclusion	129
	Appendix A Additional Measurement Results	133
	Appendix B Simulated Antenna Diagrams	135
	List of Figures	139
	List of Tables	141
	List of Acronyms	143

List of Symbols	147
Bibliography	155
List of Publications	171
