Introduction: Sovereignty and mobilities in a digitised world — 1

- Talking to computers at the border — 1
- Digitisation — 3
- State sovereignty and borders — 7
- What makes state borders smart? — 13
- Digital border technologies — 16
- The digitisation of cross-border mobilities — 23
- Studying digitisation at the border and on the move — 26

The spatial and temporal organisation of digitised borders — 30

- Digitisation and the position of state borders — 30
- Identifying *where* borders exist — 31
- The spatial logic of digitised borders — 33
- Defining the contours of digitised borders: Global spreads and fuzzy edges — 38
- The invisibility of digital borders — 43
- The mobilities of digitised sovereign borders — 45
- The digital (dis)articulation of sovereign borders — 48
- The changing temporal nature of digitised borders — 51
- The spatial and temporal logics of digitised borders — 54

Digital identities, algorithms and exclusion — 57

- How digitised borders assess people — 57
- Data doubles — 58
- Comparative digital identities of the border — 64
- Enrolment exclusion: Digitised borders not seeing minority subjects — 67
- The algorithmic exclusion of non-normative subjects — 71
- The digitisation of the political community — 76
- Wasted lives and internal smart borders — 79
- The role of digital identities at the border — 84

Modern bordering agency — 87

- Looking beyond single border agents — 87
- Bordering agency and actor-networks — 89

The digitisation of border assemblages: The internal agency of digital borders — **93**

Increased complexity of bordering networks — **96**

Increased opacity of bordering agencies — **99**

The displacement of human border guards — **102**

The changing roles of human border actants — **108**

Implications of digitised bordering agency — **112**

The digitisation of travel — 115

The digital technologies of travel — **115**

Digital technologies as essential tools of travel — **117**

Travel risks and threats posed by personal digital technologies — **121**

The digitisation of travel assemblages and agency — **124**

Novel digitised travel experiences — **130**

The creation of mobile digital divides — **135**

The production of digitised travellers — **139**

Travellers vs borders — 141

Tensions and conflict at the border — **141**

Bordering strategies and travel tactics — **142**

The strategic shifting of bordering labour: The rise of the border prosumer — **148**

Surveillance and countersurveillance — **155**

The embodiment of borders — **159**

Kinetic elites vs low motility travellers — **164**

Conclusion: Reimagining border digitisation — 168

Shaping the digitisation of borders and travel — **168**

The trends of border and migration digitisation — **169**

The inevitability and malleability of border digitisation — **175**

The transparency of digitised borders — **180**

Challenging discourses of objectivity within the digitised border — **191**

‘We’ are part of the border — **197**
