

Part I	Introduction	1
1	Digitalization: An Introduction	3
	Thomas Barton and Christian Müller	
	References	6
Part II	Influence on Work and Value Creation	7
2	The Future of Work	9
	Ute Klotz	
	2.1 Introduction	9
	2.2 Digitisation	10
	2.3 New Forms of Employment	14
	2.4 Trade Unions and Participation	16
	2.5 Science Fiction and the Future of Work	17
	2.6 Outlook	19
	References	19
3	New Forms of Value Creation in the Digital Age	23
	Kathrin Kirchner, Claudia Lemke, and Walter Brenner	
	3.1 Introduction and Case Studies	24
	3.2 Technology-Driven Value Creation	25
	3.3 Selected Forms of Digital Value Creation	28
	3.4 Digital Value Creation Using the Example of eHealth	34
	3.5 Summary and Outlook	36
	References	37
Part III	Business Models in Transition	41
4	New Business Models Based on Smart Transport Container and Data-Based Services	43
	Sebastian Meissner and Martina Romer	
	4.1 Introduction: Transformation of Logistics Driven by the Internet of Things, Data, and Services	44
	4.2 Challenges of Today's Load Carrier Management Within the Automotive Supply Chain	46

4.3	From the Transformation of the Product to a New Business Model	47
4.4	Modularity: With Modular Load Carrier to Reuse and Scalability	49
4.5	Digitalization: From Smart Load Carrier to Transparent Processes	49
4.6	Service System: From Data Integration to a Service Platform	51
4.7	Transformation of the Business Model by Setup of a Partner Network	54
4.8	Conclusion: Sustainable Market Change by the Internet of Load Carrier.	55
	References.	57
5	Benefits and Framework Conditions for Information-Driven Business Models Concerning the Internet of Things	59
	Dominik Schneider, Frank Wisselink, Christian Czarnecki, and Nikolai Nölle	
5.1	The Internet of Things as a Technological Driver of the Digital Transformation.	60
5.2	New IoT Use Cases Derive Value from Insights	62
5.3	Decision Agility and Uniqueness Determine Value Creation	65
5.4	Framework Conditions for Information-Driven Business Models.	69
5.5	Conclusion	72
	References.	73
6	Matching Between Innovative Business Model Patterns and IT Impact Areas.	77
	Gabriele Roth-Dietrich and Michael Gröschel	
6.1	Digital Transformation.	78
6.2	Business Model Innovation and the Pattern-Based Construction of Business Models	79
6.3	IT Impact Areas for Digital Transformation with Disruptive Character	81
6.4	Matching IT and Business Model DNA	86
6.5	Conclusion	95
	References.	96
	Part IV New Approaches in Process and Project Management	99
7	Process Digitalization Through Robotic Process Automation.	101
	Christian Czarnecki and Gunnar Auth	
7.1	Basics of Process Digitalization.	102
7.2	Architecture and Application Scenarios of Robotic Process Automation	104
7.3	Selection of Standard Software for RPA	108
7.4	Application Examples	113
7.5	Summary and Outlook.	116
	References.	117

8	Output Management in the Insurance Industry: Transformation Towards a Future-Oriented Omnichannel Architecture	121
	Stefan Unterbuchberger, Lucas Hubinger, and Thomas Rodewis	
8.1	Motivation: Output Management as the Key to Successful Customer Communication	122
8.2	Planning of the Pilot Application	127
8.3	Project Phase	130
8.4	Trends and Success Factors for Further Transformation	133
8.5	Outlook	143
	References	144
9	Vision and Maturity Model for Digitized Project Management	145
	Holger Timinger and Christian Seel	
9.1	Digitalisation in Project Management	145
9.2	Maturity Models in Project Management	148
9.3	Vision of Digitalised Project Management	150
9.4	Maturity Model for Digitalized Project Management M2DIP	155
9.5	Implications of the Maturity Model in the Company	158
9.6	Summary and Outlook	159
	References	159
Part V	Innovation in Product Development and Production	161
10	Systems Thinking in the Product Development Process 4.0	163
	Martina Königsbauer	
10.1	Chosen Approach to Systems Thinking	163
10.2	Focus and Evolution of This Chapter	165
10.3	Definition of the Product Development Process 4.0 (PDP 4.0)	166
10.4	Using Systems Thinking to Define and Establish a PDP 4.0	166
10.5	Applying Sample Questions from Systems Thinking	175
	References	177
11	Manufacturing Execution Systems and Industry 4.0	179
	Norbert Ketterer	
11.1	Manufacturing Execution Systems	180
11.2	SAP®-ME/MII (Manufacturing Execution/Manufacturing Integration and Intelligence)	184
11.3	Sample Processes in the SAP University Alliance Industry 4.0 Landscape	188
11.4	Outlook	195
	References	197
Part VI	Analysis and Optimisation of Customer Interaction	199
12	Analysis of Travel Blogs Or: What Can We Learn About Traveller Behaviour From Travelogues?	201
	Marco Graf and Thomas Barton	
12.1	Introduction	201

12.2	Travel Blogs	202
12.3	Modern Technologies for Data Storage and Analysis	203
12.4	Analysis of Travel Blogs	204
12.5	New Zealand As a Destination.	206
12.6	Evaluation of Travel Reports From New Zealand	208
12.7	Summary	213
12.8	Update and Outlook	214
	References.	215
13	Optimization of Customer Interaction in Online Wine Trade Using the Example of the VICAMPO iOS App.	217
	Karsten Würth and Thomas Barton	
13.1	The VICAMPO App	217
13.2	RESTful API in the Mobile Environment	219
13.3	User Interface and Design	220
13.4	Performance Optimization.	222
13.5	Development Under iOS	222
13.6	Push Notifications	224
13.7	Status and Further Steps.	225
	References.	227
Part VII	Opportunities and Risks in Implementation.	229
14	Implementing the Digital Transformation: Digital Leadership Principles and Tools	231
	Claudia Lemke, Kathrin Kirchner, and Walter Brenner	
14.1	Introduction	232
14.2	Essence of the Digital Transformation.	232
14.3	Leadership Principles for Enterprise-Wide Digitalisation.	235
14.4	Instruments for Enterprise-Wide Digitalisation.	243
14.5	Summary and Outlook.	249
	References.	250
15	Secure Digitization	253
	Sachar Paulus	
15.1	Introduction	253
15.2	Overview of the Dangers of Digitisation	254
15.3	What Is Security?.	256
15.4	Security Management	260
15.5	Legal Requirements and the State of the Art	264
15.6	Necessary Security Concepts.	265
15.7	Conclusion	267
	References.	267
