

Contents

Acknowledgments — VII

Preface — IX

Chapter 1

Introduction — 1

- 1.1 The purpose of the book — 1
- 1.2 Introduction in the conception of mathematical models of the learning curves — 1
- 1.3 How much mathematics do students need to understand principles of mathematical modeling? — 5
- 1.4 Computer requirements — 5
- 1.5 Study questions — 5
- 1.6 Resources and references — 6

Chapter 2

Mathematical models of the learning curves — 7

- 2.1 Introduction — 7
- 2.2 A hyperbolic function — 7
- 2.3 An arc cotangent function — 9
- 2.4 A logarithmic function — 11
- 2.5 The system analysis approach to learning curve modeling — 12
- 2.6 The transitional process in the first-order linear system — 13
- 2.7 The time constant — 14
- 2.8 The authors' model based on the first-order transfer function — 14
- 2.9 Description of the model — 14
- 2.10 A logistic function — 16
- 2.11 The method of least squares in the curve fitting — 18
- 2.12 Linear least squares — 19
- 2.13 Nonlinear least squares — 22
- Experiment 2.1 Fitting learning data with the hyperbolic model — 27
- Experiment 2.2 Fitting learning data with the arc cotangent model — 40
- Experiment 2.3 Fitting learning data with the logarithmic model — 46
- Experiment 2.4 Fitting learning data with the authors' model — 52
- Experiment 2.5 Fitting learning data with the logistic model — 65

Chapter 3

The learning curves in animals — 75

- 3.1 Introduction — 75
- Experiment 3.1 Tentacle withdrawal reflex in land snails — 78

- Experiment 3.2 Food avoidance in land snails — **86**
- Experiment 3.3 The proboscis extension reflex in honey bees — **94**
- Experiment 3.4 The appetitive light-dark discrimination learning task in rats — **101**

Chapter 4

The learning curves in humans — 111

- 4.1 Introduction — **111**
- Experiment 4.1 Assessment of short-term memory — **116**
- Experiment 4.2 Assessment of long-term memory — **127**
- Experiment 4.3 Memory monitoring — **138**
- Experiment 4.4 Evaluation of the effectiveness of supplements on memory impairment — **144**
- Experiment 4.5 Evaluation of external sound on learning — **153**
- Experiment 4.6 Modeling the forgetting curve — **164**
- Experiment 4.7 Modeling the maze learning curve — **174**
- Experiment 4.8 Modeling the human classical salivary conditioning learning curve — **183**

Chapter 5

Learning curves in machine learning — 193

- 5.1 Introduction — **193**
- Experiment 5.1 Machine learning curves — **194**

Appendix 1: Installing the WEB application on the computer — 213

Appendix 2: Construction of the Y-maze — 215

Appendix 3: Construction of the honey bee conditioning tube — 217

References — 219

About the Authors — 233

Index — 235
