

1	Introduction	1
1.1	Background	1
1.2	Scope and Objectives	3
1.3	Structure of the Book	3
2	Literature Review	5
2.1	Wave	5
2.1.1	Seismic Wave	7
2.2	Sources of Ground-born Vibration	13
2.3	Effect of Vibration	15
2.4	Vibration Mitigation	17
2.4.1	Measures at the Source	17
2.4.2	Measures at the Receiver	18
2.4.3	Measures at the Transmission Path	19
2.5	Wave Interaction by Trench	19
2.6	Vibration Isolation Through Wave Barriers	21
2.7	Geofoam	23
3	Genetic Algorithm and Artificial Neural Network	25
3.1	Genetic Algorithm	25
3.1.1	Fitness Function	28
3.1.2	Genetic Operators	29
3.1.3	Replacement	38
3.2	Application of Genetic Algorithms	39
3.3	Artificial Neural Network	39
3.3.1	Neurons	42
3.4	Feedforward Networks	45

3.4.1	Backpropagation	46
3.4.2	Data Preparation	47
3.5	Application of ANN	48
3.6	Response Surface Methodology	49
4	Vibration Screening in Homogeneous Soil	51
4.1	Problem Definition	51
4.2	Field Test	52
4.2.1	Site Investigation	52
4.2.2	Field Test Method and Equipment	53
4.2.3	Test Results and Discussion	55
4.3	Numerical Modelling	59
4.3.1	Validation of Finite Element Method	62
4.4	Near Field Isolation (Soft Barrier)	65
4.4.1	Single Wall System	66
4.4.2	Double Wall System	70
4.4.3	Triangular Wall System	76
4.4.4	Comparison of Different Systems	80
4.5	Far Field Isolation (Soft Barrier)	81
4.5.1	Single-wall Study	81
4.5.2	Double-wall Barrier	84
4.5.3	Triangular Wall Barrier	86
4.5.4	Comparison of Different Systems	88
4.6	Near Field Isolation (Stiff Barrier)	89
4.6.1	Single Wall Barrier	90
4.6.2	Double Wall Barrier	91
4.6.3	Triangular Wall Barrier	93
4.7	Conclusion	94
5	Shape Optimization of the Trench by Genetic Algorithm	97
5.1	Introduction	97
5.2	Problem Definition	97
5.3	Finite Element Model	98
5.4	Effect of Cross-sectional Area	101
5.5	Genetic Algorithm	102
5.5.1	The Range of Parameters in Genetic Algorithm	104
5.5.2	Implementation of Genetic Algorithm	105
5.6	Genetic Algorithm Model for Near Field Isolation	109
5.6.1	Comparison Between Different Systems (Near Field) ...	111

5.7	Genetic Algorithm Model for Far Field Isolation	114
5.7.1	Frequency Domain Analyses of Different Systems (Passive)	115
5.8	Conclusion	116
6	Vibration Screening in Layered Soil	119
6.1	Problem Definition	119
6.2	Homogeneous Soil Versus Layered Soil	122
6.3	Single Parametric Study	124
6.3.1	Influence of the Depth and Width of the Barrier	127
6.3.2	Influence of the Shear Wave Velocity of the First Layer	133
6.3.3	Influence of the Thickness of the First Layer	135
6.3.4	Influence of the Location of the Barrier	136
6.3.5	Influence of the Density of the Geofoam	138
6.4	Interaction Between Different Parameters	139
6.4.1	Interaction of D and V_s	144
6.4.2	Interaction of V_s and L	146
6.4.3	Interaction of X and V_s	148
6.4.4	Interaction of X and D	149
6.4.5	Interaction of X and L	150
6.4.6	Interaction of Three Parameters on each other	151
6.5	Conclusion	153
7	Optimization and Prediction of the Trench in Layered Soil	155
7.1	Implementation of Genetic Algorithm	155
7.1.1	Results	159
7.2	Feedforward Networks	163
7.2.1	Backpropagation	164
7.2.2	Data Preparation	166
7.2.3	Implementing Feedforward Neural Network	166
7.2.4	Results	170
7.2.5	Validating ANN Model	173
7.3	Conclusion	175
8	Developing an app for Predicting and Optimizing the Vibration ...	177
8.1	Developing an app for Predicting and Optimizing the Vibration	177
8.1.1	Problem Definition	177

8.2	MATLAB App Designer	179
8.2.1	Developing Anti-Vibration App	179
8.3	Conclusion	185
9	Summary and Conclusions	187
9.1	Summary and Conclusion	187
	Bibliography	193
