

Contents

Introduction	5
1 The significance of training the vagus nerve and interoception.....	9
The role of the brain and nervous system	10
How the nervous system is structured	14
The vagus nerve – the main transmitter of information from inside the body.....	17
The insular cortex – the control centre for interoception	20
How to use this book	27
2 Assessments – quick tests for lasting success.....	31
Test the effectiveness of your training	32
How to use the assessments	33
Assessment 1 – Mobility	36
Assessment 2 – Pain level	40
Assessment 3 – Air hunger	41
Assessment 4 – Muscular contractions.....	43
Assessment 5 – Balance.....	46
3 Laying the foundations for optimal vagus nerve training.....	53
The importance of preparing the vagus nerve and interoceptive awareness training.....	54
Upregulating the frontal lobe	55
Optimising the vestibular system.....	64
Using smell and taste to improve sensory integration	90
Preparing the vagus nerve neuromechanically.....	97
Improving bilateral movements	109
4 Breathing and the pelvic floor.....	117
The power of breathing	118
Improving the coordination of the respiratory muscles.....	121
Breathing techniques to prolong exhalation.....	146
Air hunger drills	154
The pelvic floor – an essential component of interoceptive awareness.....	167

5	Tongue and throat	183
	Impacting the vagus nerve and interoceptive awareness with tongue exercises.....	184
	Throat exercises to stimulate the pharyngeal branches of the vagus nerve.....	204
6	Touch, sound and vision for better interoceptive awareness	213
	The importance of all five senses	214
	Perceiving temperature differences	215
	Pressure and deep tissue massage	220
	Acoustic mapping	225
	Eye exercises to aid relaxation	235
7	Body awareness and mindfulness	247
	Using body awareness and mindfulness exercises to activate key areas of the brain.....	248
	The difference between body awareness and mindfulness	249
	Body awareness training with Jacobson's progressive muscle relaxation technique.....	251
	Mindfulness training.....	254
8	Specific training plans to improve your health issues.....	263
	The art of selecting effective combinations for maximum success	264
	Category 1: Improving general health, reducing stress and increasing physical fitness	267
	Category 2: Chronic pain.....	283
	Category 3: Emotional regulation	291
	Category 4: Digestive disorders.....	295
	Category 5: Pelvic floor dysfunction.....	299
	Appendix.....	302
